

Sample Question Paper-1

Total Question: 100

Maximum Marks: 300

Instructions

- Total Number of Questions – 100. This Paper is divided in four sections.
 - SECTION-A | VERBAL ABILITY — 30 Questions
 - SECTION-B | NUMERAL ABILITY — 20 Questions
 - SECTION-C | REASONING & MILITARY APTITUDE — 25 Questions
 - SECTION-D | GENERAL KNOWLEDGE — 25 Questions
- Each Question carries of three marks. One mark is deducted for every wrong answer.
- No mark is awarded/deducted for un-attempted questions.

SECTION-A | VERBAL ABILITY

- Choose the word which is nearly opposite in meaning to the given word:
'Clandestine'
(a) Surreptitious (b) Stealthy
(c) Furtive (d) Overt
- Directions (Q. Nos. 2–6):** In the following passage, there are some numbered blanks.
- Fill in the blanks by selecting the most appropriate word for each blank from the given options.
- Art and culture play a vital role in preserving the identity of a society. Museums, theatres and cultural festivals not only entertain people but also help them (2) _____ the traditions of previous generations. Artists often draw (3) _____ from historical events, folklore and everyday life to create works that resonate with diverse audiences. At the same time, globalisation has (4) _____ cultural exchange by making artistic expressions accessible across borders. However, critics argue that excessive commercialisation may (5) _____ the originality of traditional art forms. Therefore, governments and cultural organisations must work together to (6) _____ both heritage and innovation.
- The most suitable word for blank (2) is:
(a) Preserve (b) Abandon
(c) Neglect (d) Distort
 - The most suitable word for blank (3) is:
(a) Interruption (b) Hesitation
(c) Isolation (d) Inspiration
 - The most suitable word for blank (4) is:
(a) Facilitated (b) Obstructed
(c) Diminished (d) Concealed
 - The most suitable word for blank (5) is:
(a) Enhance (b) undermine
(c) celebrate (d) appreciate
 - The most suitable word for blank (6) is:
(a) Suppress (b) Overlook
(c) Safeguard (d) Disregard
- In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
'A person who has more than one spouse at the same time'.
(a) Monogamist (b) Celibate
(c) Polygamist (d) Bigot
 - Choose the option which best expresses the meaning of the idiom/phrase given below:
'Break the ice.'
(a) To overcome initial social awkwardness and encourage conversation
(b) To resolve a serious conflict permanently
(c) To reveal a closely guarded secret
(d) To begin an important negotiation formally
 - Choose the option which best expresses the meaning of the idiom/phrase given below: 'Go out on a limb.'
(a) To make an unpopular decision after careful planning
(b) To act without considering the consequences of one's actions
(c) To defend someone despite strong evidence against them
(d) To support an uncertain opinion or take a personal risk
 - In the following question, a part of the sentence may have errors. Find out which part of the sentence has an error and select the appropriate option. If a sentence is free from error, select 'No Error'.
(a) The rise in the prices of essential commodities,
(b) together with frequent disruptions in the supply chain,
(c) have affected consumer confidence.
(d) No error.
 - In the following question, one part of the sentence may have an error. Find out which part of the sentence has an error and click the option corresponding to it.

If the sentence is free from error, select the 'No Error' option.

The committee found the proposal more preferable than all the other alternatives presented during the meeting.

- (a) The committee found the proposal
- (b) more preferable than all the other alternatives
- (c) presented during the meeting
- (d) No error

12. What is the synonym for the word 'LUGUBRIOUS' ?

- (a) Mournful
- (b) Boisterous
- (c) Transparent
- (d) Frivolous

13. Choose the option that best defines the given phrases: 'Add fuel to the fire'

- (a) To ignore an argument completely
- (b) To solve a difficult problem quickly
- (c) To begin a new project with enthusiasm
- (d) To make a bad situation worse

14. 'Choose the option that best defines the given phrases: An armchair job'.

- (a) A dangerous job involving physical risk
- (b) A job that requires frequent travel
- (c) A comfortable job involving little physical effort
- (d) A temporary job with low wages

15. Choose the option that best defines the given word : 'Casanova'.

- (a) A person who avoids social gatherings
- (b) A man known for pursuing many romantic relationships
- (c) A highly skilled craftsman
- (d) A person who is extremely generous

16. A place where dead bodies are kept, especially before burial or post-mortem examination.

- (a) Observatory
- (b) Conservatory
- (c) Mortuary
- (d) Sanctuary

17. Choose the most appropriate answer and fill in the blanks.

The noun from of the word 'Persist' is _____

- (a) Persistence
- (b) Persisting
- (c) Persistent
- (d) Persistive

18. Fill in the blank with the most appropriate choice:

The spread of fake news on social media has become a serious _____ to public trust.

- (a) Oasis
- (b) Menace
- (c) Tribute
- (d) Legacy

19. In the following question, there is a related pair of words given. Each pair is followed by four other pairs of words. Choose the pair that best expresses the same relationship as the original pair.

Scarcity: Abundance

- (a) Courage : Bravery
- (b) Victory : Triumph
- (c) Fragile : Delicate
- (d) Hostile : Friendly

20. In the following question, there is a related pair of words given. Each pair is followed by four other pairs of words. Choose the pair from the given option that best expresses the relationship like the original pair.

Benevolent : Kind

- (a) Arrogant : Humble
- (b) Tedious : Boring

- (c) Fragile : Strong
- (d) Ancient : Modern

21. In the following question, out of the four alternatives, choose the one which best expresses the meaning of the given word. 'Levitating.'

- (a) Floating
- (b) Sinking
- (c) Crawling
- (d) Digging

22. Rearrange the following sentences to form a coherent paragraph.

1. However, many people underestimate the importance of drinking enough water throughout the day.
2. Proper hydration helps regulate body temperature, transport nutrients and improve concentration.
3. As a result, even mild dehydration can lead to fatigue, headaches and reduced productivity.
4. Water is essential for the healthy functioning of the human body.

- (a) 2 - 4 - 3 - 1
- (b) 1 - 3 - 4 - 2

- (c) 4 - 2 - 1 - 3
- (d) 4 - 1 - 3 - 2

23. Choose the word that is opposite in meaning to 'Meticulous.'

- (a) Precise
- (b) Diligent
- (b) Thorough
- (d) Careless

24. Rearrange the following sentences to form a coherent paragraph.

1. Consequently, many companies now encourage employees to maintain a healthy work-life balance.
2. Excessive work-related stress can negatively affect both physical and mental health.
3. Such initiatives often include flexible working hours, wellness programs and regular counselling sessions.
4. Organisations have realised that employee well-being directly influences productivity and job satisfaction.

- (a) 4 - 2 - 1 - 3
- (b) 2 - 4 - 1 - 3

- (c) 1 - 3 - 2 - 4
- (d) 2 - 1 - 4 - 3

Direction (Q. Nos. 25–27): Read the passage carefully and answer the questions given below:

Artificial Intelligence (AI) has rapidly transformed the way people learn, work and communicate. It has become an indispensable tool in education, healthcare, business and scientific research by improving efficiency and reducing repetitive tasks. However, excessive dependence on AI may gradually weaken critical thinking, creativity and independent decision-making. Many students, for instance, rely heavily on AI-generated responses instead of developing their own analytical skills.

Likewise, professionals who depend entirely on automated systems may struggle when technology fails or when human judgment is required. Therefore, AI should be viewed as a supportive assistant rather than a complete replacement for human intelligence. A balanced approach, combining technological assistance with independent reasoning, can help individuals maximise the benefits of AI while preserving essential cognitive abilities.

25. The passage mainly focuses on _____.

- (a) the complete replacement of humans by AI

- (b) the balanced use of Artificial Intelligence
 (c) the history of Artificial Intelligence
 (d) the disadvantages of modern education
26. According to the passage, excessive dependence on AI may reduce a person's _____.
 (a) financial stability and communication skills
 (b) interest in scientific research
 (c) physical strength and memory power
 (d) creativity, critical thinking and independent decision-making
27. Which of the following ideas are supported by the passage?
 (i) AI improves efficiency in various fields.
 (ii) AI should entirely replace human intelligence.
 (iii) Excessive dependence on AI may weaken analytical skills.
 (iv) Human reasoning should be used along with AI.
 (a) i and ii only (b) ii and iii only
 (c) i, iii and iv only (d) i, ii, iii and iv

Direction (Q. Nos. 28–30): Read the following passage carefully and answer the questions given below it.

India's foreign policy has evolved significantly over the years, with the objective of promoting peace, economic growth and strategic cooperation. The country maintains diplomatic relations with nations across the world and actively participates in international organisations such as the United Nations, G20, BRICS and the Shanghai Cooperation Organisation. India's approach is guided by the principles of mutual respect, non-interference in the internal affairs of other nations and peaceful

resolution of disputes. In recent years, India has strengthened its partnerships through trade agreements, defence cooperation, technological collaboration and humanitarian assistance during global crises. At the same time, it continues to maintain strategic autonomy by making independent decisions based on its national interests rather than aligning permanently with any single global power.

28. Which of the following best describes the tone of the author in the passage?
 (a) Critical (b) Informative
 (c) Emotional (d) Humorous
29. Which of the following is NOT true according to the passage?
 (a) India participates in several international organisations.
 (b) India's foreign policy is based on peaceful resolution of disputes.
 (c) India permanently aligns itself with a single global power.
 (d) India strengthens international relations through trade and defence cooperation.
30. The main purpose of the passage is to
 (a) criticise India's diplomatic strategies.
 (b) compare India's foreign policy with that of neighbouring countries.
 (c) highlight only India's role in humanitarian assistance.
 (d) explain the objectives and guiding principles of India and its international relations.

SECTION-B | NUMERAL ABILITY

31. The marks obtained by 10 students in a test are:
 18, 22, 25, 27, 30, 30, 32, 35, 38, x
 If the mean marks are 30, then the value of x is:
 (a) 40 (b) 41 (c) 43 (d) 45
32. The product of two positive integers is 10080 and their HCF is 24.
 Find their LCM.
 (a) 360 (b) 400 (c) 420 (d) 480
33. Find the missing term.
 6, 14, 30, 62, 126, ?
 (a) 250 (b) 252 (c) 254 (d) 258
34. A box contains 5 red, 4 blue and 3 green balls.
 Two balls are drawn one after another without replacement.
 What is the probability that both balls are blue?
 (a) $\frac{1}{11}$ (b) $\frac{2}{33}$ (c) $\frac{3}{22}$ (d) $\frac{1}{9}$
35. A can complete a piece of work in 18 days, while B can complete the same work in 24 days. They work together for 6 days, after which A leaves the work.

In how many more days will B alone complete the remaining work?

- (a) 8 days (b) 9 days (c) 10 days (d) 12 days
36. A train crosses a platform 240 m long in 24 seconds and crosses a man walking at 6 km/h in the same direction in 18 seconds. Find the length of the train.
 (a) 180 m (b) 200 m (c) 600 m (d) 300 m
37. A boat covers 48 km downstream in 4 hours and the same distance upstream in 6 hours. Find the speed of the boat in still water.
 (a) 9 km/h (b) 10 km/h (c) 11 km/h (d) 12 km/h
38. A sum amounts to ₹13,310 in 2 years at 10% per annum compounded annually.
 Find the principal.
 (a) ₹10,500 (b) ₹11,000 (c) ₹11,500 (d) ₹12,000
39. A cylindrical water tank has an internal radius of 3.5 m and a height of 8 m.
 How many litres of water can it hold? (Use $\pi = \frac{22}{7}$)
 (a) 300,800 litres (b) 307,800 litres
 (c) 308,000 litres (d) 310,000 litres

40. When a positive integer N is divided by 18, the remainder is 11. What will be the remainder when $5N$ is divided by 18?
(a) 1 (b) 7 (c) 11 (d) 15
41. The least number which must be added to 1578 so that the resulting number becomes exactly divisible by 21 is
(a) 18 (b) 4 (c) 16 (d) 9
42. The salary of an employee is first increased by 20% and then decreased by 10%. If his final salary is ₹39,600, what was his original salary?
(a) ₹46,000 (b) ₹36,667 (c) ₹27,007 (d) ₹39,000
43. The population of a town increased by 25% in the first year and decreased by 20% in the second year. If the present population is 60,000, what was the population two years ago?
(a) 58,000 (b) 60,000 (c) 62,500 (d) 64,000
44. A shopkeeper marks an article 25% above the cost price. He allows a 10% discount on the marked price and earns a profit of ₹180. Find the cost price of the article.
(a) ₹1,200 (b) ₹1,700 (c) ₹1,440 (d) ₹1,800
45. A trader purchases an article for ₹2,400. He marks it 20% above the cost price and allows a discount of 5%. What is his profit percentage?
(a) 12% (b) 14% (c) 15% (d) 16%
46. The ratio of the ages of A and B is 5 : 7. After 8 years, the ratio becomes 7 : 9. Find the present age of B.
(a) 28 years (b) 30 years (c) 35 years (d) 42 years
47. The ratio of boys and girls in a class is 7 : 5. If 12 more girls join the class, the ratio becomes 7 : 6. Find the original number of boys.
(a) 84 (b) 49 (c) 56 (d) 63
48. The average marks of 12 students is 68. If the marks of one student were incorrectly recorded as 54 instead of 84, what is the correct average?
(a) 69.5 (b) 70 (c) 70.5 (d) 71
49. The average age of 15 employees is 32 years. Five new employees join whose average age is 26 years. Find the average age of all the employees now.
(a) 30 years (b) 30.5 years
(c) 31 years (d) 31.5 years
50. A box contains 5 red, 4 blue and 3 green balls. Three balls are drawn one after another without replacement. What is the probability that exactly two of the three balls are red?
(a) $\frac{25}{66}$ (b) $\frac{7}{22}$ (c) $\frac{15}{44}$ (d) $\frac{10}{33}$

SECTION-C | REASONING & MILITARY APTITUDE

51. Eight people are sitting in two parallel rows containing 4 people each in such a way that there is equal distance between adjacent persons.
In row 1, L, M, N and O are seated and all of them are facing south.
In row 2, U, V, W and X are seated and all of them are facing north.
Thus, each person faces another person from the other row.
W sits to the immediate right of U. Only two people sit between L and M. U faces L. The one who faces N sits to the immediate left of V. X does not sit at any of the extreme ends. Who amongst the following faces O?
(a) V (b) X (c) U (d) W
52. Select the option in which the given figure is embedded (rotation is NOT allowed).

- (a)  (b)  (c)  (d) 
53. In a code language, 'close the window' is coded as 'ja pa la', 'window is opened' is coded as 'ma du la', 'door is strong' is coded as 'na ta ma'. What is the code for the word 'opened'?
(a) la (b) pa (c) ma (d) du
54. Select the number from among the given options that can replace the question mark (?) in the above figure.

- (a) 15 (b) 33 (c) 20 (d) 10
55. Rout starts from Point A and drives 4 km towards South. He then takes a left turn, drives 9 km, turns left and drives 8 km. He then takes a left turn and drives 16 km. He takes a final left turn, drives 4 km and stops at Point P. How far (shortest distance) and towards which direction should he drive in order to reach Point A again? (All turns are 90° turns only unless specified.)
(a) 5 km to the West (b) 4 km to the South
(c) 6 km to the South (d) 7 km to the East
56. If '+' means '-', '-' means '×', '×' means '÷' and '÷' means '+' then, what is $8 + (6 - 2) \times 8 \div 1 = ?$
(a) 9 (b) 8 (c) 7.5 (d) 6
57. In the following question, select the related word from the given alternatives.
Mekong : Tibet :: Amazon : ?
(a) Chile (b) Peru (c) Colombia (d) Ecuador

58. If 'A' stands for '+', 'B' stands for '-', 'C' stands for '×' and 'D' stands for '÷', what will come in place of the question mark (?) in the following equation?
 $25\ C\ 3\ B\ 36\ D\ 12\ A\ 20 = ?$

(a) 90 (b) 93 (c) 92 (d) 91

59. Choose the figure which is different from the rest.

60. Select the correct mirror image of the given figure when a vertical mirror is placed to the right of the figure.

61. Which of the following letter-number clusters will replace the question mark (?) in the given series to make it logically complete?

ASW90, UMQ81, OGG72, IAE63, ?

(a) CUZ54 (b) CUY54 (c) DUY54 (d) COY54

62. Which of the following words does not belong to the group?

(a) Jam (b) Juice (c) Squash (d) Lemon
 (a) B (b) D (c) A (d) C

63. Study the statement given below and decide which of the following is implicit in the assertion.

Statement: The teacher told the students, 'Water is a valuable resource.'

Assumption:

- I. She wants children to understand the importance of water
 II. She wants them to understand that water should not be wasted.

(a) Both assumptions I and II are implicit.
 (b) Only assumption II is implicit.
 (c) Only assumption I is implicit.
 (d) Neither assumption I nor II is implicit.

64. Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements: Some mittens are bibs.

All bibs are socks.

Some socks are clothes.

Conclusions:

I. Some mittens are clothes.

II. Some clothes are bibs.

(a) Neither Conclusion (I) nor (II) follows.
 (b) Only Conclusion (II) follows.
 (c) Only Conclusion (I) follows.

(d) Both the Conclusion (I) and (II) follow.

65. Four words have been given below of which three are alike in some way and one is different. Choose the odd one out:

(a) ISM Dhanbad
 (b) (CBI) Central Bureau of Investigation
 (c) NIT Warangal
 (d) BHU Varanasi

66. What will be the smaller of the two angles made by the hour hand and minute hand in the clock at 2 : 41 pm?

(a) 165° (b) 165.5° (c) 166.5° (d) 166°

67. Find the value of 'x' in the following number series:

1, 6, 4, 8, 7, 10, 10, 12, x, 14, 16, 16.

(a) 14 (b) 18 (c) 12 (d) 13

68. All 105 students in a class are standing in a row facing north. Ravi is 49th from the right end while Shruti is 38th from the left end. How many people stand between Ravi and Shruti?

(a) 19 (b) 17 (c) 16 (d) 18

69. The given Venn diagram shows the number of friends who have got rose, sunflowers and lotus in an event. How many of these friends have got roses?

(a) 41 (b) 35 (c) 62 (d) 56

70. Which of the following correctly represents the relationship between:

1. Ray 2. Ocean 3. Sun

71. Seven boxes G, F, E, D, C, B and W are kept one over the other but not necessarily in the same order. Only two boxes are kept below D. Only one box is kept above B. Only one box is kept between B and F. G is kept immediately above C. W is kept at some place below E. How many boxes are kept between E and G?

(a) Two (b) One (c) Four (d) Three

72. Select the option figure that can replace the question mark (?) to complete the pattern in the question figure.

73. The sequence of folding a piece of paper and the manner in which the folded paper has been cut is shown below. Choose the figure that would most closely resemble the unfolded form of the paper.

74. In a certain code language,

'A – B' means 'A is the father of B',

'A @ B' means 'A is the mother of B',

'A ₹ B' means 'A is the wife of B' and

'A + B' means 'A is the brother of B'.

How is D related to T if 'D @ E – F + S ₹ T'?

- (a) Father's mother (b) Wife's father
(c) Wife's father's mother (d) Wife's mother

75. In a certain code language, 'HINDI' is written as '96' and 'FRENCH' is written as '116'. How will 'ARABIC' be written in that language?

- (a) 128 (b) 40 (c) 76 (d) 93

SECTION-D | GENERAL KNOWLEDGE

76. With reference to Air Chief Marshal AP Singh, consider the following statements.
1. Air Chief Marshal AP Singh was commissioned into the fighter stream of the Indian Air Force on 21 Dec 1984.
 2. He is an alumnus of the National Defence Academy, Defence Services Staff College and National Defence College.
- Which of the statements given above is/are correct?
- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2
77. This dance is a vital religious festival of the northeast tribe, one of the three major matrilineal ethnic groups in the northeast. This dance festival is celebrated during Autumn at Smit, the cultural centre of the Khasi Hills, are mainly associated with which Indian state?
- (a) Arunachal Pradesh (b) Mizoram
(c) Meghalaya (d) Nagaland
78. Which of the following Indian private aerospace companies entered into a Memorandum of Understanding (MoU) with Finland-based ICEYE to jointly develop, launch and operate Synthetic Aperture Radar (SAR)-based Earth observation satellite systems from India?
- (a) Skyroot Aerospace (b) Agnikul
(c) Bellatrix Aerospace (d) Pixxel
79. Who took over as the Air Officer Commanding-in-Chief (AOC-in-C) of the South Western Air Command of the Indian Air Force on 1 July 2026?
- (a) Air Marshal Tejinder Singh
(b) Air Marshal Amar Preet Singh
(c) Air Marshal Jasvir Singh Mann
(d) Air Marshal P. V. Shivanand
80. 'Butterfly stroke' is associated with which sport?
- (a) Swimming (b) Boxing
(c) Athletics (d) Wrestling
81. Surha Tal Wetland has been designated as India's 100th Ramsar site wetland of international importance, is located in which State?
- (a) Rajasthan (b) Uttar Pradesh
(c) Gujarat (d) Haryana
82. Battle of Midway was famously associated with which of the following events?
- (a) Cold War (b) World War II
(c) French Revolution (d) Russian Revolution
83. During swallowing, the glottis can be covered by a thin elastic cartilaginous flap called?
- (a) Trachea (b) Epiglottis
(c) Bronchus (d) Alveolus
84. The Philippines assumes the ASEAN Chairmanship in 2026 at a defining moment for the region. As Chair, the Philippines embraces this responsibility with resolve and vision, guided by the theme of?
- (a) Navigating Our Future, Together
(b) Global governance, peace and security, economic cooperation, human rights and sustainable development
(c) Peace and Security
(d) Human Rights and Humanitarian Assistance
85. Which of the following organisations was set up on 2nd April, 1990 by the Government of India under an Act of the Parliament, as a wholly owned subsidiary of IDBI Bank?
- (a) Small Industries Development Bank of India
(b) National Bank For Agriculture And Rural Development
(c) Industrial Development Bank of India
(d) Small Industries Credit and Investment Corporation of India Ltd
86. The midday sun is exactly overhead at least once a year on all latitudes in between the Tropic of Cancer and the Tropic of Capricorn. This area, therefore, receives the maximum heat and is called?
- (a) Temperate Zones (b) Equatorial Zones
(c) Frigid Zones (d) Torrid Zones
87. Which of the following is the extended margin of each continent occupied by relatively shallow seas and gulfs?
- (a) Continental shelf (b) Seamount
(c) Mid-oceanic ridge (d) Guyot
88. With reference to the History of UN Peacekeeping, consider the following statements:
1. UN Peacekeeping began in 1948 with the establishment of the United Nations Truce

Supervision Organisation (UNTSO) in the Middle East to monitor ceasefires.

2. Initially, peacekeeping missions were unarmed and focused on observation and mediation.
3. During the Cold War, missions remained limited due to geopolitical tensions, but the end of the Cold War in the 1990s saw a significant expansion in both the number and scope of peacekeeping operations.

Which of the statements given above are correct?

- (a) 1 and 2 only (b) 2 and 3 only
(c) 1, 2 and 3 (d) 1 and 3 only

89. Which England Test captain announced his retirement from international cricket after the conclusion of the third Test match against New Zealand at Trent Bridge?

- (a) Joe Root (b) Ben Stokes
(c) Jos Buttler (d) Harry Brook

90. Match List-I (Air Exercise) with List-II (Participating Countries) and select the correct option.

List-I (Air Exercise)	List-II (Participating Countries)
(A) Exercise Veer Guardian	(I) India and Japan
(B) Exercise Desert Knight	(II) India, France and UAE
(C) Exercise Vayu Shakti	(III) Domestic
(D) Exercise PASSEX	(IV) India, France

- (a) A-I, B-II, C-III, D-IV (b) A-III, B-II, C-IV, D-I
(c) A-III, B-IV, C-II, D-I (d) A-IV, B-III, C-I, D-II

91. Consider the following statements about the Champaran Satyagraha – 1917.

1. Rajendra Prasad persuaded Gandhiji to study the conditions of the Indigo Plantation workers in Champaran, a district in Bihar.
2. The system prevalent in the Indigo Plantations was the Tinkathia System. In this system, peasants were required to cultivate indigo on 3/20 of their landholdings.

Which of the above given statements is/are correct?

- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

92. Which of the following statements is correct related to the Constitution (106th Amendment) Act, 2023?

- (a) Provision for the reservation of seats for women in the Lok Sabha and the Rajya Sabha has been made vide the 106th Amendment of the Constitution.
- (b) There are provisions for the reservation of seats for women in the Legislative Assemblies and Legislative Councils of the States.
- (c) The bill has been passed by the Parliament in India to provide one-third reservation for women in the Lok Sabha, State Assemblies and the Legislative Assembly of Delhi.
- (d) The bill will be implemented before the delimitation is conducted.

93. In which of the following months is the Indian Air Force expected to receive the first indigenously manufactured C295 transport aircraft in 2026?

- (a) July (b) August
(c) October (d) September

94. International Yoga Day is observed every year on June 21. In 2026, people across the world will celebrate this day to promote the physical, mental and emotional benefits of yoga.

Which theme was selected for International Day of Yoga 2026?

- (a) Yoga for Healthy Ageing
(b) Yoga for International Peace
(c) Yoga for Mental Peace
(d) Yoga for Physical Fitness

95. Which of the following countries approved a sustainment support package worth US\$482.2 million for India's AH-64E Apache attack helicopters and M777A2 ultra-light howitzers in June 2026?

- (a) United States (b) France
(c) Russia (d) Israel

96. Which of the following Indian peacekeepers have been selected to receive the Dag Hammarskjöld Medal posthumously in 2026 for their distinguished service under United Nations peacekeeping operations?

- (a) Harbhajan Singh and Sujit Kumar Pradhan
(b) Santosh Yadav and Anil Chauhan
(c) Rajesh Kumar and Sandeep Unnikrishnan
(d) Vijay Kumar and Mohan Singh

97. The second edition of the Pax Silica Summit was organised on 25–26 June 2026 in which of the following cities?

- (a) New York (b) Washington, D.C.
(c) Seattle (d) Chicago

98. How many Padma Awards were presented by President Droupadi Murmu during the second Civil Investiture Ceremony held on 23 June 2026?

- (a) 56 (b) 68
(c) 65 (d) 72

99. **Assertion (A):** The 42nd Constitutional Amendment Act 1976 introduced the concept of Fundamental Duties into the Indian Constitution.

Reason (R): Fundamental Duties were added to promote responsible citizenship and encourage individuals to contribute to national development.

- (a) A is false, but R is true.
(b) Both A and R are true and R is the correct explanation of A.
(c) Both A and R are true, but R is not the correct explanation of A.
(d) A is true, but R is false.

100. In May 2026, the Guinness World Record for creating the tallest underwater human stack was achieved in which of the following Union Territories?

- (a) Lakshadweep
(b) Dadra and Nagar Haveli and Daman and Diu
(c) Andaman and Nicobar Islands
(d) Puducherry

Answer Key

1. (d)	2. (a)	3. (d)	4. (a)	5. (b)	6. (c)	7. (c)	8. (a)	9. (d)	10. (c)

Sample Question Paper-1

(Solution)

SECTION-A | VERBAL ABILITY

1. Option (d) is correct.

Explanation: Clandestine means secret, hidden, or done in a concealed manner. Its opposite should mean open, public, or not hidden.

Overt means open, public, or done without concealment, so it is the correct answer.

A. Surreptitious means done secretly to avoid attention. It is similar in meaning to clandestine.

B. Stealthy means acting quietly and secretly. It is also a synonym of clandestine.

C. Furtive means secretive or attempting to avoid notice. It has a similar meaning to clandestine.

2. Option (a) is correct.

Explanation: The passage explains that museums, theatres and cultural festivals help people maintain the traditions of previous generations.

Preserve means to protect or maintain something in its original form, making it the most suitable word.

(b) Abandon means to leave or give up completely, which is opposite to the context.

(c) Neglect means to fail to care for properly, which does not fit.

(d) Distort means to alter or misrepresent something, which is inappropriate here.

3. Option (d) is correct.

Explanation: Artists create works based on historical events, folklore and everyday life. They draw inspiration from these sources.

Inspiration means creative ideas or motivation. The expression draw inspiration from is a standard English collocation.

(a) Interruption means a break or disturbance, which does not fit.

(b) Hesitation means uncertainty before acting, which is unrelated.

(c) Isolation means being separated from others, which is not appropriate in the context.

4. Option (a) is correct.

Explanation: The passage states that globalisation has made artistic expressions accessible across borders.

Facilitated means made easier or helped to happen, which fits the context.

(b) Obstructed means blocked or prevented, which is the opposite.

(c) Diminished means reduced or weakened, which does not fit.

(d) Concealed means hidden, which is unrelated.

5. Option (b) is correct.

Explanation: The passage suggests that excessive commercialisation may weaken the originality of traditional art forms.

Undermine means to weaken or reduce the effectiveness or value of something, making it the most suitable choice.

(a) Enhance means improve, which is opposite in meaning.

(c) Celebrate means honour or praise, which does not fit the sentence.

(d) Appreciate means recognise the value of, which is not suitable in this context.

6. Option (c) is correct.

Explanation: The passage concludes that governments and cultural organisations should protect both heritage and innovation.

Safeguard means to protect from harm or loss, making it the appropriate word.

(a) Suppress means to stop or restrain, which is opposite in meaning.

(b) Overlook means to ignore, which is inappropriate.

(d) Disregard means to pay no attention to, which does not fit.

7. Option (c) is correct.

Explanation: A Polygamist is a person who has more than one spouse at the same time.

(a) Monogamist is a person who has only one spouse.

(b) Celibate is a person who chooses not to marry or engage in sexual relations.

(d) Bigot is a person who is intolerant of others' beliefs or opinions.

8. Option (a) is correct.

Explanation: The idiom Break the ice means to make people feel comfortable when meeting for the first time by starting a conversation or activity.

(b) To resolve a serious conflict permanently refers to settling disputes, not breaking the ice.

(c) To reveal a closely guarded secret is the meaning of the idiom spill the beans.

(d) To begin an important negotiation formally is unrelated to the idiom.

9. Option (d) is correct.

Explanation: The idiom Go out on a limb means to take a risk by expressing an opinion or supporting something that may not be accepted by others.

(a) To make an unpopular decision after careful planning focuses on planning rather than risk.

(b) To act without considering the consequences of one's actions implies recklessness, which is not the meaning of the idiom.

(c) To defend someone despite strong evidence against them does not express the meaning of the idiom.

10. Option (c) is correct.

Explanation: The subject of the sentence is The rise, which is singular. The phrase together with frequent disruptions in the supply chain is only an additional phrase and does not change the number of the subject.

Therefore, the verb should also be singular: has affected, not have affected.

The corrected sentence is:

The rise in the prices of essential commodities, together with frequent disruptions in the supply chain, has affected consumer confidence.

11. Option (b) is correct.

Explanation: The error is in the expression more preferable. Preferable is already a comparative adjective, meaning more desirable or more suitable. Therefore, using more before preferable is grammatically incorrect.

The correct sentence is:

The committee found the proposal preferable to all the other alternatives presented during the meeting.

(a) The committee found the proposal – Grammatically correct.

(b) more preferable than all the other alternatives – Incorrect because more preferable is redundant and preferable is followed by to, not than.

(c) presented during the meeting – Grammatically correct.

(d) No error – Incorrect because the sentence contains an error.

12. Option (a) is correct.

Explanation: Lugubrious means very sad, gloomy, or expressing sorrow.

Mournful means feeling or expressing sadness, making it the closest synonym.

(b) Boisterous means noisy, energetic and cheerful, which is opposite in meaning.

(c) Transparent means clear or easy to understand, which is unrelated.

(d) Frivolous means not serious or lacking importance, which does not match the meaning.

13. Option (d) is correct.

Explanation: The idiom Add fuel to the fire means to make an already difficult or unpleasant situation even worse.

(a) To ignore an argument completely does not express the meaning of the idiom.

(b) To solve a difficult problem quickly is opposite to the intended meaning.

(c) To begin a new project with enthusiasm is unrelated.

14. Option (c) is correct.

Explanation: An armchair job refers to work that is mainly desk-based and does not require physical labour.

(a) A dangerous job involving physical risk is opposite in meaning.

(b) A job that requires frequent travel is unrelated.

(d) A temporary job with low wages does not describe an armchair job.

15. Option (b) is correct.

Explanation: A Casanova is a man who is famous for having many romantic or love affairs. The term comes from the Italian adventurer Giacomo Casanova, who became known for his numerous romantic relationships.

(a) A person who avoids social gatherings is unrelated.

(c) A highly skilled craftsman has no connection with the word.

(d) A person who is extremely generous is incorrect.

16. Option (c) is correct.

Explanation: A mortuary is a place where dead bodies are kept, especially before burial, cremation, or post-mortem examination.

(a) Observatory is a place used for observing stars or scientific phenomena.

(b) Conservatory is a room or building for growing plants or studying music.

(d) Sanctuary is a place of safety, protection, or worship.

17. Option (a) is correct.

Explanation: Persistence is the noun form of the verb persist. It means the quality of continuing steadily despite difficulties or obstacles.

(b) Persisting is the present participle or gerund form of the verb.

(c) Persistent is an adjective meaning continuing firmly despite difficulties.

(d) Persistive is not the standard noun form and is rarely used in modern English.

18. Option (b) is correct.

Explanation: The sentence describes fake news as something that threatens public trust.

Menace means a serious threat or danger, making it the most suitable word.

(a) Oasis means a pleasant or peaceful place, which is unrelated.

(c) Tribute means an act showing respect or admiration, which does not fit.

(d) Legacy means something handed down from the past, which is inappropriate in the context.

19. Option (d) is correct.

Explanation: The relationship between Scarcity and Abundance is that they are antonyms.

Similarly, Hostile and Friendly are opposite in meaning.

(a) Courage : Bravery are synonyms.

(b) Victory : Triumph are synonyms.

(c) Fragile : Delicate are synonyms.

20. Option (b) is correct.

Explanation: The relationship between Benevolent and Kind is that they are synonyms.

Similarly, Tedious and Boring have nearly the same meaning.

(a) Arrogant : Humble are antonyms.

(c) Fragile : Strong are antonyms.

(d) Ancient : Modern are antonyms.

21. Option (a) is correct.

Explanation: Levitating means rising or remaining suspended in the air without visible support. The closest meaning is floating.

(b) Sinking means moving downward in water or another liquid, which is the opposite.

(c) Crawling means moving slowly on hands and knees or close to the ground, which is unrelated.

(d) Digging means making a hole in the ground, which has no connection with levitating.

22. Option (c) is correct.

Explanation: C. 4 – 2 – 1 – 3

The paragraph should begin by introducing the main topic, which is the importance of water.

Sentence 4 introduces the topic by stating that water is essential for the human body.

Sentence 2 explains the benefits of proper hydration.

Sentence 1 introduces a contrast by stating that many people underestimate the importance of drinking enough water. The word However clearly connects this sentence to the previous positive statements.

Sentence 3 follows naturally because As a result refers to the consequences of underestimating proper hydration, namely dehydration leading to fatigue, headaches and reduced productivity.

(a) 2 – 4 – 3 – 1 is incorrect because it begins with supporting information before introducing the main topic.

(b) 1 – 3 – 4 – 2 is incorrect because the paragraph starts with However, which requires an earlier contrasting idea.

(d) 4 – 1 – 3 – 2 is incorrect because the explanation of hydration benefits should appear before discussing the consequences of dehydration.

23. Option (d) is correct.

Explanation: Meticulous means very careful, precise and attentive to detail.

Careless means not giving sufficient attention or concern, making it the opposite.

(a) Precise means accurate and exact, which is similar in meaning.

(b) Diligent means hard-working and careful, which is also similar.

(c) Thorough means complete and detailed, which is another synonym.

24. Option (b) is correct.

Explanation: Sentence 2 introduces the problem by stating that excessive work-related stress affects health.

Sentence 4 explains that organisations have realised employee well-being directly influences productivity and job satisfaction.

Sentence 1 logically follows because Consequently shows the result of this realisation, namely encouraging a healthy work-life balance.

Sentence 3 concludes the paragraph by describing the initiatives referred to in sentence 1. The words Such initiatives clearly refer to the measures mentioned in the previous sentence.

(a) 4 – 2 – 1 – 3 is incorrect because the realisation of organisations should come after introducing the problem.

(c) 1 – 3 – 2 – 4 is incorrect because it starts with Consequently, which requires a preceding cause.

(d) 2 – 1 – 4 – 3 is incorrect because organisations must first realise the importance of employee well-being before encouraging work-life balance.

25. Option (b) is correct.

Explanation: The passage discusses both the advantages and limitations of Artificial Intelligence. While AI improves efficiency in many fields, excessive dependence may reduce critical thinking, creativity and independent decision-making. The author concludes that AI should assist humans rather than replace them.

(a) The complete replacement of humans by AI is incorrect because the passage clearly opposes this idea.

(c) The history of Artificial Intelligence is incorrect because the passage does not discuss the development or origin of AI.

(d) The disadvantages of modern education is incorrect because education is only one example mentioned in the passage.

26. Option (d) is correct.

Explanation: The passage explicitly states that excessive dependence on AI may gradually weaken creativity, critical thinking and independent decision-making.

(a) Financial stability and communication skills are not discussed.

(b) Interest in scientific research is not mentioned.

(c) Physical strength and memory power are not referred to anywhere in the passage.

27. Option (c) is correct.

Explanation: Statement i is supported because the passage mentions that AI improves efficiency in education, healthcare, business and scientific research.

Statement ii is not supported because the passage clearly states that AI should not completely replace human intelligence.

Statement iii is supported because excessive dependence on AI may weaken analytical skills, creativity and critical thinking.

Statement iv is supported because the passage recommends combining AI with independent human reasoning.

(a) i and ii only is incorrect because statement ii is false.

(b) ii and iii only is incorrect because statement ii is false and statement i is omitted.

(d) i, ii, iii and iv is incorrect because statement ii is not supported by the passage.

28. Option (b) is correct.

Explanation: The passage presents factual information about India's foreign policy, its objectives, principles and international partnerships in a neutral and explanatory manner.

(a) Critical is incorrect because the author does not criticise India's foreign policy.

(c) Emotional is incorrect because the passage is based on facts rather than feelings.

(d) Humorous is incorrect because the passage contains no humour.

29. Option (c) is correct.

Explanation: The passage specifically states that India maintains strategic autonomy by making independent decisions based on its national interests rather than permanently aligning with any single global power.

(a) India participates in several international organisations is supported by the passage.

(b) India's foreign policy is based on peaceful resolution of disputes is directly mentioned.

(d) India strengthens international relations through trade and defence cooperation is also clearly stated.

30. Option (d) is correct.

Explanation: The passage explains India's foreign policy by discussing its objectives, guiding principles, participation in international organisations and approach to global cooperation.

(a) Criticise India's diplomatic strategies is incorrect because the passage is descriptive, not critical.

(b) Compare India's foreign policy with that of neighbouring countries is incorrect because no comparison is made.

(c) Highlight only India's role in humanitarian assistance is incorrect because humanitarian assistance is only one aspect discussed among several others.

SECTION-B | NUMERAL ABILITY

31. Option (c) is correct.

Explanation: We know that ,

$$\text{Mean} = \frac{\text{Sum of observations}}{\text{Number of observations}}$$

Given, Mean = 30, Number of observations = 10.

Therefore, Total sum = $30 \times 10 = 300$.

Sum of known observations,

$$18 + 22 + 25 + 27 + 30 + 30 + 32 + 35 + 38 = 257$$

Let the missing observation be x .

$$\therefore 257 + x = 300$$

$$x = 300 - 257$$

$$x = 43$$

32. Option (c) is correct.

Explanation: For any two numbers, Product of two numbers = HCF $\times$ LCM

Given, Product = 10080, HCF = 24.

Therefore, LCM = $10080 \div 24 = 420$

33. Option (c) is correct.

Explanation: Observe the pattern.

$$14 = (6 \times 2) + 2$$

$$30 = (14 \times 2) + 2$$

$$62 = (30 \times 2) + 2$$

$$126 = (62 \times 2) + 2$$

Thus, Next term

$$= (126 \times 2) + 2 = 252 + 2 = 254$$

34. Option (a) is correct.

Explanation: Total balls = $5 + 4 + 3 = 12$

$$\text{Probability that the first ball is blue} = \frac{4}{12} = \frac{1}{3}$$

After removing one blue ball, Remaining blue balls = 3,

Remaining total balls = 11

$$\text{Probability that the second ball is blue} = \frac{3}{11}$$

$$\text{Required probability} = \left(\frac{1}{3}\right) \times \left(\frac{3}{11}\right) = \frac{1}{11}$$

35. Option (c) is correct.

Explanation: To find the daily work done by A and B.

$$\text{A's one day's work} = \frac{1}{18}$$

$$\text{B's one day's work} = \frac{1}{24}$$

$$\text{Together} = \frac{1}{18} + \frac{1}{24} = \frac{(4+3)}{72} = \frac{7}{72}$$

$$\text{Work completed in 6 days} = 6 \times \frac{7}{72} = \frac{42}{72} = \frac{7}{12}$$

$$\text{Therefore, Remaining work} = 1 - \frac{7}{12} = \frac{5}{12}$$

B alone finishes the remaining work.

$$\text{Time} = \left(\frac{5}{12}\right) \div \left(\frac{1}{24}\right) = \left(\frac{5}{12}\right) \times 24 = 10 \text{ days}$$

36. Option (c) is correct.

Explanation: Let the train's speed be v m/s and its length be L .

$$\text{Walking speed} = 6 \text{ km/h} = \frac{5}{3} \text{ m/s.}$$

Crossing the man:

$$\text{Relative speed} = v - \frac{5}{3}$$

$$\text{Distance covered} = L$$

$$\text{So, } L = \left(\frac{v-5}{3}\right) \times 18 \quad \dots(1)$$

Crossing the platform:

$$\text{Distance covered} = L + 240,$$

$$\text{Time} = 24 \text{ sec}$$

$$\text{Therefore, } L + 240 = 24v \quad \dots(2)$$

Substitute (1) into (2), we have .

$$18\left(\frac{v-5}{3}\right) + 240 = 24v$$

$$18v - 30 + 240 = 24v$$

$$210 = 6v$$

$$v = 35 \text{ m/s}$$

Hence,
$$L = \left(\frac{35-5}{3}\right) \times \left(\frac{100}{3}\right) \times 18$$

$$= 600 \text{ m.}$$

37. Option (b) is correct.

Explanation: Now,

We have, Downstream speed = $\frac{48}{4} = 12 \text{ km/h}$

Now, Upstream speed = $\frac{48}{6} = 8 \text{ km/h}$.

Speed of boat in still water

$$= \frac{(12+8)}{2} = 10 \text{ km/h.}$$

Therefore, correct option is (b).

38. Option (b) is correct.

Explanation: The compound interest relation is:

$$A = P(1+r)^n$$

Given, Amount = ₹13,310,

Rate = 10%,

Time = 2 years

So, Amount = $P(1.10)^2 = 1.21 P$

Therefore, $P = \frac{13310}{1.21} = ₹11,000$

39. Option (c) is correct.

Explanation: We know that Volume of a cylinder = $\pi r^2 h$

Given, Radius = 3.5 m,

Height = 8 m and $\pi = \frac{22}{7}$

$$\text{Volume} = \left(\frac{22}{7}\right) \times (3.5)^2 \times 8 = \left(\frac{22}{7}\right) \times 12.25 \times 8$$

$$= 308 \text{ cubic metres.}$$

Since, 1 cubic metre = 1000 litres.

$$\text{Capacity} = 308 \times 1000 = 308,000 \text{ litres}$$

The correct answer is (c).

40. Option (a) is correct.

Explanation: According to the question, N leaves a remainder of 11 when divided by 18.

Therefore, $N = 18k + 11$, where k is an integer.

Multiply both sides by 5.

$$5N = 5(18k + 11) = 90k + 55$$

Now divide 55 by 18.

$$55 = 18 \times 3 + 1$$

Hence, $5N = 90k + 18 \times 3 + 1 = 18(5k + 3) + 1$

Therefore, the remainder obtained when $5N$ is divided by 18 is 1.

41. Option (a) is correct.

Explanation: Divide 1578 by 21.

Now, $21 \times 75 = 1575$,

$$\text{Remainder} = 1578 - 1575 = 3$$

To make the number exactly divisible, we need to add

$$21 - 3 = 18$$

But 1578 already leaves remainder 3, so adding 18 gives the next multiple:

$$1578 + 18 = 1596 = 21 \times 76.$$

Therefore, the least number to be added is 18.

42. Option (b) is correct.

Explanation: Let the original salary be x . After a 20% increase,

$$\text{Salary} = 1.20x$$

After a 10% decrease,

$$\text{Salary} = 1.20x \times 0.90 = 1.08x$$

Given, $1.08x = 39,600$

Therefore, $x = 39,600 \div 1.08 = ₹36,666.67$

$$\approx ₹36,667$$

43. Option (b) is correct.

Explanation: Let the original population be x .

$$\text{After first year} = 125\% = 1.25x$$

$$\text{After second year} = 1.25x \times 0.80 = x$$

Thus, an increase of 25% followed by a decrease of 20% brings the population back to its original value.

Given, Present population = 60,000

Therefore, Original population = 60,000

44. Option (c) is correct.

Explanation: Let the Cost Price (CP) be ₹ x . The Marked Price (MP) is 25% above CP.

$$\text{MP} = 125\% \text{ of CP} = 1.25x$$

The shopkeeper allows a 10% discount.

$$\text{Selling Price (SP)} = 90\% \text{ of MP} = 0.90 \times 1.25x = 1.125x$$

$$\text{Profit} = \text{SP} - \text{CP} = 1.125x - x = 0.125x$$

Given, Profit = ₹180

Therefore, $0.125x = 180$

$$x = 180 \div 0.125$$

$$x = ₹1,440$$

45. Option (b) is correct.

Explanation: Cost Price = ₹2,400

$$\text{Marked Price} = 120\% \text{ of } 2400 = ₹2,880$$

$$\text{Discount} = 5\% \text{ of } 2880 = ₹144$$

$$\text{Selling Price} = 2880 - 144 = ₹2,736$$

$$\text{Profit} = 2736 - 2400 = ₹336$$

$$\text{Profit \%} = \left(\frac{336}{2400}\right) \times 100 = 14\%$$

46. Option (a) is correct.

Explanation: Let the present ages be $A = 5x$ and $B = 7x$

After 8 years, $\frac{(5x+8)}{(7x+8)} = \frac{7}{9}$

Cross multiply, we have

$$9(5x+8) = 7(7x+8)$$

$$45x + 72 = 49x + 56$$

$$4x = 16$$

$$x = 4$$

Therefore,

$$B = 7 \times 4$$

$$= 28 \text{ years}$$

So, the present age of B is 28 years.

47. Option (a) is correct.

Explanation: Let Boys = $7x$ and Girls = $5x$

After adding 12 girls,

$$\text{Girls} = 5x + 12$$

According to the question,

$$\frac{7x}{(5x + 12)} = \frac{7}{6}$$

Cross multiply,

$$42x = 35x + 84$$

$$7x = 84$$

$$x = 12$$

Therefore,

$$\text{Number of boys} = 7 \times 12 = 84$$

48. Option (c) is correct.

Explanation: Incorrect total marks

$$= 68 \times 12 = 816$$

$$\text{Correct total} = 816 - 54 + 84 = 846$$

$$\text{Correct average} = 846 \div 12 = 70.5$$

49. Option (b) is correct.

Explanation: Total age of first 15 employees

$$= 15 \times 32 = 480$$

Total age of new employees

$$= 5 \times 26 = 130$$

$$\text{Total age} = 480 + 130 = 610$$

$$\text{Total employees} = 20$$

$$\text{Average} = 610 \div 20 = 30.5 \text{ years}$$

50. Option (b) is correct.

Explanation: Since the balls are drawn without replacement, the probability changes after every draw. To solve this problem, we consider all possible arrangements in which exactly two balls are red.

The possible cases are:

1. Red – Red – Non-red (RRN)
2. Red – Non-red – Red (RNR)

3. Non-red – Red – Red (NRR)

There are

- Red balls = 5
- Non-red balls = $4 + 3 = 7$
- Total balls = 12

Case 1: RRN

$$\text{Probability of first red} = \frac{5}{12}$$

$$\text{Probability of second red} = \frac{4}{11}$$

$$\text{Probability of third non-red} = \frac{7}{10}$$

$$\text{Therefore, } P(\text{RRN}) = \frac{5}{12} \times \frac{4}{11} \times \frac{7}{10} = \frac{7}{66}$$

Case 2: RNR

$$\text{Probability of first red} = \frac{5}{12}$$

$$\text{Probability of second non-red} = \frac{7}{11}$$

$$\text{Probability of third red} = \frac{4}{10}$$

$$\text{Therefore, } P(\text{RNR}) = \frac{5}{12} \times \frac{7}{11} \times \frac{4}{10} = \frac{7}{66}$$

Case 3: NRR

$$\text{Probability of first non-red} = \frac{7}{12}$$

$$\text{Probability of second red} = \frac{5}{11}$$

$$\text{Probability of third red} = \frac{4}{10}$$

$$\text{Therefore, } P(\text{NRR}) = \frac{7}{12} \times \frac{5}{11} \times \frac{4}{10} = \frac{7}{66}$$

Step 4: Add all three cases

Using the addition rule for mutually exclusive events,

$$P(\text{Exactly two red}) = \frac{7}{66} + \frac{7}{66} + \frac{7}{66} = \frac{21}{66} = \frac{7}{22}$$

SECTION-C | REASONING & MILITARY APTITUDE

51. Option (d) is correct.

Explanation: The final arrangement:

W will be the amongst who faces O.

52. Option (d) is correct.

Explanation: The correct imbedded figure is shown below:

Hence, the correct answer is option (D).

53. Option (d) is correct.

Explanation:

Close the window → ja pa (la)

window is opened → ma (du) (la)

door is strong → na ta (ma)

So, 'du' is the code for the word 'opened'.

54. Option (d) is correct.

Explanation: Logic: Upper to down row addition
= total Number = 25

$$1^{\text{st}} \text{ Row: } 15 + 4 + 6 = 25$$

$$2^{\text{nd}} \text{ Row: } 6 + 9 + 10 = 25$$

$$3^{\text{rd}} \text{ Row: } 4 + 12 + 9 = 25$$

So, the missing number: 10

55. Option (d) is correct.

Explanation: According to the given information, Path diagram will be:

As per the path diagram, Rout should drive 7 Km towards East in order to reach point A again.

Thus, the correct option is (D) 7 km to the East

56. Option (c) is correct.

Explanation: Given:

$$8 + (6 - 2) \times 8 \div 1 = ?$$

New equation:

$$8 - (6 \times 2) \div 8 + 1 = ?$$

$$8 - 12 \div 8 + 1 = ?$$

$$8 - 1.5 + 1 = ?$$

$$9 - 1.5 = ?$$

$$? = 7.5$$

57. Option (b) is correct.

Explanation: The Mekong rises on the Tibetan Plateau (Tibet). Similarly, the Amazon's main source originates in the Andes within Peru.

58. Option (c) is correct.

Explanation: Given:

$$25 \text{ C } 3 \text{ B } 36 \text{ D } 12 \text{ A } 20 = ?$$

New equation:

$$25 \times 3 - 36 \div 12 + 20 = ?$$

$$25 \times 3 - 3 + 20 = ?$$

$$75 - 3 + 20 = ?$$

$$95 - 3 = ?$$

$$? = 92$$

59. Option (a) is correct.

Explanation: Logic: In option b, c and d points are both side of the line.

In option (a) points are same side of the line.

So, option (a) is odd one out.

60. Option (b) is correct.

Explanation: The mirror image of the given figure as shown below.

Hence, the correct answer is option (B).

61. Option (b) is correct.

Explanation: Logic: Each letter - 6, Each number - 9

$$A - 6 = U, U - 6 = O, O - 6 = I, I - 6 = C$$

$$S - 6 = M, M - 6 = G, G - 6 = A, A - 6 = U$$

$$W - 6 = Q, Q - 6 = K, K - 6 = E, E - 6 = Y$$

Numbers: 90, 81, 72, 63 → next = 54

Hence, the correct answer is CUY54.

62. Option (b) is correct.

Explanation: Jam, Juice and Squash are products, whereas Lemon is a raw fruit.

So, Lemon does not belong the group.

63. Option (a) is correct.

Explanation:

I. She wants children to understand the importance of water.

Yes, this is implicit because calling water a valuable resource conveys its importance.

II. She wants them to understand that water should not be wasted.

Yes, if something is valuable, the implied message is that it should be conserved and not wasted.

So, Both assumptions I and II are implicit.

64. Option (a) is correct.

Explanation: From the given statements Venn diagram will be:

I. Some mittens are clothes. (Not follow, because there is no any relation between mittens and clothes)

II. Some clothes are bibs. (Not follow, because there is no any relation between clothes and bibs)

So, Neither Conclusion (I) nor (II) follows.

65. Option (b) is correct.

Explanation: ISM Dhanbad, NIT Warangal and BHU Varanasi are educational institutions.

CBI is a government investigative agency.

So, CBI is odd one out.

66. Option (b) is correct.

Explanation: Given Time: 2 : 41 PM

Minute hand position

$$\text{Each minute} = 6 \text{ degrees}$$

$$41 \text{ minutes} = 41 \times 6 = 246^\circ$$

Hour hand position

$$\text{Each hour} = 30 \text{ degrees}$$

$$2 \text{ hours} = 2 \times 30 = 60^\circ$$

Plus, it moves as minutes pass:

$$41 \text{ minutes} = 41 \times 0.5 = 20.5^\circ$$

$$\text{Total hour hand position} = 60 + 20.5 = 80.5^\circ$$

Difference between them

$$|246 - 80.5| = 165.5^\circ$$

This is already less than 180° , so it's the smaller angle.

67. Option (d) is correct.

Explanation: Logic:

The series is divided into two parts:

Odd positions form an increasing series with a difference of +3.

Even positions form an increasing series with a difference of +2.

Odd-position terms: 1, 4, 7, 10, x , 16

$$1 + 3 = 4, 4 + 3 = 7,$$

$$7 + 3 = 10,$$

$$10 + 3 = 13, 13 + 3 = 16$$

So, $x = 13$.

Even-position terms: 6, 8, 10, 12, 14, 16

Each term increases by +2, confirming the pattern.

68. Option (d) is correct.

Explanation: Ravi is 49th from the right.

So from the left:

$$105 - 49 + 1 = 57$$

$$\text{Ravi} = 57^{\text{th}} \text{ from the left}$$

$$\text{Shruti} = 38^{\text{th}} \text{ from the left}$$

Distance between them:

$$57 - 38 = 19$$

Number of students between them

$$= 19 - 1 = 18$$

So, 18 people stand between Ravi and Shruti.

69. Option (c) is correct.

Explanation: From the diagram, Rose circle includes:

$$\text{Only Rose} = 35$$

$$\text{Rose and Lotus} = 9$$

$$\text{Rose and Sunflower} = 12$$

All three

$$(\text{Rose} + \text{Lotus} + \text{Sunflower}) = 6$$

$$\text{Total with Rose} = 35 + 9 + 12 + 6 = 62$$

70. Option (a) is correct.

Explanation:

This is a direct cause-effect relationship. Rays come from the Sun. But cannot relate Ocean with either sun or ray.

71. Option (c) is correct.

Explanation: The final arrangement:

Position	Box
7	E
6	B

Position	Box
5	W
4	F
3	D
2	G
1	C

Four boxes are kept between E and G.

72. Option (b) is correct.

Explanation: The completion of missing figure is shown below:

Hence, the correct answer is (A).

73. Option (c) is correct.

Explanation:

Hence, the correct answer is (C).

74. Option (c) is correct.

Explanation: According to the given information, Family tree diagram will be:

As per the diagram, D is the Wife's father's mother of T.

75. Option (c) is correct.

Explanation: Logic:

Code = Sum of the alphabetical positions of the letters $\times 2 + 8$

HINDI $\rightarrow 96$

$$H = 8, I = 9, N = 14, D = 4, I = 9$$

$$\text{Sum: } 8 + 9 + 14 + 4 + 9 = 44$$

$$\text{Code: } 44 \times 2 + 8 = 96$$

FRENCH $\rightarrow 116$

$$F = 6, R = 18, E = 5, N = 14,$$

$$C = 3, H = 8$$

$$\text{Sum: } 6 + 18 + 5 + 14 + 3 + 8 = 54$$

$$\text{Code: } 54 \times 2 + 8 = 116$$

Similarly,

ARABIC $\rightarrow ?$

$$A = 1, R = 18, A = 1, B = 2,$$

$$I = 9, C = 3$$

$$\text{Sum: } 1 + 18 + 1 + 2 + 9 + 3 = 34$$

$$\text{Code: } 34 \times 2 + 8 = 76.$$

So, ARABIC $\rightarrow 76$

SECTION-D | GENERAL KNOWLEDGE

76. Option (c) is correct.

Explanation: Air Chief Marshal AP Singh took over as the 28th Chief of the Air Staff. He was commissioned into the IAF's fighter stream on December 21, 1984. He is a highly qualified alumnus of elite military institutions: the National Defence Academy (NDA), the Defence Services Staff College (DSSC) Wellington and the National Defence College (NDC) New Delhi. Hence, both statements are correct.

77. Option (c) is correct.

Explanation: The dance referred to is the Nongkrem Dance (Ka Pomblang Nongkrem), a major five-day thanksgiving festival celebrated annually in autumn at Smit, Meghalaya. The Khasis represent one of the prominent matrilineal societies in Northeast India. The festival is performed to appease the almighty goddess Ka Blei Synshar for a bountiful harvest, peace and prosperity for the community.

78. Option (b) is correct.

Explanation: Agnikul Cosmos, an IIT Madras-incubated space startup, signed an MoU with Finland's ICEYE. The collaboration focuses on building, launching and operating advanced Synthetic Aperture Radar (SAR) Earth observation satellites from India. The integration will utilise Agnikul's customised launch capabilities, particularly their 3D-printed rocket engine tech, to place high-resolution imaging satellites into precise orbits efficiently.

79. Option (d) is correct.

Explanation: Air Marshal P. V. Shivanand assumed charge as the Air Officer Commanding-in-Chief (AOC-in-C) of the South Western Air Command (SWAC) of the Indian Air Force on 1 July 2026. He succeeded Air Marshal Tejinder Singh, who was appointed as the Chief of Integrated Defence Staff to the Chairman Chiefs of Staff Committee (CISC) on the same day.

80. Option (a) is correct.

Explanation: The butterfly stroke is an official swimming style characterised by a simultaneous overhead arm stroke paired with a symmetrical, continuous 'dolphin kick.' Developed in the 1930s as a variation of the breaststroke before becoming an independent Olympic event in 1956, it is widely considered one of the most physically demanding and rhythm-heavy strokes in competitive aquatics.

81. Option (b) is correct.

Explanation: Surha Tal Wetland in Ballia district, Uttar Pradesh, was designated as India's 100th Ramsar Site in 2025, recognising its international ecological importance. The wetland supports diverse aquatic biodiversity, including migratory birds, fish and amphibians and plays a crucial role in flood control, groundwater recharge and maintaining ecological balance. Its Ramsar recognition highlights India's commitment to wetland conservation and sustainable management.

82. Option (b) is correct.

Explanation: The Battle of Midway was a decisive naval battle fought between the United States and Japan during

World War II in June 1942. It marked a major turning point in the Pacific War as the U.S. Navy destroyed four Japanese aircraft carriers, significantly weakening Japan's naval strength. The victory shifted the strategic balance in favour of the Allies.

83. Option (b) is correct.

Explanation: The epiglottis is a thin, elastic cartilaginous flap located at the entrance of the larynx. During swallowing, it folds over the glottis, preventing food and liquids from entering the trachea and directing them into the oesophagus. This protective mechanism helps prevent choking and aspiration while ensuring that the respiratory and digestive systems function properly.

84. Option (a) is correct.

Explanation: The Philippines assumed the ASEAN Chairmanship for 2026 under the theme 'Navigating Our Future, Together.' The theme emphasises regional unity, resilience, sustainable development, economic cooperation and collective action in addressing emerging geopolitical, security and climate-related challenges. It reflects ASEAN's commitment to strengthening cooperation among member states while promoting peace, stability and inclusive growth.

85. Option (a) is correct.

Explanation: The Small Industries Development Bank of India (SIDBI) was established on 2 April 1990 under an Act of Parliament as a wholly owned subsidiary of IDBI. SIDBI serves as the principal financial institution for promoting, financing and developing the Micro, Small and Medium Enterprises (MSME) sector by providing credit, refinancing and support for entrepreneurship and innovation.

86. Option (d) is correct.

Explanation: The region lying between the Tropic of Cancer (23½° N) and the Tropic of Capricorn (23½° S) is called the Torrid Zone. In this zone, the Sun's rays fall vertically at least once every year, resulting in maximum solar energy and higher temperatures throughout the year. Therefore, it is the hottest climatic zone on Earth.

87. Option (a) is correct.

The continental shelf is the gently sloping, submerged extension of a continent beneath shallow seas and gulfs. It usually extends up to about 200 metres in depth before dropping sharply into the continental slope. Continental shelves are rich in marine biodiversity and valuable natural resources such as petroleum, natural gas and fisheries, making them economically significant.

88. Option (c) is correct.

Explanation: All three statements regarding the history of United Nations Peacekeeping are correct. UN peacekeeping began in 1948 with the establishment of UNTSO in the Middle East. Early missions were largely unarmed and focused on observation and mediation. After the Cold War ended, peacekeeping operations expanded significantly in both number and scope, including peacebuilding, civilian protection and humanitarian assistance.

89. Option (b) is correct.

Explanation: Ben Stokes, England's Test captain, announced his retirement from international cricket after the third Test against New Zealand at Trent Bridge. Stokes is regarded as one of England's finest all-rounders and has played a pivotal role in several memorable victories, including the 2019 Cricket World Cup and the Ashes. His leadership significantly influenced England's aggressive 'Bazball' approach in Test cricket.

90. Option (a) is correct.

Explanation: The correct matching is: Exercise Veer Guardian – India and Japan, Exercise Desert Knight – India, France and UAE, Exercise Vayu Shakti – Domestic and Exercise PASSEX – India and France. These military exercises strengthen operational readiness, interoperability and defence cooperation among participating nations while enhancing strategic partnerships and improving joint operational capabilities in different domains.

91. Option (b) is correct.

Explanation: Only Statement 2 is correct. The Champaran Satyagraha (1917) opposed the exploitative Tinkathia System, under which peasants had to cultivate indigo on 3/20th of their land. However, it was Raj Kumar Shukla, not Rajendra Prasad, who persuaded Mahatma Gandhi to visit Champaran and investigate the grievances of indigo cultivators.

92. Option (c) is correct.

Explanation: The Constitution (106th Amendment) Act, 2023, also known as the Nari Shakti Vandan Adhiniyam, provides one-third reservation for women in the Lok Sabha, State Legislative Assemblies and the Legislative Assembly of Delhi. The reservation will come into effect after the next census and subsequent delimitation exercise, aiming to enhance women's political representation in India.

93. Option (d) is correct.

Explanation: The Indian Air Force is expected to receive the first indigenously manufactured C295 transport aircraft in September 2026. Manufactured by Tata Advanced Systems in collaboration with Airbus, the aircraft supports the Make in India initiative and will modernise the IAF's tactical airlift capability by replacing the ageing Avro fleet with advanced transport aircraft.

94. Option (a) is correct.

Explanation: The theme for the International Day of Yoga 2026 is 'Yoga for Healthy Ageing.' The theme emphasises the role of yoga in promoting physical fitness, mental well-being, emotional balance and healthy ageing. Observed annually on 21 June, International Yoga Day encourages people worldwide to adopt yoga as a holistic lifestyle for better health and overall well-being.

95. Option (a) is correct.

Explanation: In June 2026, the United States approved a US\$482.2 million sustainment support package for India's

AH-64E Apache attack helicopters and M777A2 ultra-light howitzers. The package includes maintenance, spare parts, logistics and technical support to improve operational readiness and strengthen defence cooperation under the growing India-US strategic partnership.

96. Option (a) is correct.

Explanation: The Dag Hammarskjöld Medal is a prestigious United Nations honour awarded posthumously to peacekeepers who lose their lives while serving in UN peacekeeping missions. In 2026, Harbhajan Singh and Sujit Kumar Pradhan of India were selected for this honour in recognition of their distinguished service, courage and sacrifice in maintaining international peace and security under United Nations peacekeeping operations.

97. Option (b) is correct.

Explanation: The second edition of the Pax Silica Summit was held on 25–26 June 2026 in Washington, D.C., USA. The summit brought together policymakers, industry leaders, technology experts and strategic thinkers to discuss global semiconductor supply chains, technological innovation, digital resilience and international cooperation in the semiconductor ecosystem. It highlighted the growing strategic importance of semiconductor technologies worldwide.

98. Option (c) is correct.

Explanation: During the second Civil Investiture Ceremony held on 23 June 2026, President Droupadi Murmu presented 65 Padma Awards at Rashtrapati Bhavan. The Padma Awards—comprising Padma Vibhushan, Padma Bhushan and Padma Shri—are among India's highest civilian honours, recognising distinguished contributions in fields such as art, literature, education, science, medicine, public affairs, social work and sports.

99. Option (b) is correct.

Explanation: The 42nd Constitutional Amendment Act, 1976 introduced Fundamental Duties into the Constitution by adding Part IVA (Article 51A). The amendment was based on the recommendations of the Swaran Singh Committee. Fundamental Duties were incorporated to promote responsible citizenship, strengthen national unity, protect public property, preserve the environment and encourage citizens to actively contribute to the nation's development. Therefore, both the Assertion and Reason are true and the Reason correctly explains the Assertion.

100. Option (c) is correct.

Explanation: In May 2026, the Andaman and Nicobar Islands achieved a Guinness World Record for creating the tallest underwater human stack. The feat was accomplished by trained scuba divers as part of an initiative to promote adventure tourism, marine conservation and awareness of the region's rich underwater biodiversity. The achievement also showcased India's growing capabilities in underwater sports and eco-tourism.

Sample Question Paper-2

Total Question: 100

Maximum Marks: 300

Instructions

- Total Number of Questions – 100. This Paper is divided in four sections.
 - SECTION-A | VERBAL ABILITY — 30 Questions
 - SECTION-B | NUMERAL ABILITY — 20 Questions
 - SECTION-C | REASONING & MILITARY APTITUDE — 25 Questions
 - SECTION-D | GENERAL KNOWLEDGE — 25 Questions
- Each Question carries of three marks. One mark is deducted for every wrong answer.
- No mark is awarded/deducted for un-attempted questions.

SECTION-A | VERBAL ABILITY

- Choose the word which is nearly opposite in meaning to the given word:
'CANDID'
(a) Frank (b) Evasive
(c) Sweet (d) Intelligent
- Fill in the blank by selecting the most appropriate word for each blank from the given options.
The ecological equilibrium of fragile forest ecosystems has been severely (2) _____ by decades of unplanned logging. Scientists emphasize that old-growth forests are not merely groups of trees; instead, they serve as an (3) _____ shield protecting local waterways and diverse wildlife habitats. Because global weather patterns rely heavily on these dense canopies to absorb carbon dioxide, keeping these ancient forests intact is (4) _____ to combating climate change. Consequently, conservation groups are working tirelessly to (5) _____ illegal logging operations before they can clear more protected land. Ultimately, establishing strict, enforceable forest reserves is a basic (6) _____ for preserving global biodiversity.
Questions with multiple options
- Fill in the blank by selecting the most suitable option.
(2)
(a) ignored (b) disrupted
(c) preserved (d) assisted
- Select the most appropriate option to fill in blank (3).
(a) optional (b) useless
(c) indispensable (d) temporary
- Fill in the blank with the option that makes the most sense. (4)
(a) harmful (b) vital
(c) minor (d) useless
- Select the most appropriate option to fill in blank (5).
(a) encourage (b) support
(c) halt (d) ignore
- Fill in the blank by selecting the option that is most appropriate.(6)
(a) luxury (b) necessity
(c) distraction (d) choice
- Choose the option which best expresses the meaning of the idiom/phrase given below:
'A wolf in sheep's clothing'
(a) A shy person who is forced to lead a large group
(b) A dangerous person pretending to be completely harmless
(c) A person who doesn't dress appropriately for formal occasions
(d) A weak person who suddenly shows a lot of bravery
- Choose the option which best expresses the meaning of the idiom/phrase given below:
"Spill the beans"
(a) To make a terrible mess while cooking
(b) To waste valuable resources on a project that doesn't matter
(c) To reveal confidential information too soon
(d) To show intense rage during an argument
- In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
A person who believes that God or a higher power does not exist
(a) Atheist (b) Monotheist
(c) Polytheist (d) Prophet
- Choose the word which is nearly opposite in meaning to the given word:
'EPHEMERAL'
(a) Fleeting (b) Permanent
(c) Beautiful (d) Mysterious

11. In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
A person who knows and uses several languages fluently
(a) Novice (b) Extrovert
(c) Hypocrite (d) Polyglot
12. What is the synonym for the word Mitigate'.
(a) Aggravate (b) Intensify
(c) Alleviate (d) Terminate
13. Select the most appropriate word for the given group of words.
A person who does not care at all about pleasure or pain.
(a) Negative (b) Ascetic
(c) Stoic (d) Classical
14. Choose the word that best defines the given phrases:
"To burn the candle at both ends"
(a) To engage in reckless financial speculation
(b) To work exhaustively from early morning until late at night
(c) To simultaneously hold two opposing perspectives
(d) To exhibit sudden feats of tremendous bravery
15. In the following question, a part of the sentence may have errors. Find out which part of the sentence has an error and select the appropriate option. If a sentence is free from error, select 'No Error'.
The project manager explained (A) / that the team had encountered (B) / many troubles during the execution phase. (C) / No error (D)
(a) A (b) B (c) C (d) D
16. In the following question, a part of the sentence may have errors. Find out which part of the sentence has an error and select the appropriate option. If a sentence is free from error, select 'No Error'.
Although he loves the ocean, (A) / Rohan is fearing deep water (B) / due to a childhood accident. (C) / No error (D)
(a) A (b) B (c) C (d) D
17. Select the most appropriate word for the given group of words.
A group of owls gathering or resting together.
(a) Parliament (b) Murder
(c) School (d) Pod
18. Choose the most appropriate answer and fill in the blanks.
The noun form of the verb 'destroy' is
(a) destruction (b) destroying
(c) destruction (d) destructed
19. Fill in the blanks with the idioms/phrases out of the given options.
The detectives decided to call it a after searching the entire crime scene without finding any clues.
(a) Night (b) Day
(c) Break (d) Halt
20. Fill in the blank with the most appropriate choice:
The sudden collapse of the regional bank cast a bleak over the country's upcoming economic recovery.
(a) Silhouette (b) Shadow
(c) Beacon (d) Sanctuary
21. In the following question, there is a related pair of words given. Each pair is followed by four other pairs of words. Choose the pair from the given option that best expresses the relationship like the original pair.
Ephemeral : Perpetual
(a) Ephemeral : Transient (b) Lucid : Confusing
(c) Wealthy : Affluent (d) Courageous : Valiant
22. In the following question, there is a related pair of words given. Each pair is followed by four other pairs of words. Choose the pair from the given option that best expresses the relationship like the original pair.
Transient : Permanent
(a) Oblivious : Aware (b) Audacious : Bold
(c) Intrepid : Fearless (d) Parsimonious : Stingy
23. Parts of a sentence are given below in jumbled order. Select the option that arranges the parts in the correct order to form a meaningful sentence.
(A) the brilliant young software architect
(B) designed a highly secure digital payment gateway
(C) working in isolation for over six months
(D) to eliminate fraudulent online transactions
(a) (A), (C), (B), (D) (b) (C), (B), (A), (D)
(c) (A), (B), (D), (C) (d) (C), (A), (B), (D)
24. Parts of a sentence are given below in jumbled order. Select the option that arranges the parts in the correct order to form a meaningful sentence.
(A) managed to secure the critical funding
(B) despite facing numerous administrative hurdles
(C) the determined group of environmental activists
(D) needed to launch the wildlife conservation project
(a) (A), (D), (B), (C) (b) (B), (C), (A), (D)
(c) (C), (A), (B), (D) (d) (B), (A), (D), (C)
- Direction (25-27):** Read the passage carefully and answer the questions given below:
- Implementing stringent road safety measures is a vital public necessity, requiring a combination of advanced infrastructural design, strict legal enforcement, and consistent civic awareness. Millions of commuters, long-haul transport drivers, and pedestrians navigate complex urban networks daily, constantly facing the systemic hazards of high-speed transit. Yet, neglecting standard safety protocols carries devastating consequences; sudden vehicular collisions and poorly managed intersections frequently result in severe casualties and infrastructure damage. The intense cognitive demand of handling high-speed traffic occasionally drives even experienced drivers to mental fatigue and lapses in judgment when driving long distances without rest. Despite these operational

risks, global transport authorities are consistently working to standardize modern safety practices across major transit corridors. By integrating smart traffic management systems, engineering efficient roundabouts, and setting mandatory speed limits, planners have significantly reduced black spots. These updates, combined with public compliance to warning indicators like “road narrows” signs or clear lane markings, actively prevent potential bottlenecks and unexpected collisions, establishing an organized transit system that saves lives.

25. The passage primarily emphasizes:

- (a) The psychological impact of long-distance driving on commuter mental health
- (b) The structural superiority of roundabouts over standard traffic signals
- (c) The multi-faceted approach required to establish effective road safety
- (d) The historical transformation of urban pedestrian pathways

26. According to the text, what factors frequently contribute to severe casualties and infrastructural damage?

- (a) Inefficient alternative fuel sources and rising vehicle costs
- (b) Disregarded safety protocols, sudden collisions, and poorly managed intersections
- (c) Lack of commercial driving licenses among heavy transport workers
- (d) Sudden shifts in atmospheric weather conditions on regional highways

27. How have traffic planners successfully managed to reduce hazardous accidents along major corridors?

- (a) By completely replacing vehicular transit systems with underground railways.
- (b) By isolating long-haul transport drivers from standard civilian routes.
- (c) By ignoring urban bottlenecks to prioritize rural highway systems.
- (d) By utilizing smart systems, structural engineering, and mandatory speed caps.

Direction (28-30): Read the following passage carefully and answer the questions given below it.

Developing a comprehensive water conservation blueprint is an urgent global priority, demanding a synthesis of advanced agricultural technology, strict regulatory policies, and active community participation. Modern metropolitan areas, intensive farming sectors, and industrial complexes consume vast volumes of fresh water daily, continually depleting finite underground aquifers. Yet, failing to implement systematic conservation practices carries catastrophic environmental risks; rapid groundwater depletion and unmonitored industrial discharge frequently result in

severe ecological degradation and acute drinking water shortages. The extreme operational pressure of managing shrinking water reserves occasionally drives regional administrators to bureaucratic inertia and political friction when coordinating distribution across drought-prone territories. Despite these systemic challenges, environmental engineers are consistently deploying innovative conservation systems across vulnerable watersheds. By integrating precision drip irrigation, upgrading wastewater recycling facilities, and mandating rainwater harvesting protocols, planners have drastically reduced regional water deficits. These interventions, paired with public adherence to strict consumption caps, actively stabilize local water tables and prevent structural ecological collapse, securing a sustainable resource network for future generations.

28. The passage primarily highlights:

- (a) The economic impact of industrial wastewater tariffs on local businesses
- (b) The systemic engineering behind urban rainwater storage units
- (c) The integrated strategy required to achieve sustainable water conservation
- (d) The historical transformation of natural river distribution channels

29. According to the text, what are the direct consequences of failing to implement systematic conservation practices?

- (a) Escalating corporate taxation rates and reduced industrial employment
- (b) Rapid groundwater depletion, ecological degradation, and acute water shortages
- (c) Decreased reliance on precision agricultural machinery across farming sectors
- (d) Heightened political disputes regarding international maritime fishing zones

30. How have environmental planners successfully managed to reduce regional water deficits?

- (a) By completely halting industrial production during peak summer months
- (b) By isolating rural farming communities from urban water grids
- (c) By utilizing precision irrigation, recycling upgrades, and mandatory harvesting
- (d) By strictly prioritizing metropolitan areas over agricultural sectors

SECTION-B | NUMERAL ABILITY

31. A positive integer N leaves a remainder of 8 when divided by 17. What is the remainder when $3N^2 + 5N + 2$ is divided by 17?
 (a) 13 (b) 5 (c) 7 (d) 10
32. A student's marks were increased by 20%. Later, due to moderation, they were reduced by 10%. If the final marks are 594, what were the original marks?
 (a) 540 (b) 550 (c) 560 (d) 575
33. A trader marks an article 40% above its cost price. He allows a 10% discount on the marked price and still earns a profit of ₹468. What is the cost price of the article?
 (a) ₹1,600 (b) ₹1,800 (c) ₹2,000 (d) ₹2,100
34. The ratio of the present ages of A and B is 7 : 9. Eight years ago, their ages were in the ratio 5 : 7. Find the present age of B.
 (a) 36 years (b) 45 years (c) 54 years (d) 63 years
35. The average marks of 18 students in a class is 64. Later, it is found that the marks of one student were recorded as 72 instead of 27. What is the correct average of the class?
 (a) 61.5 (b) 62 (c) 62.5 (d) 63
36. The average age of 20 employees is 35 years. If 5 employees, each aged 30 years, leave the company and 5 new employees, each aged 42 years, join the company, what will be the new average age?
 (a) 36 (b) 37 (c) 38 (d) 39
37. A can complete a piece of work in 24 days, B in 30 days, and C in 40 days. They start working together. After 5 days, A leaves the work. After another 6 days, B also leaves. In how many more days will C alone complete the remaining work?
 (a) 4 days (b) 5 days (c) 6 days (d) 8 days
38. A and B together can complete a work in 15 days, while B and C together can complete it in 20 days. A alone can complete the work in 30 days. In how many days can C alone complete the work?
 (a) 40 (b) 50 (c) 60 (d) 75
39. A train crosses a 240 m long platform in 24 seconds and crosses a man walking at 6 km/h in the same direction in 18 seconds. Find the speed of the train.
 (a) 108 km/h (b) 114 km/h
 (c) 126 km/h (d) 132 km/h
40. A person travels 360 km. If he had travelled 6 km/h faster, he would have taken 2 hours less. Find his original speed.
 (a) 24 km/h (b) 30 km/h
 (c) 36 km/h (d) 40 km/h
41. Two trains of lengths 180 m and 220 m are moving in opposite directions with speeds 54 km/h and 72 km/h, respectively. How long will they take to completely cross each other?
 (a) 10 s (b) 11.4 s (c) 12 s (d) 14 s
42. A boat covers 60 km downstream in 4 hours and returns upstream in 6 hours. Find the speed of the stream.
 (a) 2 km/h (b) 2.5 km/h (c) 3 km/h (d) 4 km/h
43. A boat travels 48 km downstream and then returns to the starting point. The speed of the boat in still water is 14 km/h, while the speed of the stream is 2 km/h. Find the total time taken.
 (a) 6 h (b) 6 h 30 min
 (c) 7 h (d) 7 h 15 min
44. A boat can travel 36 km downstream in the same time in which it travels 24 km upstream. If the speed of the stream is 3 km/h, find the speed of the boat in still water.
 (a) 9 km/h (b) 12 km/h (c) 15 km/h (d) 18 km/h
45. A sum of money amounts to ₹15,972 in 2 years at 10% per annum, compounded annually. Find the principal.
 (a) ₹13,000 (b) ₹13,200 (c) ₹13,500 (d) ₹14,000
46. A sum of money becomes ₹8,820 in 2 years and ₹9,702 in 3 years at compound interest. Find the annual rate of interest.
 (a) 8% (b) 10% (c) 12% (d) 15%
47. A cylindrical water tank has an internal radius of 7 m and a height of 10 m.
 Find its capacity in litres. (Take $\pi = \frac{22}{7}$)
 (a) 15,40,000 litres (b) 15,00,000 litres
 (c) 14,80,000 litres (d) 16,00,000 litres
48. The mean of 12 observations is 48. If one observation 72 is replaced by 96, then the new mean is
 (a) 49 (b) 50 (c) 51 (d) 52
49. The average marks of 15 students is 62. If the marks of one student were incorrectly entered as 84 instead of 48, what is the correct average?
 (a) 59.6 (b) 60.2 (c) 61.4 (d) 62
50. The average of 25 numbers is 56. The average of the first 12 numbers is 52, and the average of the last 12 numbers is 60. Find the 13th number.
 (a) 56 (b) 60 (c) 64 (d) 68

SECTION-C | REASONING & MILITARY APTITUDE

51. Select the option that can replace the question mark (?) in the given figure and complete the pattern (rotation is NOT allowed).

52. Two statements labelled as Assertion A and Reason R are given. Read both the statements carefully and select the correct answer with the help of the codes.

Assertion (A): We celebrate Republic Day on 26th January every year.

Reason (R): India became free from British rule on 26th January, 1947.

- (a) A is false, but R is true.
 (b) A is true, but R is false.
 (c) Both A and R are true and R is the correct explanation of A.
 (d) Both A and R are true, but R is not the correct explanation of A.
53. BSWK is related to GXTH in a certain way based on the English alphabetical order. In the same way, LCCE is related to QHNB. To which of the given options is VMKY related, following the same logic?
 (a) AQIW (b) BSGV (c) ARHV (d) ZRFU
54. Select the correct mirror image of the given.

55. A, B, C, D, E, F and G are sitting around a circular table facing the centre. B sits second to the right of A. G sits second to the right of B. C is the immediate neighbour of E and G. D sits second to the right of E.

How many people sit between F and E when counted from the left of E?

- (a) Five (b) Three (c) Four (d) Two
56. It was Friday on 2nd February 2007. What was the day of the week on 2nd February 2008?
 (a) Thursday (b) Friday
 (c) Saturday (d) Sunday

57. Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follows from the statements.

Statements:

All oranges are apples.

All apples are grapes.

Conclusions:

I. Some apples are oranges.

II. All grapes are oranges.

- (a) Only conclusion I follows.
 (b) Both conclusions I and II follow.
 (c) Neither conclusion I nor II follows.
 (d) Only conclusion II follows.
58. In a certain code language, "WATER" is written as "YVDTH" and "GRASS" is written as "OEWF". How will "PLANT" be written in that language?
 (a) FKWK (b) FKWF (c) FKEF (d) FKWL

59. Identify the odd pair:

(a) 11 – 19 (b) 27 – 35 (c) 13 – 23 (d) 17 – 29

60. Read the given statement(s) and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statement(s).

Statements:

All bikes are cars

Some cars are bicycles

All bicycles are trucks

Conclusions:

I. Some trucks are cars

II. All bikes are bicycles

- (a) Both conclusions I and II follow.
 (b) Only conclusion II follows.
 (c) Neither conclusion I nor conclusion II follows.
 (d) Only conclusion I follows.
61. Rani said, "The man in the photo is my mother's son-in-law." Who is the man to Rani?
 (a) Husband (b) Father (c) Uncle (d) Cousin
62. Seven boxes A, B, C, D, E, F and G are kept one over the other but not necessarily in the same order. Only

two boxes are kept between G and A. Only F is kept above B. No box is kept below A. E is kept at some place below C but at some place above D. How many boxes are kept between D and F?

- (a) One (b) Three (c) Two (d) Four

63. Select the option that is related to the third term in the same way as the second term is related to the first term.

Pediatrics : children :: neurology : ?

- (a) heart (b) brain (c) eyes (d) veins

64. What should come in place of the question mark ? in the given series?

1500, 3005, 6015, 12035, 24075, ?

- (a) 48015 (b) 48155 (c) 48200 (d) 48105

65. If '+' means 'subtraction', '-' means 'multiplication', '×' means 'division' and '÷' means 'addition', then what will come in place of the question mark (?) in the following equation?

$$109 \div 76 \times 4 - 5 + 18 = ?$$

- (a) 189 (b) 186 (c) 201 (d) 191

66. Choose the best suitable Venn diagram for the following words Capsicum, Mat, Rat.

67. Select the option in which the given figure (X) is embedded (rotation is NOT allowed).

68. Select the option that is related to the third term in the same way as the second term is related to the first term and the sixth term is related to the fifth term.

$$21 : 70 :: 13 : ? :: 19 : 64$$

- (a) 46 (b) 58 (c) 50 (d) 52

69. Which of the option figures bears the closest resemblance to the question figure?

Question Figure:

Option Figures:

- (a) A (b) C (c) B (d) D

70. Find the wrong term in the following number series:

128, 130, 134, 142, 156, 190

- (a) 134 (b) 156 (c) 142 (d) 190

71. Based on the English alphabetical order, three of the following four letter-clusters are alike in a certain way and thus form a group. Which letter-cluster DOES NOT belong to that group?

(Note: The odd one out is not based on the number of consonants/vowels or their position in the letter-cluster.)

- (a) LHK (b) OKM (c) UQT (d) RNQ

72. If WAIT is coded as 231920 then what will be the code for RUN?

- (a) 182014 (b) 192114 (c) 182115 (d) 182114

73. Seven people G, H, I, K, L, M and S are sitting in a row, facing north. Only three people sit between I and S. M sits to the immediate left of S. No one sits to the right of H. Only two people sit between H and M. K sits to the immediate right of L. How many people sit between G and K?

- (a) One (b) Three (c) Four (d) Two

74. Select the letter-cluster from among the given options that can replace the question mark (?) in the following series.

MIN, NJM, OKL, PLK, ?

- (a) QWS (b) HGF (c) QMJ (d) UJH

75. Find the minimum number of straight lines required to make the given figure.

- (a) 16 (b) 17 (c) 18 (d) 19

SECTION-D | GENERAL KNOWLEDGE

76. With reference to Air Marshal PV Shivanand, consider the following statements:
1. He assumed charge as the Air Officer Commanding-in-Chief (AOC-in-C) of the South Western Air Command on 1st July 2026.
 2. He succeeded Air Marshal Tejinder Singh, who took over as the Chief of Integrated Defence Staff to the Chairman Chiefs of Staff Committee (CISC).
- Which of the statements given above is/are correct?
- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2
77. This dance is one of the popular traditional folk dances of Southern India. Generally, this dance is associated with the festivals of certain temples in southern India. It is performed in Bhagavati temples in honour of Bhadrakali. This dance is mainly associated with which Indian state?
- (a) Andhra Pradesh (b) TamilNadu
(c) Karnataka (d) Kerala
78. A newly identified pollution-removing bacterium, *Brachybacterium netajii*, was discovered by researchers in the waters of which of the following rivers?
- (a) Ganga (b) Hooghly
(c) Godavari (d) Narmada
79. Which Indian Navy sail training vessel represented the country at the United States International Naval Review (USINR) 250 and the Sail4th 250 commemorative celebrations held in New York?
- (a) INS Tarangini (b) INS Vikrant
(c) INS Sudarshini (d) INS Shardul
80. "Dribbling" is associated with which of the following sports?
- (a) Basketball (b) Boxing
(c) Athletics (d) Wrestling
81. Consider the following statements regarding the Patna Bird Sanctuary:
1. It is located in the Patna district of Bihar.
 2. It is famously known as the smallest protected area in its respective state.
 3. It has been designated as a Ramsar site of international importance.
- Which of the statements given above are correct?
- (a) 1 and 2 only (b) 2 and 3 only
(c) 1 and 3 only (d) 1, 2, and 3
82. The Thirty Years' War, one of the longest and most significant conflicts in European history, lasted between which of the following years?
- (a) 1618–1648 (b) 1620–1640
(c) 1629–1649 (d) 1619–1649
83. Water is absorbed from the soil by the roots of plants through which of the following processes?
- (a) Diffusion (b) Transpiration
(c) Osmosis (d) None of these
84. The 11th BRICS Energy Ministers' Meeting, hosted by India in June 2026, took place in which of the following cities?
- (a) New Delhi (b) Gurugram
(c) Gandhinagar (d) Noida
85. Consider the following statements related to the National Bank for Agriculture & Rural Development (NABARD):
1. It is India's apex development bank, established in 1982 under an Act of Parliament to promote sustainable and equitable agriculture and rural development.
 2. It was established under the able Chairmanship of Shri B. Sivaraman, former Member of the Planning Commission, on 30 March 1979.
- Which of the above statements is/are correct?
- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2
86. Which of the following climates exist between the Tropic of Cancer and Tropic of Capricorn?
- (a) Tropical humid climates
(b) Tropical Wet Climate
(c) Tropical Monsoon
(d) None of the above
87. Which of the following connects the continental shelf and the ocean basins?
- (a) Continental Slope (b) Seamount
(c) Mid-oceanic ridge (d) Guyot
88. With reference to the Financial Action Task Force (FATF), consider the following statements:
1. FATF is the global money laundering and terrorist financing watchdog set up in 1989 out of a G-7 meeting of developed nations in Paris.
 2. Initially, its objective was to examine and develop measures to combat money laundering.
 3. After the 9/11 attacks on the US, the FATF in 2001 expanded its mandate to incorporate efforts to combat terrorist financing.
- Which of the statements given above are correct?
- (a) 1 and 2 only (b) 2 and 3 only
(c) 1, 2 and 3 (d) 1 and 3 only
89. Which team emerged as the champion of the ICC Women's T20 World Cup 2026 after defeating England in the final played at Lord's Cricket Ground?
- (a) Australia (b) New Zealand
(c) India (d) South Africa
90. Consider the following statements about Exercise Pitch Black 2026:
1. Exercise Pitch Black is the Royal Australian Air Force's (RAAF) flagship and largest multinational air combat exercise.
 2. The Indian Air Force (IAF) is expected to participate in the 2026 edition, which is scheduled to be conducted in Australia's Northern Territory.
 3. The exercise is organised exclusively for the four Quad countries—India, Australia, Japan, and the United States—to enhance military cooperation.

- Which of the statements given above is/are correct?
 (a) 1 and 2 only (b) 2 and 3 only
 (c) 1 and 3 only (d) 1, 2 and 3
91. Consider the following statements related to the Ahmedabad Mill Strike (1918):
1. The Ahmedabad Mill Strike of 1918 was a significant labour dispute in Ahmedabad, Gujarat, where textile mill workers clashed with mill owners over wage issues.
 2. This strike is historically notable as the first instance where Mahatma Gandhi employed a hunger strike as a form of satyagraha in India.
- Which of the above given statements is/are correct?
 (a) 1 only (b) 2 only
 (c) Both 1 and 2 (d) Neither 1 nor 2
92. The inclusion of Bodo, Dogri, Maithili, and Santhali in the Eighth Schedule of the Constitution was effected through which of the following Constitutional Amendment Acts?
 (a) 73rd Constitutional Amendment Act, 1992
 (b) 92nd Constitutional Amendment Act, 2003
 (c) 103rd Constitutional Amendment Act, 2018
 (d) 101st Constitutional Amendment Act, 2016
93. India launched which of the following humanitarian relief operations to assist Venezuela in the aftermath of the devastating earthquake?
 (a) Operation Maitri (b) Operation Sahayata
 (c) Operation Karuna (d) Operation Amistad
94. The International Day of Cooperatives 2026 was observed on July 04, 2026. What is the official theme for the year 2026?
 (a) Cooperatives for Sustainable Development
 (b) Cooperatives: Build a Better World
 (c) Cooperatives for a Peaceful World!
 (d) Inclusive Growth through Cooperatives
95. Which of the following states is developing India's first air-filled rubber dam project using technology sourced from South Korea?
 (a) Maharashtra (b) Rajasthan
 (c) Karnataka (d) Gujarat
96. Following its renaming in 2026, the International Booker Prize is now officially known by which of the following names?
 (a) Global Booker Prize
 (b) Bukhman International Booker Prize
 (c) International Literary Excellence Prize
 (d) World Translation Booker Prize
97. Consider the following statements regarding the 16th BRICS National Security Advisers' (NSA) Meeting:
1. The meeting was hosted under India's BRICS Chairmanship in New Delhi.
 2. The summit was led by India's National Security Adviser, Ajit Doval.
 3. The meeting specifically convened the security heads of all 11 BRICS member nations.
- Which of the statements given above are correct?
 (a) 1 and 2 only (b) 2 and 3 only
 (c) 1 and 3 only (d) 1, 2, and 3
98. In July 2026, Prime Minister Narendra Modi was conferred with the 'Bintang Adipurna'. This is the highest civilian award of which country?
 (a) Malaysia (b) Egypt
 (c) Indonesia (d) UAE
99. Consider the following statements regarding the Anti-Defection Law in India:
1. A legislator is deemed to have defected if they voluntarily give up the membership of their political party.
 2. The ultimate power to decide on the disqualification of a member on grounds of defection rests with the President of India.
 3. The decision of the Presiding Officer regarding disqualification is subject to Judicial Review by the Supreme Court.
- Which of the statements given above are correct?
 (a) 1 and 2 only (b) 2 and 3 only
 (c) 1 and 3 only (d) 1, 2, and 3
100. The Sirsa Kinnnow, which recently received the Geographical Indication (GI) tag, became the first GI-recognised fruit of which of the following states?
 (a) Haryana (b) Punjab
 (c) Rajasthan (d) Uttar Pradesh

Answer Key

Sample Question Paper-2

(Solution)

SECTION-A | VERBAL ABILITY

1. Option (b) is correct.

Explanation: ‘Candid means truthful, straightforward, and completely honest. The opposite of being straightforward is being evasive, which means trying to avoid details, hiding the truth, or being indirect.

a) Frank: This is a synonym (has the same meaning) of candid.

c) Sweet & d) Intelligent: These are unrelated to the concept of honesty or directness.

2. Option (b) is correct.

Explanation: The passage highlights the negative effects of unplanned logging on delicate forest ecosystems over several decades. Because logging actively damages natural balances, the missing word must convey a sense of damage or interruption. **Disrupted** perfectly captures this negative physical impact. Choosing “preserved” or “assisted” would incorrectly suggest that logging helps the environment, while “ignored” does not grammatically fit the active physical damage being described in this context.

3. Option (c) is correct.

Explanation: The sentence explains that old-growth forests act as a shield to protect waterways and wildlife. Since a shield is highly crucial for defense, the blank requires an adjective denoting absolute necessity. **Indispensable** means essential and fits this protective context perfectly. In contrast, words like “optional,” “useless,” or “temporary” suggest these forests have little to no value, which contradicts the author’s emphasis on their critical protective role.

4. Option (b) is correct.

Explanation: The passage notes that global weather systems depend heavily on forest canopies to absorb excess carbon dioxide from the air. Therefore, keeping these forests intact is of extreme importance. **Vital** means necessary for survival and fits this high-stakes environmental scenario. Choosing “harmful” would imply forest preservation is bad, while “minor” and “useless” downplay the severe global consequences of carbon accumulation on climate change.

5. Option (c) is correct.

Explanation: The text states that conservation groups are working hard against “illegal logging operations” that threaten protected lands. Naturally, the goal of any environmental group is to stop these destructive, illegal activities. **Halt**, which means to bring to an abrupt stop,

fits the blank perfectly. Options like “encourage” or “support” are logically incorrect as they imply helping the loggers, while “ignore” suggests total inaction.

6. Option (b) is correct.

Explanation: The final sentence argues that protecting forests is a fundamental obligation required to save global biodiversity, rather than a secondary option. This context requires a strong noun that denotes an unavoidable, mandatory obligation. **Necessity** fits both grammatically and contextually. Conversely, words like “luxury,” “distraction,” or “choice” wrongly imply that saving our ecosystems is merely an optional, unimportant indulgence that humans can easily ignore.

7. Option (b) is correct.

Explanation: Originating from ancient moral fables, this famous idiom describes a dangerous or malicious person who intentionally hides their hostile nature behind a gentle, friendly facade to gain trust and deceive unsuspecting people. It warns us that surface appearances can be deeply misleading. Option **b** is the correct choice because it perfectly captures this concept of calculated treachery. The remaining options—discussing a shy leader, poor formal dressing, or an unexpected burst of bravery—are incorrect distractors that completely miss the core theme of a hidden, predatory threat pretending to be harmless.

8. Option (c) is correct.

Explanation: This popular English idiom means to accidentally or intentionally share private information, surprises, or secrets before the proper time. Option **c** is the correct choice because it directly addresses this premature disclosure. The remaining options—such as creating a physical mess in the kitchen, wasting business resources on an unimportant project, or displaying intense rage during a heated argument—are incorrect distractors. They completely fail to reflect the idiom’s true meaning regarding the loss of confidentiality and leaking secrets.

9. Option (a) is correct.

Explanation: A person who holds the explicit belief that God, deities, or any divine higher powers do not exist is known as an **atheist**. This makes option **a** the correct choice. The other options are incorrect theological distractors: a monotheist believes in only one God, a polytheist worships multiple different deities, and a prophet is someone believed to be an inspired teacher or proclaimer of God’s will.

10. Option (b) is correct.

Explanation: 'EPHEMERAL' represents things that are fleeting or last for a very brief time, such as dew in the morning or a shooting star. Therefore, the word nearly opposite in meaning is **Permanent**, which describes something designed to endure indefinitely without changing. While the option *fleeting* is a synonym that shares the same temporary meaning, and words like beautiful or *mysterious* are simply unrelated distractors, only *permanent* provides the true, direct contrast to a short-lived existence.

11. Option (d) is correct.

Explanation: A person who can speak, write, or understand multiple languages with high fluency is known as a **polyglot**. Therefore, option **d** is the correct choice. The remaining alternatives are incorrect distractors: a *novice* is a beginner who lacks experience in a field, an *extrovert* is an outgoing and socially confident person, and a *hypocrite* is someone who pretends to have moral standards they do not actually possess.

12. Option (c) is correct.

Explanation: To Mitigate means to make something less severe, serious, or painful. Therefore, alleviate (option c) is the correct synonym because it also means to make suffering or problems more bearable. The other options are incorrect: *aggravate* and *intensify* are antonyms that mean to make a situation worse or stronger, while *terminate* means to bring something to a complete end. Only option c accurately mirrors this concept of reduction and relief.

13. Option (c) is correct.

Explanation: Option **c (Stoic)** is correct because a stoic remains emotionally indifferent to both physical pleasure and pain, enduring hardships without complaint. In contrast, the other choices are incorrect: a *negative* person simply has a pessimistic outlook on life, an ascetic actively avoids comfort for religious self-denial rather than just being emotionally neutral, and *classical* refers to historical art or music. Only "stoic" describes a person who maintains complete emotional neutrality and calmness in all life situations, matching the definition perfectly.

14. Option (b) is correct.

Explanation: Option **b** is the correct answer because the idiom "to burn the candle at both ends" metaphorically describes a person who severely depletes their energy reserves by waking up early and staying up late to work. Just as a physical candle lit from both sides burns out twice as fast, an individual working these grueling hours quickly faces extreme physical and mental exhaustion. The remaining options serve as incorrect distractors for this phrase, as option **a** describes high-risk financial gambling rather than personal overexertion, option **c** refers to balancing conflicting viewpoints simultaneously, and option **d** describes an unexpected display of courage. Therefore, only option **b** accurately captures the core meaning of relentless overwork in a single concept.

15. Option (c) is correct.

Explanation: The Error in Part C: The word "troubles" is used incorrectly here. In this context, "trouble" functions as an uncountable noun referring to general difficulty or effort, meaning it cannot take the plural "-s" ending or be paired with the modifier "many." To correct this, the sentence should read either "much trouble" or use a countable alternative like "many problems."

Why Parts A & B are correct: Part A correctly uses the simple past tense "explained" to introduce the past reporting context. Part B perfectly applies the past perfect tense "had encountered" to indicate an action that occurred prior to the explanation, maintaining proper sequence of tenses.

16. Option (b) is correct.

Explanation: The Error in Part B: The error lies in the progressive form "is fearing." The verb "fear" is a stative verb that describes an emotional state rather than a continuous physical action. Grammatically, stative verbs cannot be used in continuous tenses and must be expressed in the simple present tense. The segment should be corrected to "Rohan fears deep water."

Why Parts A & C are correct: Part A correctly uses the subordinating conjunction "Although" to set up a contrast, and applies the simple present "loves" for a general truth. Part C is fully accurate, using the correct prepositional phrase "due to" to explain the origin of the phobia.

17. Option (a) is correct.

Explanation: Collective nouns are highly specific to the group of animals being described. A "parliament" is the dedicated collective noun used to identify a group of owls.

18. Option (a) is correct.

Explanation: The correct noun form derived from the verb "destroy" is destruction (option a), which utilizes the standard suffix "-tion" to signify the action or result of destroying. Examining the distractors, "destroying" serves as a continuous verb form or a gerund, "destructured" functions as a past tense verb or participle, and "destructionment" is a non-existent, grammatically incorrect word.

19. Option (b) is correct.

Explanation: The correct choice completes the well-known English idiomatic expression "to call it a day." This phrase means to decide to stop doing an activity, work, or task for the rest of the day because you have done enough or are too tired to continue. While "night" can be used in a similar idiom ("call it a night") specifically for evening activities, "to call it a day" is the standard, primary phrase used for halting a continuous effort like an investigation. The words "break" and "halt" are incorrect distractors because they violate the established, fixed structure of this specific idiomatic phrase.

20. Option (b) is correct.

Explanation: The context of the sentence describes a negative, dampening effect caused by an unfortunate event

("the sudden collapse of the regional bank"). Therefore, the blank requires a word that conveys a sense of gloom or impending trouble. The word "shadow" fits perfectly because "to cast a shadow over" is a standard English collocation meaning to spoil a situation or make it feel sad, uncertain, and grim. The other options are incorrect because they do not fit contextually: a *silhouette* is merely a dark outline of someone or something against a light background, a *beacon* represents a light or sign of hope, and a *sanctuary* refers to a place of safety or holy refuge.

21. Option (b) is correct.

Explanation: The relationship between the original pair, *Ephemeral* (lasting a very short time) and *Perpetual* (never-ending or changing), is one of direct antonyms, or absolute opposites. To solve the analogy, we must find a pair among the options that share this same contrasting relationship. Options a, c, and d are all pairs of synonyms or words with similar meanings (*ephemeral* and *transient* mean fleeting, *wealthy* and *affluent* mean rich, *courageous* and *valiant* mean brave). On the other hand, **b) Lucid : Confusing** is the only pair that consists of true antonyms. Just as *ephemeral* is the opposite of *perpetual*, *lucid* (clear and easy to understand) is the exact opposite of *confusing*, making it the perfect match.

22. Option (a) is correct.

Explanation: The relationship between the original pair, *Transient* (lasting only for a short time) and *Permanent* (lasting indefinitely), is one of direct antonyms, or absolute opposites. To solve the analogy, we must find an option that shares this same contrasting relationship. Options b, c, and d are all pairs of synonyms (*audacious* and *bold* mean daring, *intrepid* and *fearless* mean brave, *parsimonious* and *stingy* mean ungenerous with money). On the other hand, **a) Oblivious : Aware** is the only pair that consists of true antonyms. Just as *transient* is the opposite of *permanent*, being *oblivious* (unmindful or unaware) is the exact opposite of being *aware*, making it the perfect semantic match.

23. Option (d) is correct.

Explanation: The syntactic rules of English sentence construction are flawlessly maintained in this arrangement. The sentence opens with the introductory participial phrase (C) "**working in isolation for over six months,**" which functions as a modifier describing a sustained effort. This opening modifier naturally requires the main subject to follow it immediately, a role fulfilled perfectly by (A) "**the brilliant young software architect.**" The sentence then moves directly into the main action with the active predicate verb phrase (B) "**designed a highly secure digital payment gateway.**" Finally, the sentence reaches a clear, logical conclusion with the infinitive purpose phrase (D) "**to eliminate fraudulent online transactions,**" which details the ultimate goal of the architectural design.

24. Option (b) is correct.

Explanation: This sequence adheres perfectly to standard English syntactic structures to create a logical and cohesive

thought. The sentence begins with the introductory prepositional phrase (B) "**despite facing numerous administrative hurdles,**" which sets up the challenging context and must be followed directly by the main subject it modifies. This subject is immediately provided by (C) "**the determined group of environmental activists.**" The sentence then smoothly transitions into the primary active predicate (A) "**managed to secure the critical funding,**" which states the core action achieved by the activists. Finally, the statement concludes with the passive participial modifier (D) "**needed to launch the wildlife conservation project,**" which specifies the exact purpose of the acquired funding, making the entire sentence grammatically sound.

25. Option (c) is correct.

Explanation: The entire text centers on how road safety is achieved through a combination of engineering, regular enforcement, and civic awareness. While the passage mentions supporting elements like driver fatigue, speed limits, and specific road signs, these details serve strictly to reinforce the primary narrative. The overarching theme remains the comprehensive, multi-faceted strategy required to reduce transit hazards and safely manage global traffic networks.

26. Option (b) is correct.

Explanation: The text explicitly states in the first paragraph that "neglecting standard safety protocols carries devastating consequences," directly pointing out that "sudden vehicular collisions and poorly managed intersections frequently result in severe casualties and infrastructure damage." The other choices introduce external points about fuel, weather, or licenses that are completely absent from the provided text.

27. Option (d) is correct.

Explanation: The final paragraph outlines the direct actions taken by planners to successfully reduce high-risk "black spots." It explicitly notes that they achieved this "by integrating smart traffic management systems, engineering efficient roundabouts, and setting mandatory speed limits." The other options propose dramatic changes or logistical choices that are never stated in the passage.

28. Option (c) is correct.

Explanation: The entire text focuses on how effective water conservation relies on a unified approach involving agricultural technology, policy regulations, and community effort. While the passage mentions specific details like drip irrigation, administrative friction, and recycling facilities, these elements serve strictly as supporting evidence. The primary theme remains the comprehensive, multi-layered strategy essential to protecting finite water resources and ensuring ecological stability.

29. Option (b) is correct.

Explanation: The text explicitly states that failing to execute these systems leads to "catastrophic environmental risks," specifically detailing that "rapid groundwater depletion and unmonitored industrial discharge frequently result in severe ecological degradation and acute drinking water

shortages." The alternative options introduce unrelated financial or international political issues that are not supported by the passage.

30. Option (c) is correct.

Explanation: The final paragraph clearly outlines the precise methods used by planners to mitigate supply

deficits. It explicitly notes that they achieved this "by integrating precision drip irrigation, upgrading wastewater recycling facilities, and mandating rainwater harvesting protocols." The other choices suggest unfair distribution strategies or complete industrial shutdowns that are completely absent from the text.

SECTION-B | NUMERAL ABILITY

31. Option (a) is correct.

Explanation: Given, $N \equiv 8 \pmod{17}$

Therefore, $N^2 \equiv 8^2 = 64$

$64 \div 17$ leaves remainder

$$64 - 51 = 13.$$

Hence, $N^2 \equiv 13 \pmod{17}$

Now, $3N^2 + 5N + 2 \equiv 3 \times 13 + 5 \times 8 + 2$

$$= 39 + 40 + 2 = 81$$

Here, $81 \div 17$

$$= 17 \times 4 = 68$$

$$\text{Remainder} = 13$$

Therefore, the remainder is 13.

32. Option (b) is correct.

Explanation: Let original marks = x

After 20% increase = $1.20x$,

After 10% decrease = $1.20x \times 0.90 = 1.08x$

Given, $1.08x = 594$

$$x = 594 \div 1.08 = 550$$

33. Option (b) is correct.

Explanation: Let the Cost Price (CP) be ₹ x .

Marked Price (MP) = 140% of CP = $1.40x$

Discount = 10%

Selling Price (SP) = 90% of MP = $0.90 \times 1.40x = 1.26x$

Now, Profit = SP - CP = $1.26x - x = 0.26x$

Given, Profit = ₹468

Therefore, $0.26x = 468$

$$x = 468 \div 0.26 = ₹1,800$$

34. Option (a) is correct.

Explanation: Let the present ages be

$$A = 7x, B = 9x$$

Eight years ago,

$$\frac{(7x - 8)}{(9x - 8)} = \frac{5}{7}$$

Now,

$$7(7x - 8) = 5(9x - 8)$$

$$49x - 56 = 45x - 40$$

$$4x = 16$$

$$x = 4$$

Present age of B = $9 \times 4 = 36$ years

35. Option (a) is correct.

Explanation:

Step 1: Calculate the incorrect total marks

$$\text{Average} = 64, \text{Number of students} = 18$$

$$\text{Incorrect total} = 18 \times 64 = 1152$$

Step 2: Correct the total marks

The student's actual marks are 27, but they were recorded as 72.

$$\text{Difference} = 72 - 27 = 45$$

Since the recorded total is 45 more than the actual total, subtract 45.

$$\text{Correct total} = 1152 - 45 = 1107$$

Step 3: Find the correct average

$$\text{Correct Average} = 1107 \div 18 = 61.5$$

Thus, the correct average is 61.5,

36. Option (c) is correct.

Explanation: Initial total age = $20 \times 35 = 700$

Age of employees leaving = $5 \times 30 = 150$

Remaining total = $700 - 150 = 550$

Age of new employees = $5 \times 42 = 210$

New total = $550 + 210 = 760$

New average = $760 \div 20 = 38$

Therefore, correct option is (c).

37. Option (c) is correct.

Explanation:

Step 1: Find the one-day work of each person.

$$A's \text{ one-day work} = \frac{1}{24}$$

$$B's \text{ one-day work} = \frac{1}{30}$$

$$C's \text{ one-day work} = \frac{1}{40}$$

Take the LCM of 24, 30 and 40, which is 120.

Assume the total work = 120 units.

Therefore,

A completes 5 units/day

B completes 4 units/day

C completes 3 units/day

Step 2: Work completed by A, B and C together in the first 5 days.

Combined one-day work = $5 + 4 + 3 = 12$ units/day

Work completed in 5 days = $12 \times 5 = 60$ units

Remaining work = $120 - 60 = 60$ units

Step 3: Work completed by B and C together in the next 6 days.

After A leaves, B + C complete = $4 + 3 = 7$ units/day

Work completed in 6 days = $7 \times 6 = 42$ units

Remaining work = $60 - 42 = 18$ units

Step 4: Work completed by C alone.

C completes = 3 units/day

Time required = Remaining Work

$$\div \text{C's one-day work} \\ = 18 \div 3 = 6 \text{ days}$$

38. Option (c) is correct.

Explanation: Let the total work be 60 units (LCM of 15, 20 and 30).

$$(A + B)\text{'s one day's work} = 60 \div 15 = 4 \text{ units}$$

$$(B + C)\text{'s one day's work} = 60 \div 20 = 3 \text{ units}$$

$$A\text{'s one day's work} = 60 \div 30 = 2 \text{ units}$$

$$\text{Therefore, B's one day's work} = 4 - 2 = 2 \text{ units}$$

$$\text{Now, C's one day's work} = 3 - 2 = 1 \text{ unit}$$

$$\text{Hence, Time taken by C alone} = 60 \div 1 = 60 \text{ days}$$

Therefore, Correct Answer: (C) 60

39. Option (c) is correct.

Explanation: Let the train's length be L m and its speed be V m/s.

$$\text{Walking speed} = 6 \text{ km/h} = \frac{5}{3} \text{ m/s}$$

When crossing the man,

$$L = \left(\frac{V - 5}{3} \right) \times 18 \quad \dots(1)$$

When crossing the platform,

$$L + 240 = 24V$$

Substituting (1) into (2), we have

$$18 \left(\frac{V - 5}{3} \right) + 240 = 24V$$

$$18V - 30 + 240 = 24V$$

$$210 = 6V$$

$$V = 35 \text{ m/s}$$

Convert into km/h,

$$35 \times \frac{18}{5} = 126 \text{ km/h}$$

40. Option (b) is correct.

Explanation: Let the original speed be x km/h.

$$\text{Original time} = \frac{360}{x}$$

$$\text{New time} = \frac{360}{(x + 6)}$$

According to the question,

$$\frac{360}{x} - \frac{360}{(x + 6)} = 2$$

Taking LCM,

$$2160 = 2x(x + 6)$$

$$1080 = x^2 + 6x$$

$$x^2 + 6x - 1080 = 0$$

$$(x - 30)(x + 36) = 0$$

$$x = 30 \text{ km/h}$$

The equation gives 30 km/h.

41. Option (b) is correct.

Explanation: Total distance to be covered

$$= 180 + 220 = 400 \text{ m}$$

$$\text{Relative speed} = 54 + 72 = 126 \text{ km/h}$$

Convert into m/s,

$$126 \times \frac{5}{18} = 35 \text{ m/s}$$

$$\text{Time} = \text{Distance} \div \text{Relative Speed}$$

$$= 400 \div 35 = 11.43$$

$$\text{Seconds} \approx 11.4 \text{ seconds}$$

42. Option (b) is correct.

Explanation: Downstream speed = $60 \div 4 = 15 \text{ km/h}$

$$\text{Upstream speed} = 60 \div 6 = 10 \text{ km/h}$$

$$\text{Speed of stream} = \frac{(15 - 10)}{2} = 2.5 \text{ km/h}$$

43. Option (c) is correct.

Explanation: Downstream speed = $14 + 2 = 16 \text{ km/h}$

$$\text{Time downstream} = 48 \div 16 = 3 \text{ hours}$$

$$\text{Upstream speed} = 14 - 2 = 12 \text{ km/h}$$

$$\text{Time upstream} = 48 \div 12 = 4 \text{ hours}$$

$$\text{Total time} = 3 + 4 = 7 \text{ hours}$$

44. Option (c) is correct.

Explanation: Let the speed of the boat in still water be x km/h.

$$\text{Downstream speed} = x + 3$$

$$\text{Upstream speed} = x - 3$$

Since the times are equal,

$$\frac{36}{(x + 3)} = \frac{24}{(x - 3)}$$

Cross-multiplying,

$$36(x - 3) = 24(x + 3)$$

$$36x - 108 = 24x + 72$$

$$12x = 180$$

$$x = 15 \text{ km/h}$$

45. Option (b) is correct.

Explanation: Given,

$$\text{Amount (A)} = ₹15,972$$

$$\text{Rate (R)} = 10\% \text{ per annum}$$

$$\text{Time (T)} = 2 \text{ years}$$

Using,

$$A = P \left(\frac{1 + R}{100} \right)^T$$

$$15,972 = P \times (1.10)^2$$

$$15,972 = P \times 1.21$$

Therefore,

$$P = 15,972 \div 1.21$$

$$P = ₹13,200$$

46. Option (b) is correct.

Explanation: Amount after 2 years = ₹8,820

Amount after 3 years = ₹9,702

$$\text{Interest earned during the 3rd year} = 9,702 - 8,820 = ₹882$$

Since the third year's interest is calculated on the amount at the end of the second year,

$$\text{Rate} = \left(\frac{882}{8,820} \right) \times 100 \times 100 = 10\%$$

47. Option (a) is correct.

Explanation: We know that Volume of a cylinder = $\pi r^2 h$
Given,

$$\text{Radius} = 7 \text{ m}$$

$$\text{Height} = 10 \text{ m}$$

$$\pi = \frac{22}{7}$$

$$\text{Therefore, Volume} = \left(\frac{22}{7}\right) \times 7 \times 7 \times 10$$

$$= 22 \times 7 \times 10$$

$$= 1540 \text{ m}^3$$

$$\text{Since, } 1 \text{ m}^3 = 1000 \text{ litres}$$

$$\text{Capacity} = 1540 \times 1000$$

$$= 15,40,000 \text{ litres}$$

48. Option (b) is correct.

Explanation:

Step 1: Find the original total.

$$\text{Mean} = 48$$

$$\text{Number of observations} = 12$$

$$\text{Total} = 48 \times 12 = 576$$

Step 2: Correct the total.

$$\text{Old observation} = 72$$

$$\text{New observation} = 96$$

$$\text{Increase} = 24$$

$$\text{Correct total} = 576 + 24 = 600$$

Step 3: Calculate the new mean.

$$\text{New Mean} = 600 \div 12 = 50$$

49. Option (a) is correct.

Explanation:

Step 1: Find the incorrect total marks.

$$\text{Mean} = 62$$

$$\text{Number of students} = 15$$

$$\text{Total} = 62 \times 15 = 930$$

Step 2: Correct the total.

$$\text{Incorrect marks} = 84$$

$$\text{Actual marks} = 48$$

$$\text{Difference} = 84 - 48 = 36$$

$$\text{Correct total} = 930 - 36 = 894$$

Step 3: Calculate the correct average.

$$\text{Correct Mean} = 894 \div 15 = 59.6$$

50. Option (a) is correct.

Explanation:

Step 1: Total of all 25 numbers

$$\text{Average} = 56,$$

$$\text{Total} = 25 \times 56 = 1400$$

Step 2: Sum of first 12 numbers

$$= 12 \times 52 = 624$$

Step 3: Sum of last 12 numbers

$$= 12 \times 60 = 720$$

The first 12 numbers and the last 12 numbers together account for 24 numbers, leaving only the 13th number.

$$\text{Therefore, } 13^{\text{th}} \text{ number} = 1400 - 624 - 720 = 56$$

SECTION-C | REASONING & MILITARY APTITUDE

51. Option (b) is correct.

Explanation: The missing figure that will complete the figure is:

Hence, the correct answer is option (B).

52. Option (b) is correct.

Explanation: Assertion (A) is true because India celebrates Republic Day on 26th January every year to mark the day when the Constitution of India came into effect in 1950.

Reason (R) is false because India became free from British rule on 15th August 1947, not on 26th January 1947.

Hence, the correct answer is that A is true, but R is false.

53. Option (c) is correct.

Explanation: BSWK → GXTH

$$B + 5 = G, S + 5 = X,$$

$$W - 3 = T, K - 3 = H$$

LCCE → QHNB

$$L + 5 = Q, C + 5 = H,$$

$$C - 3 = Z, E - 3 = B$$

VMKY → ?

$$V + 5 = A, M + 5 = R,$$

$$K - 3 = H, Y - 3 = V$$

So, VMKY → ARHV

Hence, the correct answer is option (C).

54. Option (b) is correct.

Explanation: The mirror image of the given figure is as shown below.

Hence, the correct answer is option (B).

55. Option (d) is correct.

Explanation: From the given information seating arrangement will be;

Two people sit between F and E when counted from the left of E.

Hence, the correct answer is option (D).

56. Option (c) is correct.

Explanation: From 2 Feb 2007 to 2 Feb 2008 is 1 year.

2007 was not a leap year, it had 365 days.

$$365 \text{ days} = 52 \text{ weeks} + 1 \text{ day}$$

The day will shift by +1 day.

2 Feb 2007 = Friday

2 Feb 2008 = Saturday

So, Saturday was the day of the week on 2nd February 2008.

Hence, the correct answer is option (C).

57. Option (a) is correct.

Explanation:

Conclusions:

I. Some apples are oranges. (Follow, because All oranges are apples.)

II. All grapes are oranges. (Not follow, because it reverse the Venn diagram.)

So, Only conclusion I follows.

58. Option (b) is correct.

Explanation:

Logic: First alphabet is coded as positional value of opposite alphabet -5.

Second alphabet is coded as positional value of opposite alphabet -4.

Third alphabet is coded as positional value of opposite alphabet -3.

Fourth alphabet is coded as positional value of opposite alphabet -2.

Fifth alphabet is coded as positional value of opposite alphabet -1.

WATER → YVDTH

$$W \rightarrow D = 4 \rightarrow 4 - 5 = Y$$

$$A \rightarrow Z = 26 \rightarrow 26 - 4 = V$$

$$T \rightarrow G = 7 \rightarrow 7 - 3 = D$$

$$E \rightarrow V = 22 \rightarrow 22 - 2 = T$$

$$R \rightarrow I = 9 \rightarrow 9 - 1 = H$$

GRASS → OEWFC

$$G \rightarrow T = 20 \rightarrow 20 - 5 = O$$

$$R \rightarrow I = 9 \rightarrow 9 - 4 = E$$

$$A \rightarrow Z = 26 \rightarrow 26 - 3 = W$$

$$S \rightarrow H = 8 \rightarrow 8 - 2 = F$$

$$S \rightarrow H = 8 \rightarrow 8 - 1 = C$$

PLANT → >

$$P \rightarrow K = 11 \rightarrow 11 - 5 = F$$

$$L \rightarrow O = 15 \rightarrow 15 - 4 = K$$

$$A \rightarrow Z = 26 \rightarrow 26 - 3 = W$$

$$N \rightarrow M = 13 \rightarrow 13 - 2 = K$$

$$T \rightarrow G = 7 \rightarrow 7 - 1 = F$$

So, PLANT → FKWKF

59. Option (b) is correct.

Explanation: Except 27 – 35, all are prime numbers pair.

60. Option (d) is correct.

Explanation:

I. Some trucks are cars → True

II. All bikes are bicycles → False

Hence, the correct option is Only conclusion I follows.

61. Option (a) is correct.

Explanation: My mother's son-in-law = The husband of my mother's daughter.

That daughter could be Rani herself.

My mother's son-in-law = Rani's husband.

The man is Rani's husband.

62. Option (d) is correct.

Explanation: According to the given information, positioning of the boxes will be:

Position	Boxes
7	F
6	B
5	C
4	G
3	E
2	D
1	A

As per the table, there are 4 boxes kept between D and F.

63. Option (b) is correct.

Explanation: Pediatrics is the branch of medicine that deals with children.

Similarly,

Neurology is the branch of medicine that deals with the brain.

64. Option (b) is correct.

Explanation: The series:

$$1500 + 1505 = 3005$$

$$3005 + 3010 = 6015$$

$$6015 + 6020 = 12035$$

$$12035 + 12040 = 24075$$

$$24075 + 24080 = 48155$$

$$\text{So, } ? = 48155$$

65. Option (d) is correct.

Explanation: Given:

$$109 \div 76 \times 4 - 5 + 18 = ?$$

New Equation:

$$109 + 76 \div 4 \times 5 - 18 = ?$$

$$109 + 76 \div 4 \times 5 - 18 = ?$$

$$109 + 19 \times 5 - 18 = ?$$

$$109 + 95 - 18 = ?$$

$$204 - 18 = ?$$

$$? = 186$$

66. Option (d) is correct.

Explanation:

Capsicum, mat and rat are different from each other.

67. Option (b) is correct.

Explanation: The correct embedded figure is shown below.

68. Option (a) is correct.

Explanation: Logic:

Multiply the number by 3, then add 7.

$$21 \times 3 = 63, 63 + 7 = 70$$

$$19 \times 3 = 57, 57 + 7 = 64$$

Similarly,

$$13 \times 3 = 39, 39 + 7 = 46$$

69. Option (b) is correct.

Explanation: Closest resemble figure given below.

Hence, the correct answer is option (B).

70. Option (b) is correct.

Explanation:

$$128 + 2 = 130$$

$$130 + 4 = 134$$

$$134 + 8 = 142$$

$$142 + 16 = 158 \neq 156$$

$$158 + 32 = 190$$

Correct series:

128, 130, 134, 142, 158, 190

The term 156 breaks this pattern.

71. Option (b) is correct.

Explanation:

Logic: 1st letter - 4 = 2nd letter, 2nd letter + 3 = 3rd letter.

Option A: LHK

$$L - 4 = H, H + 3 = K$$

Option B: OKM

$$O - 4 = K,$$

$K + 3 \neq M$ (it gives N) — Pattern not follow.

Option C: UQT

$$U - 4 = Q, Q + 3 = T$$

Option D: RNQ

$$R - 4 = N, N + 3 = Q$$

Only OKM does not follow the pattern.

Hence, the correct option is (b) OKM.

72. Option (d) is correct.

Explanation: Logic: Place value of letters = Number

For, WAIT - 231920

$$W = 23, A = 1, I = 9, T = 20$$

Similarly,

RUN - ?

$$R = 18, U = 21, N = 14$$

So, RUN is coded as 182114.

73. Option (d) is correct.

Explanation: From the given information seating arrangement will be;

Two people sit between G and K.

74. Option (c) is correct.

Explanation: Logic: 1st letter +1 each term, 2nd letter +1 each term, 3rd letter -1 each term.

1st letters: $M + 1 \rightarrow N, N + 1 \rightarrow O, O + 1 \rightarrow P, P + 1 \rightarrow Q$

2nd letters: $I + 1 \rightarrow J, J + 1 \rightarrow K, K + 1 \rightarrow L, L + 1 \rightarrow M$

3rd letters: $N - 1 \rightarrow M, M - 1 \rightarrow L, L - 1 \rightarrow K, K - 1 \rightarrow J$

Missing cluster = Q M J

75. Option (b) is correct.

Explanation: There are 17 lines in this given diagram.

Hence, the correct answer is option (B).

SECTION-D | GENERAL KNOWLEDGE

76. Option (c) is correct.

Explanation: Air Marshal P. V. Shivanand assumed charge as the Air Officer Commanding-in-Chief (AOC-in-C) of the South Western Air Command on 1 July

2026. He succeeded Air Marshal Tejinder Singh, who was appointed as the Chief of Integrated Defence Staff to the Chairman Chiefs of Staff Committee (CISC). Air Marshal Shivanand is a highly decorated fighter pilot

with extensive operational, instructional and command experience in the Indian Air Force. Therefore, both statements are correct.

77. Option (d) is correct.

Explanation: The dance described is Theyyam, one of the most vibrant and ancient ritual folk dances of Kerala. It is performed mainly in Bhagavati temples in northern Kerala in honour of Goddess Bhadrakali and other local deities. The performers wear elaborate costumes, colourful face paintings and towering headgear. Theyyam is considered both a religious ritual and a cultural performance, reflecting Kerala's rich folk traditions.

78. Option (b) is correct.

Explanation: Researchers discovered a new pollution-removing bacterium, *Brachybacterium netajii*, in the waters of the Hooghly River. The bacterium has the ability to degrade harmful pollutants, making it valuable for bioremediation and improving water quality. Its discovery is considered significant for developing eco-friendly methods to reduce river pollution and restore aquatic ecosystems through the use of naturally occurring microorganisms.

79. Option (c) is correct.

Explanation: INS Sudarshini represents the country at the United States International Naval Review (USINR) 250 and Sail4th 250 commemorative celebrations in New York. The three-masted barque sailed past the Statue of Liberty and took part in the grand Parade of Sail on the Hudson River to mark the 250th anniversary of American independence. This high-profile deployment is part of its 10-month-long transoceanic expedition named Lokayan 2026.

80. Option (a) is correct.

Explanation: Dribbling is a fundamental skill in basketball, involving continuously bouncing the ball with one hand while moving around the court. It enables players to advance, evade defenders and create scoring opportunities without violating the rules. Effective dribbling requires coordination, ball control, speed and agility. Although similar techniques exist in sports like football and hockey, the term 'dribbling' is most commonly associated with basketball in such competitive examinations.

81. Option (b) is correct.

Explanation: Despite its name, Patna Bird Sanctuary is located in the Etah district of Uttar Pradesh, not Bihar, making Statement 1 incorrect. Spanning just 1.09 square kilometres, it is officially the smallest protected area in Uttar Pradesh, validating Statement 2. It has also been designated as a Ramsar Site of international importance to protect its wetland ecosystem, making Statement 3 correct.

82. Option (a) is correct.

Explanation: The Thirty Years' War (1618–1648) was one of the longest and most devastating conflicts in European history. It began as a religious conflict between Catholics and Protestants in the Holy Roman Empire but later evolved into a broader political struggle involving major European powers. The war ended with the Peace of Westphalia (1648), which established the principles of state sovereignty and significantly reshaped the political map of Europe.

83. Option (c) is correct.

Explanation: Plants absorb water from the soil through osmosis, a process in which water moves from a region of higher water potential in the soil to a region of lower water potential inside the root hair cells through a selectively permeable membrane. Osmosis enables roots to absorb water efficiently, while transpiration helps in its upward movement. Diffusion mainly involves the movement of gases rather than water absorption.

84. Option (b) is correct.

Explanation: Under India's BRICS Chairship 2026, the 11th BRICS Energy Ministers' Meeting was officially held in Gurugram, Haryana, on June 25–26, 2026. The high-level event focused heavily on international collaborations under the theme of resilience and sustainability. While New Delhi, Gandhinagar and Noida frequently host major summits, they were not selected as the primary venue for this specific multilateral meeting.

85. Option (a) is correct.

Explanation: Correct — The National Bank for Agriculture and Rural Development (NABARD) is India's apex development bank for promoting sustainable and equitable agriculture and rural development. It was established on 12 July 1982 under the NABARD Act, 1981 (an Act of Parliament).

2. Incorrect — NABARD was not established on 30 March 1979. The date 30 March 1979 is associated with the formation of the Committee to Review Arrangements for Institutional Credit for Agriculture and Rural Development (CRAFICARD), headed by Shri B. Sivaraman, which recommended the establishment of NABARD. NABARD itself came into existence in 1982.

86. Option (a) is correct.

Explanation: The region lying between the Tropic of Cancer and the Tropic of Capricorn experiences tropical humid climates, characterised by high temperatures throughout the year and abundant rainfall in many areas. This broad climatic zone includes equatorial, tropical monsoon and tropical wet-and-dry climates. Therefore, Tropical humid climates are the most comprehensive and appropriate answer among the given options.

87. Option (a) is correct.

Explanation: The continental slope is the steeply sloping region that connects the continental shelf with the deep ocean basins. It marks the transition between the shallow continental margin and the deep ocean floor. Continental slopes are important geological features where sediments accumulate and submarine canyons are commonly found. Therefore, the continental slope forms the connecting link between the continental shelf and ocean basins.

88. Option (c) is correct.

Explanation: The Financial Action Task Force (FATF) was established in 1989 during the G7 Summit in Paris to combat money laundering. Following the 9/11 terrorist attacks, FATF expanded its mandate in 2001 to include measures against terrorist financing. Today, it also addresses the financing of weapons of mass destruction. Therefore, all three statements are correct.

89. Option (a) is correct.

Explanation: The Australian women's cricket team secured a dominant seven-wicket victory over host nation England in the final of the ICC Women's T20 World Cup 2026, held at Lord's Cricket Ground on July 5, 2026. Successfully chasing down England's target of 151 runs with 17 balls to spare, Australia extended its historic supremacy in the tournament format by capturing its record seventh world title. Defending champions New Zealand, alongside semifinalists India and South Africa, all fell short earlier in the tournament.

90. Option (a) is correct.

Explanation: Exercise Pitch Black is the Royal Australian Air Force's (RAAF) premier multinational air combat exercise, conducted in Australia's Northern Territory, making Statement 1 correct. The Indian Air Force is expected to participate in the 2026 edition, making Statement 2 correct. However, the exercise is not limited to the Quad countries; it includes participation from numerous friendly air forces worldwide. Therefore, Statements 1 and 2 only are correct.

91. Option (c) is correct.

Explanation: The Ahmedabad Mill Strike (1918) was an important labour movement in Ahmedabad, Gujarat, where textile workers demanded higher wages due to rising prices during World War I. Mahatma Gandhi mediated between workers and mill owners and, when negotiations failed, undertook his first hunger strike (fast) in India as a method of Satyagraha to strengthen the workers' resolve. Therefore, both statements are correct.

92. Option (b) is correct.

Explanation: The 92nd Constitutional Amendment Act, 2003 added Bodo, Dogri, Maithili and Santhali to the Eighth Schedule of the Indian Constitution, increasing the number of scheduled languages from 18 to 22. The amendment aimed to recognise India's linguistic diversity and promote the preservation and development of these languages. At present, the Eighth Schedule contains 22 officially recognised languages.

93. Option (d) is correct.

Explanation: India launched Operation Amistad to provide humanitarian assistance to Venezuela following the devastating earthquake. The operation reflected India's commitment to the principle of 'Vasudhaiva Kutumbakam' and its role as a responsible humanitarian partner. Relief materials, medical supplies and essential aid were dispatched to support rescue and rehabilitation efforts, strengthening India's humanitarian and diplomatic relations with Venezuela.

94. Option (c) is correct.

Explanation: The International Day of Cooperatives was observed on 4 July 2026 with the theme 'Cooperatives for a Peaceful World!' The theme highlights the role of cooperative institutions in promoting peace, social inclusion, sustainable development and economic resilience. Cooperatives empower communities through democratic participation, shared ownership and equitable growth while contributing to the achievement of the Sustainable Development Goals (SDGs).

95. Option (d) is correct.

Explanation: The government of Gujarat is constructing its first two air-filled rubber dams across the Heran River in Chhota Udepur and the Ambika River in Tapi district. Developed at a cost of over ₹162 crore, the innovative project utilises automated rubber bladder technology imported from South Korea. This allows the structures to automatically inflate and deflate based on real-time river flow to optimise irrigation, water management and flood control, outpacing similar water infrastructure projects in Maharashtra, Rajasthan and Karnataka.

96. Option (b) is correct.

Explanation: Following its renaming in 2026, the International Booker Prize is officially known as the Bukhman International Booker Prize. The renaming followed a new sponsorship agreement while the prize continued its objective of recognising the finest works of translated fiction published in English. The award honours both the author and the translator, highlighting the importance of literary translation in global literature.

97. Option (d) is correct.

Explanation: The 16th BRICS National Security Advisers' (NSA) Meeting was hosted in New Delhi under India's BRICS Chairmanship and chaired by National Security Adviser Ajit Doval. The meeting brought together the security heads of all 11 BRICS member countries to discuss issues such as terrorism, cybersecurity, emerging technologies and global security cooperation. Therefore, all three statements are correct.

98. Option (c) is correct.

Explanation: In July 2026, Prime Minister Narendra Modi was conferred with the 'Bintang Adipurna', the highest civilian honour of Indonesia. The award recognised his significant contribution to strengthening India-Indonesia strategic relations, enhancing cooperation in trade, defence, maritime security and cultural exchanges. It also reflected the deepening partnership between the two Indo-Pacific democracies.

99. Option (c) is correct.

Explanation: Under the Tenth Schedule of the Indian Constitution, a legislator is disqualified if they voluntarily give up the membership of their political party, making Statement 1 correct. The power to decide disqualification petitions rests with the Speaker or Chairman, not the President, making Statement 2 incorrect. The Supreme Court, in the Kihoto Hollohan case (1992), held that the Presiding Officer's decision is subject to judicial review, making Statement 3 correct.

100. Option (a) is correct.

Explanation: The Sirsa Kinnow received the Geographical Indication (GI) tag, becoming the first GI-recognised fruit of Haryana. Grown mainly in the Sirsa district, this citrus fruit is known for its excellent sweetness, juiciness and high vitamin C content. The GI tag protects its unique identity, enhances market value, prevents misuse of the name and benefits local farmers by promoting regional agricultural products.

Sample Question Paper-3

Total Question: 100

Maximum Marks: 300

Instructions

- Total Number of Questions – 100. This Paper is divided in four sections.
 - SECTION-A | VERBAL ABILITY — 30 Questions
 - SECTION-B | NUMERAL ABILITY — 20 Questions
 - SECTION-C | REASONING & MILITARY APTITUDE — 25 Questions
 - SECTION-D | GENERAL KNOWLEDGE — 25 Questions
- Each Question carries of three marks. One mark is deducted for every wrong answer.
- No mark is awarded/deducted for un-attempted questions.

SECTION-A | VERBAL ABILITY

- Choose the word which is nearly opposite in meaning to the given word:
'ALACRITY'
(a) ability (b) Great willingness
(c) Lethargy (d) Suspicion
Directions (Q. Nos. 2–6): In the following passage, there are some numbered blanks. Fill in the blanks by selecting the most appropriate word for each blank from the given options.
The paradigms by which modern military forces regulate tactical information have been completely (2) _____ since the dawn of the digital era. State-sponsored cyberwarfare is no longer viewed as a speculative future threat; instead, it has become an (3) _____ pillar of contemporary national defense doctrines worldwide. Modern air forces rely unconditionally on tightly interwoven communication fabrics to synchronise high-stakes operations, a reliance that renders the absolute fortification of these networks (4) _____. A singular latent vulnerability within an operational network can compromise top-secret telemetry data, swiftly placing entire multi-million dollar deployments in extreme jeopardy. Consequently, defense ministries are allocating massive capital reserves toward quantum encryption protocols and autonomous machine learning systems to effectively (5) _____ hostile digital incursions before they breach internal firewalls. In the end, developing a robust cyber security architecture is more than just a routine technological upgrade; it is an absolute (6) _____ for safeguarding national sovereignty over the long term.
- Fill in the blank by selecting the most suitable option (2).
(a) slowed down (b) revolutionised
(c) diminished (d) tolerated
- Select the most appropriate option to fill in blank (3).
(a) surface-level (b) on occasion
(c) integral (d) out of date
- Fill in the blank with the option that makes the most sense (4).
(a) paramount (b) unimportant
(c) the secondary (d) unnecessary
- Select the most appropriate option to fill in blank (5).
(a) facilitate (b) prevent
(c) overlook (d) encourage
- Fill in the blank by selecting the option that is most appropriate (6).
(a) luxury (b) liability
(c) Requirement (d) afterthought
- Choose the option which best expresses the meaning of the idiom/phrase given below:
'Take the bull by the horns'
(a) To participate in a risky professional sport
(b) To avoid a problem until it is fixed automatically
(c) To confront a difficult circumstance with bravery and directness
(d) Displaying arrogance in front of superiors
- Choose the option which best expresses the meaning of the idiom/phrase given below:
'Burn the midnight oil'
(a) To waste expensive resources recklessly
(b) To set waste fields from agriculture on fire
(c) To prepare a substantial meal for a celebration.
(d) To work or study late into the night.
- In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
A person who gives money, goods, or services to alleviate human suffering and support welfare
(a) Altruist (b) Miscreant
(c) Hedonist (d) Slow-moving

10. In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
A person who strongly disagrees with widely held beliefs, customs and institutions
(a) Clever (b) Iconoclast
(c) Extremist (d) Smuggler
11. What is the synonym for the word 'Exodus'?
(a) Infusion (b) Go Back
(c) Discontentment (d) The Great Migration
12. Select the most appropriate word for the given group of words.
A person who doesn't care if something is good or bad.
(a) Stoic (b) Smuggler
(c) Casual (d) Optimist
13. Choose the word that best defines the given phrases:
'To give wide latitude'
(a) To grant freedom of action or choice to someone
(b) To give someone praise in public
(c) To stay away from or avoid someone
(d) To provide a cozy seat
14. In the following question, a part of the sentence may have errors. Find out which part of the sentence has an error and select the appropriate option. If a sentence is free from error, select 'No Error'.
The modern resort supplies its guests with (A) / state-of-the-art sports gear, (B) / luxury accommodations and helpful informations. (C) / No error (D)
(a) A (b) B
(c) C (d) D
15. In the following question, a part of the sentence may have errors. Find out which part of the sentence has an error and select the appropriate option. If a sentence is free from error, select 'No Error'.
Neha is knowing the answer (A)/ to every difficult question (B)/ asked by the interviewer. (C)/No mistake (D)
(a) A (b) B
(c) C (d) D
16. Select the most appropriate word for the given group of words.
A group of lions living together.
(a) Pack (b) Pride
(c) Herd (d) Education
17. Choose the most appropriate answer and fill in the blanks.
The noun form of the word 'maintain' is.....
(a) maintenance (b) maintain
(c) maintained (d) maintainer
18. Fill in the blanks with the idioms/phrases out of the given options.
Make sure you read everything in between the..... before you sign the contract.
(a) Pages (b) words
(c) The lines (d) The paragraphs
19. Fill in the blank with the most appropriate choice:
Spreading false rumors about innocent people is a malicious.....to their reputation.
(a) advantage (b) danger
(c) an asset (d) Solace
20. In the following question, there is a related pair of words given. Each pair is followed by four other pairs of words. Choose the pair from the given option that best expresses the relationship like the original pair.
Prosperity : Adversity
(a) Garrulous : Talkative (b) Turmoil : Chaos
(c) Protected : Vulnerable (d) Beautiful : Handsome
21. In the following question, there is a related pair of words given. Each pair is followed by four other pairs of words. Choose the pair from the given option that best expresses the relationship like the original pair.
Capricious : Fickle
(a) Unsteady: Peaceful
(b) Exorbitant : Expensive
(c) Selfish: Altruistic
(d) Out of date: current
22. In the following question, out of the four alternatives, choose the one which best expresses the meaning of the given word.
EXONERATE
(a) Release (b) Call out
(c) Compromise (d) Impute guilt.
23. Parts of a sentence are given below in jumbled order. Select the option that arrange the parts in the correct order to form a meaningful sentence.
(A) to reach their goal
(B) the relentless research team
(C) working continuously
(D) came across an innovative formula.
(a) (A), (C), (B), (D) (b) (B), (C), (D), (A)
(c) (C), (D), (B), (A) (d) (B), (D), (A), (C)
24. Parts of a sentence are given below in jumbled order. Select the option that arranges the parts in the correct order to form a meaningful sentence.
(A) Influenced in large part by his humble upbringing
(B) Devoted his entire life
(C) The charitable individual who cares
(D) To help underprivileged communities
(a) (B), (D), (C), (A) (b) (A), (C), (B), (D)
(c) (C), (B), (A), (D) (d) (A), (B), (C), (D)

Directions (Q. Nos. 25–27): Read the passage carefully and answer the questions given below:

For the ancient Mediterranean world, ancient Egypt was a towering beacon of fascination because of its astonishing agricultural abundance, architectural mastery and profound afterlife mysteries. Merchants, conquering armies, scholars and religious pilgrims seeking hidden wisdom and material wealth were drawn to this profound legacy. Nearly all of the travelers faced harsh environmental dangers that pushed human endurance to its absolute limits, such as grueling desert tracks or

punishing maritime crossings. Due to the extreme heat and psychological dread, the exhausted legions of Roman commanders occasionally grew restless and threatened insubordination when ordered into the scorching, uncharted southern territories beyond the cataracts of the Nile. However, numerous migrating groups, including the ancient Hyksos and later Ptolemaic settlers, made the decision to permanently bind their fates to the Nile. They firmly integrated themselves into Egyptian society by broadening its artistic horizons, building massive temples and incorporating their own customs to enhance the kingdom's ongoing splendor.

25. The passage voluminously discusses
- The Nile's architectural styles
 - Egypt's historical grandeur and allure
 - African Roman military campaigns
 - Ancient desert trade's difficulties
26. What in Egypt attracted merchants, conquering armies and scholars?
- The rivers and strategic military outposts
 - The dark mysteries and harsh environmental dangers
 - Its abundance in agriculture and profound wisdom
 - Its maritime routes and political stability
27. How did migrating groups like the Hyksos and Ptolemaic settlers affect Egypt in the long run?
- Their depletion of its agricultural resources.
 - They stayed clear of the rough desert roads.
 - They made permanent improvements to Egyptian architecture and culture.
 - The Roman legions became submissive as a result.

Directions (Q. Nos. 28–30): Read the following passage carefully and answer the questions given below it.

The Gryphon, a legendary creature boasting the body of a lion and the head and wings of an eagle, stands as a premier symbol of dual majesty in ancient lore. The palatial frescoes of Bronze Age Crete, specifically

the Throne Room at Knossos, which date back to the Minoan civilisation, provided the first definitive artistic representations. Here, these creatures were depicted without wings, acting as silent, sacred guardians of royal authority, a protective function that persisted across Aegean cultures. Conversely, nomadic Scythian tribes of the Central Asian steppes reimagined the gryphon as a ferocious, gold-guarding beast of the wilderness, heavily emphasising its predatory eagle beak and sharp talons. The icon entered the Persian Empire via these nomadic routes, where it underwent a stylised transformation that frequently included ibex horns and stylised fur patterns. This hybrid of a bird and a lion eventually found its way into Greek classical art, becoming once more an aggressive mount for gods like Apollo. This demonstrates how a single mythic archetype adapts to the spiritual needs of different empires.

28. Where exactly did the first definitive artwork of the gryphon appear?
- The Persian Empire
 - Classical Greek art
 - The Central Asian steppes
 - The Throne Room at Knossos
29. Which of the following is NOT true of the passage?
- The earliest Minoan gryphons lacked the wings found in later classical interpretations.
 - The creature's lion-like characteristics were completely ignored by the Scythian interpretation.
 - In its earliest palace depictions, the gryphon represented royal protection.
 - Unique stylised elements like horns were added to the creature's design by Persian artists.
30. The passage's primary objective is to
- demonstrate that Persian artists were the most significant early art innovators.
 - investigate the specific biological origins of the gryphon's physical characteristics.
 - inform the reader of the gryphon's historical migration and cultural alterations.
 - contrast the aggressive nature of Greek mythology with the tranquil Minoan religion.

SECTION-B | NUMERAL ABILITY

31. The least number which when divided by 18, 24 and 30 leaves a remainder of 5 in each case is
- 355
 - 360
 - 365
 - 725
32. The price of sugar is increased by 25%. By what percentage should a family reduce its consumption so that the total expenditure on sugar remains unchanged?
- 18%
 - 20%
 - 22%
 - 25%
33. A shopkeeper purchases 80 calculators at ₹750 each. During transportation, 8 calculators are damaged and cannot be sold. At what price should he sell each of the remaining calculators to earn an overall 20% profit?
- ₹960
 - ₹980
 - ₹1,000
 - ₹1,020
34. A sum of ₹9,600 is divided among A, B and C in the ratio 3 : 5 : 8. If A gives ₹300 to B, then B gives ₹500 to C. What is the new ratio of their amounts?
- 15 : 28 : 53
 - 14 : 27 : 53
 - 15 : 27 : 54
 - 16 : 28 : 52
35. Find the next term in the following series:
5, 11, 23, 47, 95, ?
- 185
 - 189
 - 191
 - 193

36. Find the missing term in the following series:
3, 7, 18, 47, 122, ?
(a) 287 (b) 301 (c) 315 (d) 327
37. A cylindrical water tank has an internal radius of 3.5 m and a height of 8 m. If the tank is 80% full, how many litres of water does it contain?
(Take $\pi = \frac{22}{7}$)
(a) 2,46,400 litres (b) 2,35,200 litres
(c) 2,40,000 litres (d) 2,50,800 litres
38. A solid cube of side 12 cm is melted and recast into small cubes of side 3 cm each. How many small cubes are formed?
(a) 32 (b) 48 (c) 64 (d) 72
39. The mean of 18 observations is 46. One observation was incorrectly recorded as 82 instead of 28. Find the correct mean.
(a) 43 (b) 44 (c) 45 (d) 46
40. The average of 30 students is 68 marks. If the average of the first 18 students is 65 marks and the average of the last 12 students is 72.5 marks, then what is the total marks obtained by all 30 students?
(a) 1980 (b) 2010 (c) 2040 (d) 2065
41. A train 240 m long crosses a platform 360 m long in 30 seconds. Find the speed of the train.
(a) 60 km/h (b) 66 km/h (c) 72 km/h (d) 78 km/h
42. A car covers the first 180 km of a journey at 60 km/h and the next 120 km at 40 km/h. Find the average speed for the entire journey.
(a) 48 km/h (b) 50 km/h (c) 52 km/h (d) 54 km/h
43. A boat takes 3 hours to travel 45 km downstream and 5 hours to travel the same distance upstream. Find the speed of the boat in still water.
(a) 10 km/h (b) 12 km/h (c) 15 km/h (d) 18 km/h
44. A man rows 36 km downstream in the same time in which he rows 24 km upstream. If the speed of the stream is 3 km/h, find the speed of the boat in still water.
(a) 12 km/h (b) 15 km/h (c) 18 km/h (d) 21 km/h
45. A right circular cone has a radius of 7 cm and a height of 24 cm. Find its curved surface area.
(Take $\pi = \frac{22}{7}$)
(a) 550 cm² (b) 572 cm² (c) 616 cm² (d) 660 cm²
46. A rectangular water tank is 8 m long, 6 m wide and 5 m deep. It is filled with water up to 75% of its capacity. How many litres of water does the tank contain?
(a) 1,60,000 litres (b) 1,80,000 litres
(c) 1,95,000 litres (d) 2,00,000 litres
47. The average weight of 25 students is 58 kg. If the weight of one student was recorded as 74 kg instead of 47 kg, what is the correct average weight?
(a) 56.92 kg (b) 57.08 kg (c) 57.50 kg (d) 58 kg
48. The average marks of 40 students in a class are 65. The average marks of 25 boys are 68. Find the average marks of the 15 girls.
Options:
(a) 58 (b) 60 (c) 61 (d) 62
49. The price of an article is increased by 25%. By what percentage should the increased price be reduced so that it becomes equal to the original price?
(a) 18% (b) 20% (c) 22% (d) 25%
50. A can complete a piece of work in 20 days, B in 30 days and C in 60 days. They start working together. After 5 days, A leaves the work. After another 5 days, B also leaves. In how many more days will C alone complete the remaining work?
(a) 10 days (b) 15 days (c) 20 days (d) 25 days

SECTION-C | REASONING & MILITARY APTITUDE

51. Which of the following letter-number clusters will replace the question mark (?) in the given series to make it logically complete?
COB 5, EQD 10, GSF 15, IUH 20, ?
(a) JWI 25 (b) JVI 22 (c) KWJ 25 (d) KVJ 22
52. Select the figure which satisfies the same condition of placement of dots as in the figure (X).

53. Seven people, A, B, C, D, E, F and G, are sitting in a row, facing north. Only two people sit to the left of A. Only three people sit between A and F. D sits second to the right of A. Only two people sit between D and G. C sits at some place to the right of B but at some place to the left of E. Who sits on the extreme left end?
(a) E (b) B (c) F (d) C
54. Which letter cluster will replace the question mark (?) to complete the given series?
UQMI, VOPE, WMSA, ?, YTYS
(a) XKWV (b) XVWK (c) KXWV (d) XKVW

55. Select the correct mirror image of the given combination when the mirror is placed at 'MN' as shown below.

- (a) 2 h 4 B % 7 & (b) 2 h 4 B % 7 &
(c) 2 h 4 B % 7 & (d) 2 h 4 B % 7 &
56. Pointing to a photograph, Rajat said, 'He is the son of the only daughter of my mother-in-law.' How is the person in photograph related to Rajat?
(a) Sister's son (b) Father's brother
(c) Brother (d) Son
57. Hyundai, Ford, Apple, Toyota - which brand doesn't fit?
(a) Toyota (b) Apple (c) Ford (d) Hyundai
58. If the time in the mirror image of a 12-hour clock is 3:25, what is the actual time?
(a) 9:35 (b) 8:35 (c) 8:45 (d) 7:45
59. Shaan starts from Point A and drives 6 km towards North. He then takes a right turn, drives 7 km, turns right and drives 12 km. He then takes a right turn and drives 8 km. He takes a final right turn, drives 6 km and stops at Point P. How far (shortest distance) and towards which direction should he drive in order to reach Point A again? (All turns are 90° turns only unless specified)
(a) 2 km to the east (b) 3 km to the east
(c) 4 km to the east (d) 1 km to the east
60. In a row of a few students, P was standing 17th from the left end and 23rd from the right end. If Q was standing exactly in the middle of the row, what was his position from the extreme left end? Assume that the students were facing the north.
(a) 22nd (b) 18th (c) 19th (d) 20th
61. Which number will replace the question mark (?) in the following series?
12, 30, 66, 138, ?, 570
(a) 314 (b) 256 (c) 408 (d) 282
62. If blood :: connective tissue, then bones ::
(a) connective tissue (b) nervous tissue
(c) epithelial tissue (d) muscular tissue
63. Select the pair from among the given options that is analogous to the given pair.
2 : 11,
1 : 4
(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into its constituent digits. For example, 13 – Operations on 13 such as adding/subtracting/multiplying etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)
(a) 4 : 65 (b) 3 : 27 (c) 5 : 128 (d) 6 : 217

64. Read the given statement(s) and conclusions carefully. Assuming that the information given in the statement(s) is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statement(s).

Statements:

Some guns are roses.

All roses are bats.

Conclusions:

I. Some guns are bats.

II. All bats are roses.

- (a) Both conclusions (I) and (II) follow.
(b) Only conclusion (II) follows.
(c) Neither conclusion (I) nor (II) follows.
(d) Only conclusion (I) follows.
65. A paper is folded and cut as shown below. How will it appear when unfolded?

- (a) (b)
(c) (d)

66. Study the given diagram carefully and answer the question. The numbers in different sections indicate the number of persons.

How many such insurance agents are there who are drivers but NOT healthy?

- (a) 9 (b) 25 (c) 19 (d) 13
67. Select the option that is related to the fifth letter cluster in the same way as the second letter cluster is related to the first letter cluster and the fourth letter cluster is related to the third letter cluster.
JRO : GOL :: HER : EBO :: STL : ?
(a) TED (b) PQI (c) GWL (d) HTA
68. If 'P' stands for '+', 'Q' stands for '×', 'R' stands for '+' and 'S' stands for '-', then the resultant of which of the following would be 50?
(a) 24 S 4 Q 28 P 12 R 6 (b) 24 Q 4 R 28 S 12 P 6
(c) 24 P 4 S 28 R 12 Q 6 (d) 24 R 4 P 28 Q 12 S 6

69. Which number will replace the question mark (?) in the following series?

8, 4, 12, 16, 16, 28, 20, 40, 24, ?

(a) 55 (b) 60 (c) 58 (d) 52

70. Based on the English alphabetical order, three of the following four letter-cluster pairs are alike in a certain way and thus form a group. Which letter-cluster pair DOES NOT belong to that group?

(Note: The odd one out is not based on the number of consonants/vowels or their position in the letter-cluster.)

(a) LP-GI (b) NR-IL (c) QU-LO (d) JN-EH

71. In a certain code, if rat is called cat, cat is called bird, bird is called elephant, elephant is called fish and fish is called rat, then who can fly in the sky?

(a) rat (b) elephant (c) cat (d) fish

72. Select the set in which the numbers are related in the same way as are the numbers of the following set.

(16, 24, 30)

(a) (18, 27, 45) (b) (14, 21, 38)
(c) (22, 32, 40) (d) (40, 60, 75)

73. Select the option in which the given figure (X) is embedded as its part. (Rotation is NOT allowed.)

74. Three statements are given followed by three conclusions numbered I, II and III. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statements:

All capsicums are chilies.

All chilies are cucumbers.

All cucumbers are gourds.

Conclusions:

I. Some cucumbers are capsicums.

II. All gourds are capsicums.

III. All chilies are gourds.

(a) All the conclusions follow

(b) Only conclusions I and II follow

(c) Only conclusions II and III follow

(d) Only conclusions I and III follow

75. In a certain code language, if 'CELL' is coded as '32' and 'PHONE' is coded as '58', how will 'BOLD' be coded in that language?

(a) 33 (b) 32 (c) 43 (d) 54

SECTION-D | GENERAL KNOWLEDGE

76. With reference to Air Marshal Jasvir Singh Mann, consider the following Statements:

1. He assumed charge as the Air Officer Commanding-in-Chief (AOC-in-C) of the Southern Air Command on 1st July 2026, succeeding Air Marshal Manish Khanna after his retirement.
2. He has accumulated over 3,000 flying hours on aircraft including the Apache, MiG-21, Jaguar, MiG-29, Su-30 and Rafale.

Which of the statements given above is/are correct?

(a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

77. The traditional Igu dance of the Mishmi tribe, executed by shamans to repel malevolent spirits and the Khamti community's theatrical Ka Fiphai (ghost dance), typically performed at religious festivals, are mostly associated with which Indian state?

(a) Arunachal Pradesh (b) Sikkim
(c) Nagaland (d) Mizoram

78. The Hayabusa2 spacecraft, which just executed a high-precision flyby of asteroid Torifune, is operated by the space agency of which country?

(a) JAXA (b) NASA (c) ESA (d) ISRO

79. The AUSTRAHIND 2024 joint military exercise, undertaken between the Indian Army and the Australian Army, was staged in which of the following Indian cities?

(a) Jodhpur (b) Pune
(c) Jaipur (d) Secunderabad

80. Chukker and Mallet are terms frequently connected with which of the following sports?

(a) Golf (b) Polo
(c) Horse Racing (d) Billiards

81. Kopra Reservoir, declared as a Ramsar site and recognised as India's 95th wetland of international importance, is the first Ramsar site in which of the following states?

(a) Jharkhand (b) Chhattisgarh
(c) Telangana (d) Bihar

82. Which of the following events is most closely associated with the Battle of Lexington and Concord?
 (a) American Revolutionary War
 (b) American Civil War
 (c) World War I
 (d) French and Indian War
83. Which of the following is a thin, elastic cartilaginous flap in the human respiratory system that prevents food from entering the larynx while swallowing?
 (a) Glottis (b) Epiglottis
 (c) Pharynx (d) Trachea
84. The Regional Cooperative Reform Conference in Mizoram was organised in accordance with which of Prime Minister Narendra Modi's fundamental visions?
 (a) Sahkar se Samridhi
 (b) Aatmanirbhar Bharat
 (c) Sabka Saath, Sabka Vikas
 (d) Krishi se Pragati
85. Which specialist financial institution, established in 1982 by an Act of the Indian Parliament, serves as the primary institution for funding, facilitating and promoting India's international trade?
 (a) Export-Import Bank of India (EXIM Bank)
 (b) Foreign Trade Development Bank of India
 (c) ECGC Limited
 (d) Directorate General of Foreign Trade (DGFT)
86. What is the name of the area located between the Tropic of Cancer and the Tropic of Capricorn, which experiences the highest temperatures as the sun is directly overhead at least once annually?
 (a) Frigid Zone (b) Temperate Zone
 (c) Torrid Zone (d) Polar Zone
87. The meeting of the warm Kuroshio Current and the cold Oyashio Current results in thick fog and forms one of the most fertile fishing areas globally. This marine occurrence happens in which of the following locations?
 (a) Off the coast of Newfoundland, Canada
 (b) Off the coast of Japan in the North Pacific Ocean
 (c) Off the southwestern coast of South America
 (d) Around the British Isles in the North Atlantic Ocean
88. Consider the following statements regarding the structure and voting powers of the United Nations Security Council:
1. The UNSC consists of 15 members, out of which the 10 non-permanent members are elected by the General Assembly for a non-renewable term of three years.
 2. For any substantive resolution to pass, it requires an affirmative vote of at least 9 members, including the concurrent votes of all 5 permanent members (P5).
3. If a permanent member abstains from voting on a substantive resolution, it is legally treated as a veto and the resolution fails to pass.
- Which of the statements given above is/are correct?
 (a) 2 only (b) 1 and 2 only
 (c) 2 and 3 only (d) 1, 2 and 3
89. Who among the following has been selected for the prestigious Ustad Bismillah Khan Yuva Puraskar 2025 for their outstanding contribution to preserving and promoting the traditional art form of Haveli Sangeet?
 (a) Acharya Ranchhodlal Goswami
 (b) Pandit Venkatesh Kumar
 (c) Ustad Wasifuddin Dagar
 (d) Acharya Dwarkalal Sharma
90. The multilateral maritime exercise 'MALABAR', which focuses on maintaining a free, open and inclusive Indo-Pacific region, includes India along with which other nations?
 (a) USA, Japan and Australia
 (b) USA, UK and Russia
 (c) France, Japan and Singapore
 (d) UAE, Oman and Saudi Arabia
91. The honorary title of 'Deshbandhu' (Friend of the Nation) was famously given by the public to which of the following freedom fighters during the Non-Cooperation era?
 (a) Chittaranjan Das (b) Subhas Chandra Bose
 (c) Lala Lajpat Rai (d) Bal Gangadhar Tilak
92. Which of the following is the world's first once-weekly basal insulin introduced in India for the treatment of diabetes in adults?
 (a) Humalog (b) Awiqli
 (c) Lantus (d) Tresiba
93. Adani Defence and Aerospace has announced the establishment of South Asia's largest private-sector integrated missile manufacturing facility in which of the following locations?
 (a) Guna (b) Jabalpur
 (c) Shivpuri (d) Pithampur
94. The World Day to Combat Desertification and Drought is observed annually across the globe on which of the following dates?
 (a) June 5 (b) June 8 (c) June 17 (d) June 21
95. Consider the following statements regarding the flight-test of the Pinaka weapon system conducted in July 2026:
1. The flight-test of the Pinaka Long Range Guided Rocket (LRGR) was successfully conducted by the Defence Research and Development Organisation (DRDO) at Pokhran, Rajasthan.
 2. During this specific test, the weapon system successfully validated a user-defined minimum range performance of 60 kilometres.
- Which of the statements given above is/are correct?
 (a) 1 only (b) 2 only
 (c) Both 1 and 2 (d) Neither 1 nor 2

96. Who has been appointed as the Chief Economist and Director of the Research Department at the International Monetary Fund (IMF)?
 (a) Pierre-Olivier Gourinchas
 (b) Kristalina Georgieva
 (c) Silvana Tenreiro
 (d) Gita Gopinath
97. In a significant move to strengthen bilateral cultural diplomacy, India and Kyrgyzstan recently inaugurated the International Centre for Civilisational Studies 'Manas and Mahabharata' in which of the following cities?
 (a) New Delhi (b) Bishkek
 (c) Osh (d) Tashkent
98. With his induction into the ICC Hall of Fame in July 2026, Sourav Ganguly became the _____ Indian cricketer to receive this elite global honor?
 (a) 10th (b) 11th (c) 12th (d) 15th
99. **Assertion (A):** The 44th Constitutional Amendment Act, 1978, removed the Right to Property from the list of Fundamental Rights in Part III of the Constitution.
Reason (R): The state intended to completely abolish private land ownership in India and establish a purely socialist state economy.
 (a) Both A and R are true and R is the correct explanation of A.
 (b) Both A and R are true, but R is not the correct explanation of A.
 (c) A is true, but R is false.
 (d) A is false, but R is true.
100. According to the recently released Happy City Index 2026, which of the following cities has achieved a remarkable milestone by becoming the only Indian city to be ranked in the global top 10?
 (a) Bengaluru (b) Jaipur
 (c) Indore (d) Chandigarh

Sample Question Paper-3 (Solution)

SECTION-A | VERBAL ABILITY

1. Option (c) is correct.

Explanation: "She accepted the invitation with alacrity" is an example of "brisk and cheerful readiness, eagerness, or a quick and lively willingness to do something." As a result, its exact opposite must imply complete inactivity, sluggishness, or typical laziness. 'Lethargy' refers to a state of drowsiness, lack of energy, or extreme sluggishness, making it the perfect antonym.

2. Option (b) is correct.

Explanation: The paradigms by which modern military forces regulate tactical information have been completely revolutionised since the dawn of the digital era.'

3. Option (c) is correct.

Explanation: The text explicitly states that cyberwarfare is no longer a distant, theoretical threat, highlighting its current, major presence in worldwide military planning. Since the noun "pillar" is modified by the blank, the adjective must indicate something fundamental and deeply ingrained. This requirement is met perfectly by integral, which is a means necessary to complete a whole. The central argument regarding cyberwarfare's permanent, foundational status in defense is completely misrepresented by options such as superficial (surface-level), intermittent (occasional), and obsolete (outdated).

4. Option (a) is correct.

Explanation: Because high-stakes military operations are entirely dependent on interconnected networks, a single flaw could compromise sensitive, top-secret data and put entire deployments in jeopardy. Securing these fabrics must be given the utmost priority given the stakes for national safety. This absolute urgency, which means that something is of the utmost importance, is perfectly captured in Paramount. On the other hand, options like "unimportant," "secondary," and "unnecessary" do not accurately reflect the critical gravity of the circumstance.

5. Option (b) is correct.

Explanation: Defense organizations actively invest a significant amount of capital into cutting-edge systems to combat "hostile digital incursions." The defense against these cyberattacks must be described by the missing verb. Because it means to prevent something from happening, prevent makes perfect sense. Words like "encourage," "facilitate," and "overlook" do not make any sense in this context because defense ministries would never willingly assist or ignore their adversaries.

6. Option (c) is correct.

Explanation: The sentence describes a robust cybersecurity architecture as a mandatory necessity, not an option. The phrase "an absolute" demands a strong noun denoting a strict necessity. "Requirement" fits perfectly, grammatically completing the clause "an absolute requirement for safeguarding national sovereignty" over alternative, non-mandatory options like "luxury" or "afterthought."

7. Option (c) is correct.

Explanation: The idiomatic expression "take the bull by the horns" refers to confronting a difficult problem or crisis head-on. A person who takes the situation by the horns confronts it proactively, decisively, and with complete courage rather than avoiding it, putting it off, or waiting for it to resolve itself.

8. Option (d) is correct.

Explanation: Before there was electricity, people had to rely on oil lamps to read or work at night, hence the expression "burn the midnight oil." Today, the idiom means to stay up very late into the night working hard, studying, or intellectualizing a task (e.g., "He had to burn the midnight oil to prepare for his defense exam"). It implies dedicated, late-night effort rather than wasting resources or cooking.

9. Option (a) is correct.

Explanation: An "Altruist" is someone who genuinely cares about other people's happiness and well-being. This describes a charitable individual who gives their time, money, or resources to alleviate suffering and improve human welfare in an agricultural or societal context.

Miscreant: A person who behaves badly, breaks the law, or commits a crime.

A Hedonist is someone who believes that the pursuit of one's own pleasure is the most significant objective in life. The term "slow-moving" is merely a way to describe something that moves slowly and has no bearing on philanthropy or personality traits.

10. Option (b) is correct.

Explanation: A person who attacks, rejects, or strongly disagrees with cherished beliefs, long-held traditional customs, and established social or religious institutions is known as an "Iconoclast," according to the dictionary. The literal translation of the term is "image-breaker." In the past, it was used to describe people who destroyed religious icons, but it is now used to describe any radical freethinker who defies conventional wisdom.

11. Option (d) is correct.

Explanation: An “Exodus” is the simultaneous departure or arrival of a large number of people. The term has historically taken advantage of massive migrations of people fleeing difficult circumstances. Among the options provided, The Great Migration (which literally means a massive movement or relocation of people) serves as the closest operational synonym.

12. Option (a) is correct.

Explanation: A person who is able to endure suffering, hardship, or emotional shifts without expressing their feelings or complaining is known as a stoic. A stoic maintains an indifferent, steady mind regardless of whether a situation is subjectively “good” or “bad” because they practice absolute detachment from it.

- Casual: Showing little concern or acting in an informal, relaxed way, but it does not represent deep psychological indifference to pleasure and pain.
- An optimist is someone who always sees the bright side and hopes for the best.
- Smuggler: A criminal who illegally moves goods across borders for monetary profit.

13. Option (a) is correct.

Explanation: The idiom “to give wide latitude” means to grant someone freedom, flexibility, and independence of action. Latitude is a metaphor for giving someone the “elbow room” to complete a task or make decisions without strict rules or micromanagement. It comes from navigation, where latitude implies scope and width. As a result, the choice (a) is correct. Options (b) and (d) are incorrect distractors that falsely relate to praise or physical comfort. A common trap is option (c), to avoid or stay away from someone. “to give a wide berth” is a completely different nautical expression that it actually defines. “Wide latitude” focuses solely on providing operational autonomy, whereas “wide berth” refers to maintaining a safe distance from a danger or person.

14. Option (c) is correct.

Explanation: • **The Error in Part C:** The word “**informations**” is grammatically incorrect. In English, information is an **uncountable (mass) noun**. Uncountable nouns cannot take the plural “-s” or “-es” ending. Whether it refers to a single fact or a large pool of data, the word must always remain singular: **information**. If you need to express a plural quantity, you must use a phrase like “*pieces of information*.”

- Why Parts A & B are correct: Part A correctly uses the singular possessive pronoun “*its*” to agree with the singular noun “resort.” Part B correctly formats the compound modifier “*state-of-the-art*” and uses the correct collective term “*gear*.”

15. Option (a) is correct.

Explanation: The incorrect use of a stative verb in the continuous tense in Part A is the source of the error. Because it refers to a state of mind, knowledge, or cognition rather than a physical act, the verb “know” is a stative verb. In English grammar, stative verbs cannot be used

in the progressive/continuous form (“is knowing”). They must, instead, be expressed in the straightforward present tense. Correction: “Neha knows the answer...” Part B & C: Grammatically correct. “asked by the interviewer” correctly modifies the noun phrase, and the preposition “to” pairs perfectly with “answer.”

16. Option (b) is correct.

Explanation: Collective nouns are unique to the animal group that is being discussed. A pride is a family of lions that live together and hunt together. For other animals, wolves travel in a “pack,” deer or cows gather in a “herd,” and “education” is a distractor word that does not apply here.

17. Option (a) is correct.

Explanation: A verb of action, “maintain” is the word. The standard English suffix “-ance” is added to turn it into a noun that describes the whole process of keeping something in good condition, resulting in the noun “maintenance.” Take a look at the other choices: “maintain” is the base verb, “maintenanced” is a non-standard verb form, and “maintainer” refers to a specific person or tool that maintains the system rather than the abstract concept itself.

18. Option (c) is correct.

Explanation: The well-known English proverb “to read between the lines” is completed by the correct choice. Discover a hidden, implied, or subtextual meaning that is not explicitly or clearly stated in the written words is the meaning of this expression. When considering a contract, words like “pages,” “words,” and “paragraphs” are incorrect because they violate the established structure of this particular idiomatic phrase.

19. Option (b) is correct.

Explanation: The sentence’s context describes a harmful, harmful act motivated by malicious intent (“spreading false rumors”). Therefore, the blank requires a word with a negative meaning. The word danger fits perfectly because ruining someone’s reputation poses a direct risk or threat to their social and professional standing. The other options are incorrect because they have positive or neutral meanings: advantage refers to a advantage, asset refers to a useful or valuable quality, and solace refers to comfort during a difficult time.

20. Option (c) is correct.

Explanation: The relationship between the original pair, **Prosperity** (wealth and success) and **Adversity** (hardship and misfortune), is one of direct **antonyms**, or opposites. To solve the analogy, we must find a pair among the options that share this same contrasting relationship. While *garrulous* and *talkative*, *turmoil* and *chaos*, and *beautiful* and *handsome* are all pairs of synonyms with similar meanings, **c) Protected : Vulnerable** is the only pair that consists of true antonyms. Just as prosperity is the opposite of adversity, being protected is the exact opposite of being vulnerable (exposed to harm), making it the perfect match.

21. Option (b) is correct.

Explanation: The initial couple's relationship is synonymous—it has the same meaning. Capricious means unpredictable or prone to sudden changes, which is a direct synonym for fickle. Exorbitant is an excellent synonym for expensive because it means unreasonable high or excessive. The other options are incorrect because they represent opposite pairs: unsteady vs. peaceful lack a direct relationship, while both selfish vs. altruistic and out of date vs. current are antonyms.

22. Option (a) is correct.

Explanation: To officially declare someone innocent of guilt or a criminal charge is to exonerate them. This is a direct synonym for release in both legal and general contexts, specifically when referring to the act of releasing someone from an accusation, liability, or legal bond. Taking a look at the other options, compromise means to come to an agreement by making concessions, call out means to challenge or summon someone, and impute guilt, which is the exact opposite of exonerate, means to blame someone or accuse them of a crime.

23. Option (b) is correct.

Explanation: This arrangement employs standard English syntax to construct a sentence that is grammatically logical:

(B) the relentless research team introduces our main subject.

(C) Working continuously is used as a modifier to describe the ongoing effort made by the team. (D) discovered a novel formula that supplies the primary predicate (the action verb and object). (A) The sentence ends with the infinitive phrase "to reach their goal," which explains the goal of their breakthrough.

24. Option (b) is correct.

Explanation: The standard English sentence structure syntactic rules are perfectly adhered to in this particular sequence. The phrase begins with an introductory participial modifier, (A) "Influenced in large part by his humble upbringing," which naturally requires the main subject to follow it immediately. This function is performed by "The charitable individual who cares," which introduces the statement's central subject. The sentence then seamlessly shifts into the active predicate verb phrase (B) "Devoted his entire life," which identifies the primary action of the subject. Finally, the statement comes to a logical conclusion with the infinitive phrase (D) "To help underprivileged communities." This gives the necessary destination and ultimate goal of that lifelong devotion, making the thought cohesive and grammatically correct.

25. Option (b) is correct.

Explanation: The entire text focuses on Egypt's role as a unique beacon of fascination, wealth, and spiritual depth for the ancient world. While the passage touches upon specific elements like Roman legions, architectural mastery, and treacherous desert travel routes, these

details merely serve as supporting evidence. The primary thematic focus is still on illuminating Egypt's vast historical majesty, cultural influence, and timeless pull on a variety of foreign populations throughout time.

26. Option (c) is correct.

Explanation: The opening lines make it clear that Egypt's "astonishing agricultural abundance, architectural mastery, and deep mysteries of the afterlife" captivated the Mediterranean world. The text makes a clear connection between the arrival of various visitors and these particular characteristics, indicating that merchants, armies, and scholars traveled there specifically to acquire those hidden wisdom and material riches. The other options introduce irrelevant geographic or political factors that are never cited as primary motivations within the passage's context.

27. Option (c) is correct.

Explanation: Rather than acting as temporary visitors or draining local resources, migrating populations like the Hyksos and Ptolemaic settlers chose to establish permanent roots along the Nile and fully integrate into the local society. They actively enriched the kingdom's heritage by constructing grand temples, introducing their own unique customs, and diversifying the region's artistic styles. By blending their traditions with existing ones, these groups did not dilute Egyptian identity; instead, they elevated the empire's overall grandeur and left a lasting, positive imprint on its historical legacy.

28. Option (d) is correct.

Explanation: The passage makes it clear that the first definitive artistic representations of the gryphon were found in the palatial frescoes of Bronze Age Crete, specifically in the Throne Room at Knossos, which belonged to the Minoan civilization. All other regions mentioned in the text, such as the Central Asian steppes (Scythians), the Persian Empire, and classical Greece, adopted and adapted the creature's mythic archetype much later in history.

29. Option (b) is correct.

Explanation: The Scythians reimagined the gryphon, describing it as an "avian-feline hybrid" and emphasizing its "eagle beak and sharp talons," according to the passage. It never says that they completely gave up their feline or lion-like characteristics. The claim that the lion's elements were completely dropped is inaccurate and directly contradicts the author's narrative because the creature's journey across cultures is explicitly defined as a hybrid by the text.

30. Option (c) is correct.

Explanation: The primary goal of the text is to trace the history of the gryphon from the Bronze Age in Crete all the way through Persia, Scythia, and classical Greece. It sheds light on the ways in which various ancient societies adopted the fundamental visual archetype and altered the physical characteristics of it to fit their particular cultural, royal, or spiritual frameworks. The comparisons between wings, horns, and protective roles are merely supporting details that serve this broader educational goal.

SECTION-B | NUMERAL ABILITY

31. Option (c) is correct.

Explanation: The required number is

$$\text{LCM}(18, 24, 30) + 5$$

Prime factors

$$18 = 2 \times 3^2$$

$$24 = 2^3 \times 3$$

$$30 = 2 \times 3 \times 5$$

$$\text{LCM} = 2^3 \times 3^2 \times 5$$

$$= 8 \times 9 \times 5 = 360$$

$$\text{Required number} = 360 + 5 = 365$$

32. Option (b) is correct.

Explanation: Let the original price be ₹100 per kg.

Suppose the family buys 100 kg.

Original expenditure

$$= 100 \times 100 = ₹10,000$$

$$\text{New price} = ₹125 \text{ per kg}$$

Let the new quantity be x kg.

$$\text{Then, } 125x = 10,000$$

$$x = 80 \text{ kg}$$

$$\text{Reduction} = 100 - 80 = 20 \text{ kg}$$

$$\text{Percentage reduction} = \left(\frac{20}{100} \right) \times 100 = 20\%.$$

33. Option (c) is correct.

Explanation: Total Cost Price = $80 \times 750 = ₹60,000$

To earn 20% profit,

$$\text{Required Selling Price} = 60,000 \times 120\% = ₹72,000$$

Only 72 calculators can be sold.

$$\text{Selling price per calculator} = 72,000 \div 72 = ₹1,000$$

34. Option (a) is correct.

Explanation: Total ratio = $3 + 5 + 8 = 16$

$$\text{Value of one part} = 9,600 \div 16 = ₹600$$

Initial amounts:

$$A = 3 \times 600 = ₹1,800$$

$$B = 5 \times 600 = ₹3,000$$

$$C = 8 \times 600 = ₹4,800$$

After A gives ₹300 to B:

$$A = ₹1,500$$

$$B = ₹3,300$$

$$C = ₹4,800$$

After B gives ₹500 to C:

$$A = ₹1,500$$

$$B = ₹2,800$$

$$C = ₹5,300$$

New ratio

$$= 1500 : 2800 : 5300$$

Divide all by 100, we have

$$= 15 : 28 : 53$$

Therefore, the correct ratio is 15 : 28 : 53.

35. Option (c) is correct.

Explanation: Lets observe the pattern carefully.

$$5 \times 2 + 1 = 11$$

$$11 \times 2 + 1 = 23$$

$$23 \times 2 + 1 = 47$$

$$47 \times 2 + 1 = 95$$

Continuing the same pattern, we have

$$95 \times 2 + 1 = 190 + 1$$

$$= 191$$

36. Option (c) is correct.

Explanation: Lets observe the pattern.

$$3 \times 2 + 1 = 7$$

$$7 \times 2 + 4 = 18$$

$$18 \times 2 + 11 = 47$$

$$47 \times 2 + 28 = 122$$

Now observe the added numbers:

$$1, 4, 11, 28$$

These follow the rule:

$$1 \times 2 + 2 = 4$$

$$4 \times 2 + 3 = 11$$

$$11 \times 2 + 6 = 28$$

$$28 \times 2 + 11 = 67$$

Therefore, Next term

$$= 122 \times 2 + 71$$

$$= 244 + 71$$

$$= 315$$

37. Option (a) is correct.

Explanation:

Step 1: Calculate the total volume of the cylinder.

We know that Volume = $\pi r^2 h$

Given,

$$\text{Radius} = 3.5 \text{ m}$$

$$\text{Height} = 8 \text{ m}$$

$$\pi = \frac{22}{7}$$

Now, Volume

$$= \left(\frac{22}{7} \right) \times 3.5 \times 3.5 \times 8$$

$$= \left(\frac{22}{7} \right) \times \left(\frac{22}{7} \right) \times \left(\frac{22}{7} \right) \times 8$$

$$= 308 \text{ cubic metres}$$

Step 2: Water occupies 80% of the tank.

$$\text{Water volume} = 308 \times \frac{80}{100} = 246.4 \text{ cubic metres}$$

Step 3: Convert cubic metres into litres.

$$1 \text{ cubic metre} = 1000 \text{ litres}$$

Water contained

$$= 246.4 \times 1000$$

$$= 2,46,400 \text{ litres}$$

38. Option (c) is correct.

Explanation:

Step 1: Volume of the large cube

$$\text{Volume} = \text{Side}^3 = 12^3 = 1728 \text{ cm}^3$$

Step 2: Volume of one small cube

$$= 3^3 = 27 \text{ cm}^3$$

Step 3: Number of small cubes

$$= 1728 \div 27 = 64$$

Alternatively,

Since each side becomes one-fourth,

Number of cubes

$$= (12 \div 3)^3$$

$$= 4^3$$

$$= 64$$

39. Option (a) is correct.

Explanation:

Step 1: To calculate the incorrect total.

$$\text{Mean} = 46$$

Number of observations = 18

$$\text{Incorrect total} = 46 \times 18 = 828$$

Step 2: Correct the total.

$$\text{Recorded value} = 82$$

$$\text{Actual value} = 28$$

$$\text{Difference} = 54$$

$$\text{Correct total} = 828 - 54 = 774$$

Step 3: Find the correct mean.

$$\text{Correct mean} = 774 \div 18 = 43$$

40. Option (c) is correct.

Explanation:

Step 1: Use the average formula.

$$\text{Average} = \text{Total Marks} \div \text{Number of Students}$$

Therefore,

$$\text{Total Marks} = \text{Average} \times \text{Number of Students}$$

$$= 68 \times 30$$

$$= 2040$$

Step 2: Verification using the two groups.

First 18 students

$$= 18 \times 65$$

$$= 1170$$

Last 12 students

$$= 12 \times 72.5$$

$$= 870$$

$$\text{Total} = 1170 + 870$$

$$= 2040$$

The given group averages also confirm the result.

41. Option (c) is correct.

Explanation: To cross the platform completely, the train covers:

$$\text{Distance} = \text{Length of train}$$

$$+ \text{Length of platform}$$

$$= 240 + 360$$

$$= 600 \text{ m}$$

Use the speed formula:

$$\text{Speed} = \text{Distance} \div \text{Time}$$

$$= 600 \div 30$$

$$= 20 \text{ m/s}$$

Convert into km/h:

$$20 \times \frac{18}{5} = 72 \text{ km/h}$$

42. Option (b) is correct.

Explanation:

Step 1: Calculate the time taken for each part.

Time for first part

$$= 180 \div 60$$

$$= 3 \text{ hours}$$

Time for second part

$$= 120 \div 40$$

$$= 3 \text{ hours}$$

Step 2: To find the total distance and total time.

$$\text{Total distance} = 180 + 120$$

$$= 300 \text{ km}$$

$$\text{Total time} = 3 + 3$$

$$= 6 \text{ hours}$$

Step 3: Calculate the average speed.

$$\text{Average Speed} = \text{Total Distance} \div \text{Total Time}$$

$$= 300 \div 6$$

$$= 50 \text{ km/h}$$

43. Option (b) is correct.

Explanation: Downstream speed

$$= 45 \div 3$$

$$= 15 \text{ km/h}$$

Upstream speed

$$= 45 \div 5$$

$$= 9 \text{ km/h}$$

Let:

$$\text{Boat speed} = B \text{ km/h}$$

$$\text{Stream speed} = S \text{ km/h}$$

Then,

$$B + S = 15 \quad \dots(1)$$

$$B - S = 9 \quad \dots(2)$$

Adding the two equations (1) and (2), we have

$$2B = 24$$

$$B = 12 \text{ km/h}$$

44. Option (b) is correct.

Explanation: Let the speed of the boat in still water be x km/h.

Then,

$$\text{Downstream speed} = x + 3$$

$$\text{Upstream speed} = x - 3$$

Since the times are equal, so we have

$$\frac{36}{(x + 3)} = \frac{24}{(x - 3)}$$

Cross-multiplying, we have

$$36(x - 3) = 24(x + 3)$$

$$36x - 108 = 24x + 72$$

$$12x = 180$$

Therefore $x = 15 \text{ km/h}$

45. Option (a) is correct.

Explanation:

Step 1: To find the slant height.

Slant height (l)

$$\begin{aligned} &= \sqrt{(r^2 + h^2)} \\ &= \sqrt{(7^2 + 24^2)} \\ &= \sqrt{(49 + 576)} \\ &= \sqrt{625} \\ &= 25 \text{ cm} \end{aligned}$$

Step 2: Apply the formula.

Curved Surface Area (CSA) = πrl

$$\begin{aligned} &= \left(\frac{22}{7}\right) \times 7 \times 25 \\ &= 22 \times 25 \\ &= 550 \text{ cm}^2 \end{aligned}$$

46. Option (b) is correct.

Explanation:

Step 1: To calculate the volume of the tank.

$$\begin{aligned} \text{Volume} &= \text{Length} \times \text{Breadth} \times \text{Height} \\ &= 8 \times 6 \times 5 \\ &= 240 \text{ m}^3 \end{aligned}$$

Step 2: To calculate 75% of the volume.

$$\text{Water volume} = 240 \times \frac{75}{100} = 180 \text{ m}^3$$

Step 3: To convert to litres.

$$1 \text{ m}^3 = 1000 \text{ litres}$$

$$\text{Water contained} = 180 \times 1000 = 1,80,000 \text{ litres}$$

47. Option (a) is correct.

Explanation:

Step 1: To find the incorrect total weight.

$$\text{Average} = 58 \text{ kg}$$

$$\text{Number of students} = 25$$

$$\text{Incorrect total} = 25 \times 58 = 1450 \text{ kg}$$

Step 2: Correct the total.

$$\text{Recorded weight} = 74 \text{ kg}$$

$$\text{Actual weight} = 47 \text{ kg}$$

$$\text{Difference} = 27 \text{ kg}$$

$$\text{Correct total} = 1450 - 27 = 1423 \text{ kg}$$

Step 3: To calculate the correct average.

$$\text{Correct average} = 1423 \div 25 = 56.92 \text{ kg}$$

Hence, Answer (A) 56.92 kg

48. Option (b) is correct.

Explanation: Total marks of all students

$$= 40 \times 65 = 2600$$

Total marks of boys

$$= 25 \times 68 = 1700$$

Total marks of girls

$$= 2600 - 1700 = 900$$

Average marks of girls

$$= 900 \div 15 = 60$$

49. Option (b) is correct.

Explanation:

Step 1: Assume the original price.

Let the original price of the article be ₹100.

Step 2: Increase the price by 25%.

$$\text{Increase} = 25\% \text{ of ₹100}$$

$$\begin{aligned} &= \left(\frac{25}{100}\right) \times 100 \\ &= ₹25 \end{aligned}$$

New price

$$\begin{aligned} &= ₹100 + ₹25 \\ &= ₹125 \end{aligned}$$

Step 3: Let the required reduction be $x\%$.

The reduction should bring the price back to ₹100.

Reduction amount

$$\begin{aligned} &= ₹125 - ₹100 \\ &= ₹25 \end{aligned}$$

Percentage reduction

$$\begin{aligned} &= (\text{Reduction} \div \text{Increased Price}) \times 100 \\ &= (25 \div 125) \times 100 \\ &= 20\% \end{aligned}$$

50. Option (b) is correct.

Explanation: Let total work = LCM (20, 30, 60) = 60 units

$$A = 3 \text{ units/day}$$

$$B = 2 \text{ units/day}$$

$$C = 1 \text{ unit/day}$$

First 5 days (A + B + C):

Work done

$$\begin{aligned} &= (3 + 2 + 1) \times 5 \\ &= 6 \times 5 \\ &= 30 \text{ units} \end{aligned}$$

Remaining work

$$\begin{aligned} &= 60 - 30 \\ &= 30 \text{ units} \end{aligned}$$

Next 5 days (B + C):

Work done

$$\begin{aligned} &= (2 + 1) \times 5 \\ &= 3 \times 5 \\ &= 15 \text{ units} \end{aligned}$$

Remaining work

$$\begin{aligned} &= 30 - 15 \\ &= 15 \text{ units} \end{aligned}$$

C alone:

Time required

$$\begin{aligned} &= 15 \div 1 \\ &= 15 \text{ days} \end{aligned}$$

SECTION-C | REASONING & MILITARY APTITUDE

51. Option (c) is correct.

Explanation: Logic: Each letter moves +2 and the number increases by +5.

$$1^{\text{st}}: C + 2 = E, E + 2 = G,$$

$$G + 2 = I, I + 2 = K$$

$$2^{\text{nd}}: O + 2 = Q, Q + 2 = S,$$

$$S + 2 = U, U + 2 = W$$

$$3^{\text{rd}}: B + 2 = D, D + 2 = F,$$

$$F + 2 = H, H + 2 = J$$

$$\text{Number: } 5 + 5 = 10, 10 + 5 = 15,$$

$$15 + 5 = 20, 20 + 5 = 25$$

$$\text{Missing term} = \text{KWJ } 25$$

52. Option (d) is correct.

Explanation:

Option A – the common area of rectangle, square and circle is not present.

Option B – the common area of the triangle, circle and rectangle is not present.

Option C – the common area of triangle, circle and rectangle is not present.

Option D – all the common area are present.

Hence, the correct answer is option (d).

53. Option (b) is correct.

Explanation: According to the given information, seating arrangements will be:

As per the diagram, B sits on the extreme left end.

Hence, the correct answer is option (b).

54. Option (d) is correct.

Explanation: Logic: 1st letter + 1, 2nd letter - 2, 3rd letter + 3 and 4th letter - 4 place.

For, 1st letter

$$U + 1 = V, V + 1 = W,$$

$$W + 1 = X, X + 1 = Y$$

For, 2nd letter

$$Q - 2 = O, O - 2 = M, M - 2 = K, K - 2 = I$$

For, 3rd letter

$$M + 3 = P, P + 3 = S, S + 3 = V, V + 3 = Y$$

For, 4th letter

$$I - 4 = E, E - 4 = A, A - 4 = W, W - 4 = S$$

So, the missing term is XKVW.

55. Option (d) is correct.

Explanation: The mirror image of

Hence, the correct answer is option (d).

56. Option (d) is correct.

Explanation: According to the question, possible blood relation tree:

So, the person in the photograph is Rajat's son.

Hence, the correct answer is option (d).

57. Option (b) is correct.

Explanation: Hyundai, Ford and Toyota are automobile manufacturers.

Apple is a technology company (not a car brand).

So, Apple brand doesn't fit.

Hence, the correct answer is option (b).

58. Option (b) is correct.

Explanation: The mirror image of a 12-hour clock is 3 : 25,

Formula $\rightarrow 11 : 60 - \text{hh:mm}$

(h $\rightarrow$ hour, m $\rightarrow$ minute)

$$11 : 60 - 3 : 25 = 8 : 35,$$

Thus, the actual time of 3:25 will be 8:35

59. Option (d) is correct.

Explanation: According to the question:

Shaan should drive 1 km to the east in order to reach Point A again.

Hence, the correct answer is option (d).

60. Option (d) is correct.

Explanation: P is 17th from the left end and 23rd from the right end.

Q is in the middle of the row.

The total number of students

$$= 17 + 23 - 1 = 39$$

(subtracting 1 because we counted P twice).

The middle position in a row of 39 students is the 20th position.

61. Option (d) is correct.

Explanation: The series:

$$12 + 18 = 30$$

$$30 + 36 = 66$$

$$66 + 72 = 138$$

$$138 + 144 = 282$$

$$282 + 288 = 570$$

$$\text{So, ?} = 282$$

62. Option (a) is correct.

Explanation: Blood is classified as a connective tissue because it has a fluid matrix (plasma) and cells (such as red blood cells, white blood cells and platelets).

Similarly, Bones are a type of connective tissue.

63. Option (c) is correct.

Explanation: Logic:

First number³ + 3 = Second number

$$2^3 = 8 \rightarrow 8 + 3 = 11$$

$$1^3 = 1 \rightarrow 1 + 3 = 4$$

C. 5 : 128

$$5^3 = 125 \rightarrow 125 + 3 = 128$$

64. Option (d) is correct.

Explanation:

I. Some guns are bats. → True

II. All bats are roses. → False

So, only conclusion (I) follows.

65. Option (b) is correct.

Explanation: After unfolding the given figure following cuts will be shown as given below.

Hence, the correct answer is option (B).

66. Option (a) is correct.

Explanation:

So, there are **NINE (9)** such insurance agents are there who are drivers but NOT healthy.

Hence, the correct answer is option (a).

67. Option (b) is correct.

Explanation: Logic: Letters are decreasing - 3 place.

For, JRO : GOL

$$J - 3 = G, R - 3 = O, O - 3 = L$$

For, HER : EBO

$$H - 3 = E, E - 3 = B, R - 3 = O$$

Similarly,

STL : ?

$$S - 3 = P, T - 3 = Q, L - 3 = I$$

So, STL : PQI

Hence, the correct answer is option (B).

68. Option (c) is correct.

Explanation: Given: 24 P 4 S 28 R 12 Q 6

After replacing the sign

$$= 24 \div 4 - 28 + 12 \times 6$$

$$= 6 - 28 + 12 \times 6$$

$$= 6 - 28 + 72$$

$$= 78 - 28$$

$$= 50 \text{ (Correct)}$$

69. Option (d) is correct.

Explanation: The series:

So,

$$? = 52$$

Hence, the correct answer is option (d).

70. Option (a) is correct.

Explanation: Logic:

1st letter - 5 = 3rd letter and 2nd letter - 6 = 4th letter

Now, we check each options.

Option (a): LP-GI (Not Follow)

$$L - 5 = G, P - 6 \neq I$$

Option (b): NR-IL (Follow)

$$N - 5 = I, R - 6 = L$$

Option (c): QU-LO (Follow)

$$Q - 5 = L, U - 6 = O$$

Option (d): JN-EH (Follow)

$$J - 5 = E, N - 6 = H$$

So, LP-GI is the odd one.

Hence, the correct answer is option (A).

71. Option (b) is correct.

Explanation: We know that a bird is the real creature that can fly.

The real bird is called elephant. (because Bird → Elephant)

So, the answer should be: Elephant

Hence, the correct answer is option (b).

72. Option (d) is correct.

Explanation: Logic:

$$2^{\text{nd}} \text{ number} = 1^{\text{st}} \text{ number} \times 1.5$$

$$3^{\text{rd}} \text{ number} = 2^{\text{nd}} \text{ number} \times 1.25$$

Set (16, 24, 30)

$$16 \times 1.5 = 24$$

$$24 \times 1.25 = 30$$

Similarly, (40, 60, 75) → Pattern Follow

$$40 \times 1.5 = 60$$

$$60 \times 1.25 = 75$$

Hence, the correct answer is option (d).

73. Option (b) is correct.

Explanation: The correct embedded figure is shown below.

Hence, the correct answer is option (D).

74. Option (d) is correct.

Explanation:

Conclusions:

I. Some cucumbers are capsicums. (Follow)

II. All gourds are capsicums. (Not follow)

III. All chillies are gourds. (Follow)

So, Only conclusions I and III follow.

Hence, the correct answer is option (b).

75. Option (a) is correct.

Explanation: Logic:

Sum of place value of letters = Number

For, CELL – 32

$$= 3 + 5 + 12 + 12$$

$$= 32$$

For, PHONE – 58

$$= 16 + 8 + 15 + 14 + 5$$

$$= 58$$

Similarly,

BOLD – ?

$$= 2 + 15 + 12 + 4$$

$$= 33$$

So, BOLD is coded as 33.

Hence, the correct answer is option (a).

SECTION-D | GENERAL KNOWLEDGE

76. Option (c) is correct.

Explanation: Air Marshal Jasvir Singh Mann assumed charge as the Air Officer Commanding-in-Chief (AOC-in-C) of the Southern Air Command on 1 July 2026, succeeding Air Marshal Manish Khanna. A highly experienced fighter pilot, he has logged over 3,000 flying hours on aircraft including the Apache, MiG-21, Jaguar, MiG-29, Su-30 and Rafale. His appointment reflects the Indian Air Force's emphasis on experienced operational leadership.

77. Option (a) is correct.

Explanation: The Igu dance of the Mishmi tribe and Ka Fiphai (Ghost Dance) of the Khamti community are traditional cultural performances of Arunachal Pradesh. The Igu dance is performed by shamans during rituals to ward off evil spirits and seek divine blessings, while Ka Fiphai is presented during religious festivals to depict spiritual beliefs and ancestral traditions. Both reflect the rich tribal heritage of the state.

78. Option (a) is correct.

Explanation: Hayabusa 2 is a deep-space exploration mission operated by the Japan Aerospace Exploration Agency (JAXA). The spacecraft is renowned for successfully collecting samples from asteroid Ryugu and returning them to Earth in 2020. Its recent flyby of asteroid Torifune demonstrates JAXA's continued expertise in asteroid exploration and planetary science, contributing valuable knowledge about the origin and evolution of the Solar System.

79. Option (b) is correct.

Explanation: AUSTRALIND 2024 was conducted in Pune, Maharashtra, as a bilateral military exercise between the Indian Army and the Australian Army. The exercise focused on enhancing interoperability, tactical coordination, counter-terrorism operations and peacekeeping capabilities. It strengthened defence cooperation under the India–Australia Comprehensive Strategic Partnership.

and reinforced their shared commitment to regional security in the Indo-Pacific.

80. Option (b) is correct.

Explanation: Chukker and Mallet are key terms associated with the sport of Polo. A chukker is a playing period, usually lasting about seven minutes, while a mallet is the long-handled stick used by players to strike the ball. Polo is one of the world's oldest equestrian sports and requires exceptional coordination between horse and rider. India has a rich polo tradition, particularly in Rajasthan and Manipur.

81. Option (b) is correct.

Explanation: The Kopra Reservoir became India's 95th Ramsar Site and the first Ramsar Site in Chhattisgarh. Recognised under the Ramsar Convention, it is an ecologically significant wetland supporting rich biodiversity, migratory birds and aquatic ecosystems. The designation highlights the importance of conserving wetlands for biodiversity, climate resilience, groundwater recharge and sustainable livelihoods.

82. Option (a) is correct.

Explanation: The Battle of Lexington and Concord, fought on 19 April 1775, marked the beginning of the American Revolutionary War between the Thirteen Colonies and Great Britain. Known as the 'shot heard round the world,' these battles initiated the American struggle for independence, which ultimately led to the formation of the United States of America through the Treaty of Paris (1783).

83. Option (b) is correct.

Explanation: The epiglottis is a leaf-shaped cartilaginous flap located at the entrance of the larynx. During swallowing, it folds over the windpipe to prevent food and liquids from entering the respiratory tract, directing them into the oesophagus instead. This protective mechanism prevents choking and aspiration, ensuring the proper separation of the digestive and respiratory systems.

84. Option (a) is correct.

Explanation: The Regional Cooperative Reform Conference in Mizoram was organised in line with Prime Minister Narendra Modi's vision of 'Sahkar se Samridhhi' (Prosperity through Cooperation). This initiative aims to strengthen the cooperative movement by improving governance, transparency and economic opportunities for farmers, artisans and rural communities. It aligns with the objectives of the Ministry of Cooperation, established in 2021.

85. Option (a) is correct.

Explanation: The Export-Import Bank of India (EXIM Bank) was established in 1982 under the Export-Import Bank of India Act, 1981. It is India's premier financial institution for promoting and financing international trade by providing export credit, overseas investment finance and trade facilitation services. EXIM Bank also supports Indian businesses in expanding their global presence and strengthening the country's export competitiveness.

86. Option (c) is correct.

Explanation: The Torrid Zone is the region lying between the Tropic of Cancer ($23\frac{1}{2}^{\circ}$ N) and the Tropic of Capricorn ($23\frac{1}{2}^{\circ}$ S). It experiences the highest temperatures because the Sun's rays fall vertically overhead at least once every year. Due to intense solar radiation, this zone generally has a warm climate throughout the year and includes extensive tropical forests, grasslands and deserts.

87. Option (b) is correct.

Explanation: The warm Kuroshio Current and the cold Oyashio Current meet off the eastern coast of Japan in the North Pacific Ocean. Their confluence creates dense fog and brings nutrient-rich waters to the surface, supporting abundant plankton growth. As a result, this region is one of the world's most productive fishing grounds, rich in tuna, salmon, sardines and other commercially important fish species.

88. Option (a) is correct.

Explanation: Statement 1 is incorrect because the 10 non-permanent members are elected for a two-year term, not three years.

Statement 2 is correct: substantive resolutions need 9 affirmative votes including the concurring votes of all five permanent members.

Statement 3 is incorrect because a permanent member's abstention is not a veto; the resolution can still pass if it gets the required votes.

89. Option (a) is correct.

Explanation: Acharya Ranchhodlal Goswami was selected for the Ustad Bismillah Khan Yuva Puraskar 2025 for his outstanding contribution to preserving and promoting Haveli Sangeet, a devotional musical tradition associated with the Pushtimarg sect of Vaishnavism. Instituted by the Sangeet Natak Akademi, the award recognises young artists who have made notable contributions to India's performing arts and cultural heritage.

90. Option (a) is correct.

Explanation: Exercise MALABAR is a major multilateral naval exercise involving the Indian Navy, United States Navy, Japan Maritime Self-Defense Force and the Royal Australian Navy. It aims to enhance maritime interoperability, anti-submarine warfare, humanitarian assistance and maritime security. The exercise supports the vision of a free, open, inclusive and rules-based Indo-Pacific, strengthening strategic cooperation among the four democracies.

91. Option (a) is correct.

Explanation: Chittaranjan Das, popularly known as Deshbandhu ('Friend of the Nation'), earned this title for his dedicated service during India's freedom struggle. A prominent leader of the Non-Cooperation Movement, he also founded the Swaraj Party in 1923 along with Motilal Nehru to promote constitutional methods for achieving self-government. He remains one of the leading nationalist figures of modern India.

92. Option (b) is correct.

Explanation: Awiqli is the world's first once-weekly basal insulin introduced in India for the treatment of adult diabetes mellitus. Designed to provide long-lasting blood glucose control, it reduces the need for daily insulin injections, improving patient convenience and treatment adherence. The innovation represents a significant advancement in diabetes management and aims to enhance the quality of life for people requiring insulin therapy.

93. Option (c) is correct.

Explanation: Adani Defence and Aerospace announced the establishment of South Asia's largest private-sector integrated missile manufacturing facility at Shivpuri, Madhya Pradesh. The project supports the 'Make in India' and Aatmanirbhar Bharat initiatives by boosting indigenous defence production, strengthening India's defence manufacturing ecosystem, generating employment and enhancing the country's self-reliance in advanced missile technologies.

94. Option (c) is correct.

Explanation: The World Day to Combat Desertification and Drought is observed every year on 17 June under the United Nations Convention to Combat Desertification (UNCCD). The day raises awareness about land degradation, desertification, drought resilience and sustainable land management. It highlights the importance of restoring degraded ecosystems to achieve environmental sustainability, food security and climate resilience.

95. Option (b) is correct.

Explanation: Statement 1 is incorrect because the DRDO conducted this specific flight test at the Integrated Test Range in Chandipur, Odisha, not Pokhran. Statement 2 is correct because the trial successfully validated the weapon system's user-defined minimum range of 60 kilometres. The guided rocket met all mission objectives, tracking accurately via telemetry, radar and electro-optical systems to hit its target with high precision.

96. Option (c) is correct.

Explanation: Silvana Tenreyro has been appointed as the Chief Economist and Director of the Research Department at the IMF. Announced by Managing Director Kristalina

Georgieva, the London School of Economics professor and former Bank of England policymaker will officially assume her duties on August 10, 2026. She succeeds Pierre-Olivier Gourinchas, who is returning to academia.

97. Option (b) is correct.

Explanation: The correct answer is Bishkek. The International Centre for Civilisational Studies 'Manas and Mahabharata' was officially inaugurated in Bishkek, Kyrgyzstan [indiatimes.com]. This collaborative platform between India's Centre for Studies of International Relations and the Manas National Academy promotes joint academic research [indiatimes.com]. It explores the deep philosophical ties between India's Mahabharata and Kyrgyzstan's national epic Manas, alongside launching the first-ever Hindi translation of Manas.

98. Option (c) is correct.

Explanation: Former India captain Sourav Ganguly became the 12th Indian cricketer overall—and the 10th Indian men's cricketer—to be inducted into the prestigious ICC Hall of Fame. The special honour was announced during the global body's annual conference in Edinburgh, coinciding with his 54th birthday. With this induction, he joins an illustrious group of legends that includes Sunil Gavaskar, Kapil Dev, Sachin Tendulkar and MS Dhoni.

99. Option (c) is correct.

Explanation: The 44th Constitutional Amendment Act, 1978 removed the Right to Property from the list of Fundamental Rights and made it a legal right under Article 300A. This change was intended to facilitate land reforms and socio-economic justice, not to abolish private property altogether. Private ownership of property continues to be recognised under Indian law, making the reason incorrect.

100. Option (b) is correct.

Explanation: According to the Happy City Index 2026 survey released by Time Out, Rajasthan's capital city, Jaipur, secured the 6th rank globally, making it the only Indian city to feature in the top 10 list. The index evaluates urban areas based on essential quality-of-life factors, including community bonds, local food, friendly neighbourhoods and cultural vibrancy. The global ranking was topped by Bath, England.

Sample Question Paper-4

Total Question: 100

Maximum Marks: 300

Instructions

- Total Number of Questions – 100. This Paper is divided in four sections.
 - SECTION-A | VERBAL ABILITY — 30 Questions
 - SECTION-B | NUMERAL ABILITY — 20 Questions
 - SECTION-C | REASONING & MILITARY APTITUDE — 25 Questions
 - SECTION-D | GENERAL KNOWLEDGE — 25 Questions
- Each Question carries of three marks. One mark is deducted for every wrong answer.
- No mark is awarded/deducted for un-attempted questions.

SECTION-A | VERBAL ABILITY

- Choose the word which is nearly opposite in meaning to the given word:
Obdurate
(a) Adamant (b) Obstinate
(c) Amenable (d) Inflexible
- The most suitable word for blank (2) is
(a) corroborate (b) subvert
(c) perpetuate (d) consolidate
- The most suitable word for blank (3) is
(a) perfunctory (b) inconsequential
(c) transformative (d) incidental
- The most suitable word for blank (4) is
(a) vindicates (b) undermines
(c) embellishes (d) obscures
- The most suitable word for blank (5) is
(a) stifle (b) impede
(c) foster (d) discourage
- The most suitable word for blank (6) is
(a) ossify (b) relinquish
(c) scrutinise (d) glorify
- In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
'A statement that appears self-contradictory but contains a deeper truth.'
(a) Hyperbole (b) Euphemism
(c) Paradox (d) Satire
- Choose the option which best expresses the meaning of the idiom given below.
'Burn one's bridges.'
(a) To damage one's reputation permanently
(b) To destroy all possible means of returning to an earlier position
(c) To betray a close companion for personal gain
(d) To abandon an impossible task midway
- Choose the option which best expresses the meaning of the idiom given below.
'Throw down the gauntlet.'
(a) To surrender gracefully after defeat
(b) To accept an unavoidable compromise
(c) To issue a bold challenge
(d) To conceal one's true intentions
- In the following question, one part of the sentence may contain an error. Identify that part. If there is no error, choose 'No Error'.
Neither the chairman nor the board members has expressed any dissatisfaction with the committee's recommendations.
(a) Neither the chairman
(b) nor the board members
(c) has expressed any dissatisfaction
(d) No Error

11. In the following question, one part of the sentence may have an error. Find out which part of the sentence has an error. If there is no error, choose 'No Error'.
No sooner had the negotiations resumed than the delegates begins to raise objections regarding the revised agreement.
- No sooner had the negotiations resumed
 - than the delegates begins
 - to raise objections regarding the revised agreement
 - No error
12. What is the synonym of the word 'MENDACIOUS'?
- Candid
 - Deceitful
 - Benign
 - Taciturn
13. Choose the option that best defines the given phrase.
'A Pyrrhic victory'
- A victory achieved through diplomacy
 - A victory won without opposition
 - A victory gained at such a great cost that it is almost a defeat
 - A victory celebrated by the entire nation
14. Choose the option that best defines the given phrase.
'To move the goalposts'
- To alter the rules or conditions unfairly after the process has begun
 - To complete a task ahead of schedule
 - To postpone an important decision indefinitely
 - To negotiate from a position of weakness
15. Choose the option that best defines the given word.
'Iconoclast'
- A person who blindly follows traditions
 - A person who attacks or challenges established beliefs and institutions
 - A collector of historical artefacts
 - A scholar specialising in ancient languages
16. Choose the most appropriate option to complete the sentence.
Although the scientist's theory was initially dismissed as speculative, subsequent discoveries served to _____ his claims.
- invalidate
 - corroborate
 - diminish
 - obscure
17. Choose the correct noun form of the word 'Abstain'.
- Abstinence
 - Abstainer
 - Abstention
 - Abstaining
18. In the following question, there is a related pair of words given. Choose the pair that best expresses the same relationship.
Cartographer : Map
- Botanist : Fossil
 - Lexicographer : Dictionary
 - Archaeologist : Telescope
 - Astronomer : Compass
19. In the following question, there is a related pair of words given. Choose the pair that best expresses the same relationship.
Panacea : Cure
- Mirage : Illusion
 - Catalyst : Reaction
 - Fortress : Defence
 - Epidemic : Medicine
20. Choose the word which best expresses the meaning of the given word.
'Equanimity'
- Impulsiveness
 - Composure
 - Resentment
 - Hesitation
21. Rearrange the following sentences to form a coherent paragraph.
- Consequently, governments across the world have begun investing heavily in renewable sources of energy.
 - The increasing frequency of extreme weather events has intensified concerns about climate change.
 - Such investments are expected to reduce dependence on fossil fuels while promoting sustainable development.
 - Scientists have repeatedly warned that delaying corrective measures will significantly increase environmental risks.
- 4 - 2 - 1 - 3
 - 2 - 4 - 1 - 3
 - 1 - 3 - 2 - 4
 - 2 - 1 - 4 - 3
22. Choose the word which is nearly opposite in meaning to the given word.
Ubiquitous
- Omnipresent
 - Rare
 - Universal
 - Pervasive
- Directions (Q. Nos. 23–25):** Read the passage carefully and answer the questions that follow.
- The rapid integration of Artificial Intelligence into decision-making processes has generated considerable optimism as well as apprehension. Advocates argue that AI systems can analyse vast quantities of data with remarkable speed and accuracy, thereby minimising human error in sectors such as healthcare, finance and disaster management. Critics, however, contend that algorithmic decisions often reflect the biases embedded within the data on which they are trained. Consequently, the appearance of objectivity may conceal structural inequalities rather than eliminate them. Moreover, excessive reliance on automated systems could gradually erode human judgement, particularly in situations demanding ethical reasoning or contextual sensitivity. The challenge, therefore, lies not in replacing human intelligence but in designing systems that complement it. Effective governance requires transparency, accountability and continuous human oversight to ensure that technological advancement serves society without compromising fairness or individual rights.
23. The central idea of the passage is
- Artificial Intelligence should completely replace human decision-making.
 - AI has failed to improve efficiency in modern industries.
 - AI should be used responsibly with adequate human supervision.
 - Ethical concerns surrounding AI are largely exaggerated.

24. According to the passage, algorithmic bias primarily results from
 (a) excessive government regulations.
 (b) the inability of computers to process information.
 (c) prejudices present within the training data.
 (d) the shortage of skilled software engineers.
25. Which of the following can be logically inferred from the passage?
 (a) Human judgement will soon become unnecessary.
 (b) Transparency and accountability are essential for the responsible use of AI.
 (c) AI is incapable of analysing complex information accurately.
 (d) Ethical reasoning can be entirely automated.
- Directions (Q. Nos. 26–30):** Read the passage carefully and answer the questions that follow.
- Economic growth is frequently regarded as the principal indicator of a nation's progress. While sustained economic expansion undoubtedly enhances employment opportunities and raises living standards, it does not automatically guarantee social well-being. Income inequality, environmental degradation and unequal access to education and healthcare may persist despite impressive growth statistics. Increasingly, economists argue that development should be assessed through broader indicators such as human capital, institutional quality, environmental sustainability and overall quality of life. A nation that prioritises long-term resilience over short-term gains is often better equipped to withstand economic shocks and social disruptions. Consequently, policymakers are encouraged to adopt strategies that balance economic efficiency with social equity, ensuring that prosperity is both inclusive and sustainable.
26. The author suggests that economic growth alone
 (a) eliminates poverty permanently.
 (b) is sufficient to measure national development.
 (c) cannot fully represent a nation's overall progress.
 (d) always improves environmental conditions.
27. Which of the following is NOT mentioned as a broader measure of development?
 (a) Human capital
 (b) Environmental sustainability
 (c) Institutional quality
 (d) Military expenditure
28. The tone of the passage is
 (a) Satirical (b) Informative
 (c) Emotional (d) Cynical
29. Which of the following statements is supported by the passage?
 (i) Economic growth automatically ensures social equality.
 (ii) Sustainable development requires balancing efficiency with equity.
 (iii) Long-term resilience is important for national progress.
 (iv) Quality of life should be considered while assessing development.
 (a) ii and iii only (b) i and iv only
 (c) ii, iii and iv only (d) i, ii and iii only
30. The primary purpose of the passage is to
 (a) criticise globalisation.
 (b) explain why economic growth is the only measure of prosperity.
 (c) advocate a multidimensional approach to national development.
 (d) compare developing countries with developed economies.

SECTION-B | NUMERAL ABILITY

31. The least number which when divided by 18, 24 and 30 leaves a remainder of 5 in each case is:
 (a) 355 (b) 365 (c) 375 (d) 385
32. How many numbers between 100 and 500 are divisible by 9 as well as 12?
 (a) 10 (b) 11 (c) 12 (d) 13
33. A shopkeeper increases the marked price of an article by 20% and then allows a discount of 15%. What is the net percentage change in the selling price compared to the original price?
 (a) 2% increase (b) 2% decrease
 (c) 4% increase (d) No change
34. The population of a town increases by 20% in the first year and decreases by 10% in the second year. If the present population is 10,800, what was the population two years ago?
 (a) 9,800 (b) 10,000 (c) 10,200 (d) 10,500
35. A shopkeeper marks an article 40% above the cost price. He allows a 10% discount on the marked price. If the cost price is ₹2,500, find his profit percentage.
 (a) 24% (b) 25% (c) 26% (d) 28%
36. A trader sells an article for ₹4,320 after allowing a 10% discount on the marked price. If he still makes a 20% profit on the cost price, what is the marked price?
 (a) ₹4,600 (b) ₹4,700 (c) ₹4,800 (d) ₹4,900
37. The ratio of the incomes of A and B is 7 : 9 and the ratio of the incomes of B and C is 3 : 5. If the total income of A, B and C is ₹1,86,000, find the income of B.
 (a) ₹45,000 (b) ₹54,000 (c) ₹63,000 (d) ₹72,000
38. A sum of ₹18,000 is divided among A, B and C in the ratio 2 : 5 : 8. If A gives ₹600 to B and B gives ₹900 to C, what is the new ratio of their amounts?
 (a) 6 : 19 : 35 (b) 5 : 18 : 35
 (c) 6 : 18 : 34 (d) 7 : 19 : 36
39. The average age of 18 students is 21 years. If the teacher joins the group, the average age becomes 22 years. Find the age of the teacher.
 (a) 38 years (b) 40 years (c) 41 years (d) 43 years
40. The average marks of 12 students is 68. If the highest and lowest marks, which are 92 and 44 respectively,

- are removed, what is the new average of the remaining students?
 (a) 66 (b) 67 (c) 68 (d) 69
41. A can complete a piece of work in 12 days, B in 18 days and C in 36 days. If all three work together from the beginning, in how many days will the work be completed?
 (a) 5 days (b) 6 days (c) 7 days (d) 8 days
42. A sum amounts to ₹19,360 in 2 years at 10% per annum compounded annually. Find the principal.
 (a) ₹15,000 (b) ₹16,000 (c) ₹17,000 (d) ₹18,000
43. A sum of money becomes ₹13,310 in 3 years at 10% compound interest per annum. Find the principal.
 (a) ₹9,500 (b) ₹10,000 (c) ₹10,500 (d) ₹11,000
44. A hollow cylindrical pipe has an external radius of 10 cm, an internal radius of 8 cm and a height of 35 cm. Find the volume of the material used. (Take $\pi = \frac{22}{7}$)
 (a) 3,960 cm³ (b) 3,980 cm³
 (c) 3,850 cm³ (d) 4,120 cm³
45. A solid cuboid measures 18 cm × 15 cm × 12 cm. It is melted and recast into cubes of side 3 cm each. How many cubes are formed?
 (a) 100 (b) 110 (c) 120 (d) 130
46. The average marks of 24 students in a class are 68. If the average marks of the first 15 students are 72, then the average marks of the remaining 9 students are:
 (a) 60 (b) 61.33 (c) 62 (d) 64
47. The average of 20 observations is 48. Later, it is found that one observation was wrongly entered as 36 instead of 63. What is the correct average?
 (a) 48.75 (b) 49.20 (c) 49.35 (d) 50
48. Find the next term in the following series:
 8, 17, 36, 75, 154, ?
 (a) 309 (b) 311 (c) 313 (d) 315
49. Find the missing term.
 2, 6, 15, 31, 56, ?
 (a) 92 (b) 93 (c) 94 (d) 95
50. A bag contains 5 red, 4 blue and 3 green balls. Two balls are drawn without replacement. What is the probability that both balls are of the same colour?
 (a) $\frac{19}{66}$ (b) $\frac{17}{66}$ (c) $\frac{21}{66}$ (d) $\frac{23}{66}$

SECTION-C | REASONING & MILITARY APTITUDE

51. Select the option that represents the letters that, when sequentially placed from left to right in the following blanks, will complete the letter-series.
 A _ T _ N _ M T U _ A M _ _ N _ M T U _
 (a) MUNATUAN (b) MUNTUAUN
 (c) MUANTUAN (d) MUNATAUN
52. Select the option that is related to the third figure in the same way as the second figure is related to the first figure.
- 
::

::

::

- (a)  (b) 
 (c)  (d) 
53. Which option represents the correct order of the given words as they would appear in an English dictionary?
 1. Visible 2. Victorious
 3. Viewership 4. Visitor
 5. Vindictive
 (a) 5, 2, 1, 3, 4 (b) 4, 1, 5, 3, 2
 (c) 5, 2, 4, 1, 3 (d) 2, 3, 5, 1, 4
54. Read the given statement(s) and conclusions carefully. Assuming that the information given in the statement(s) is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statement(s).
 Statements:
 1. All vans are utilities.
 2. All trucks are utilities.
 Conclusions:
 I. Some vans are trucks.
 II. Some utilities are trucks.
 (a) Only conclusion II follows.
 (b) Only conclusion I follows.
 (c) Neither conclusion I nor II follows.
 (d) Both conclusions I and II follows.
55. DEAR is related to MMJZ in a certain way based on the English alphabetical order. In the same way, NOYX is related to WWHE. To which of the given options is NMZU related, following the same logic?
 (a) XERT (b) XUDI (c) WUIC (d) XUIO
56. Pointing to Jayant, Gita said 'He is the only son of Rajbir, who has two sisters and one of them is Anshika'. Dhroov is the brother of Geetam. Rajbir is the paternal grandfather of Geetam, who is the daughter of Gita. Then how Jayant is related to Gita?
 (a) Husband (b) Sister's husband
 (c) Brother (d) Father
57. Identify the correct water reflection of the question-image among the options provided.
- MODEL
- (a) M O D E Γ (b) W O D E Γ
 (c) J E D O M (d) M O D E Γ

58. Which figure should replace the question mark (?) in the following series to continue the pattern?

- (a)

C	△
△	
I	A

 (b)

△	△
	I
A	C
- (c)

△	C
	△
A	I

 (d)

A	I
	△
△	C

59. Select the term from among the given options that can replace the question mark (?) in the following series.

SUM 21, QVP 15, ?, MXV 3, KYY -3

- (a) QWS 9 (b) PSP 8 (c) QRP 9 (d) PSR 8

60. Based on the English alphabetical order, three of the following four letter-cluster pairs are alike in a certain way and thus form a group. Which letter-cluster pair DOES NOT belong to that group?

(Note: The odd one out is not based on the number of consonants/ vowels or their position in the letter-cluster pair.)

- (a) KO-ON (b) EG-HG (c) CE-FE (d) UW-XW

61. In a certain code language,

'A + B' means 'A is the son of B'

'A - B' means 'A is the brother of B'

'A × B' means 'A is the wife of B'

'A ÷ B' means 'A is the father of B'

Based on the above, how is C related to M if 'C + V ÷ R - N × M'?

- (a) Brother (b) Wife's father
(c) Wife's brother (d) Father

62. In a certain code language, 'PROOF' is written as 'BKKNL'. What is the code for 'QUEEN' in that code language?

- (a) JAARM (b) JAAQN (c) JAAPM (d) JAAQM

63. What would be the word on the opposite side of 'Kiwi' if the given sheet is folded to form a cube?

- (a) Melon (b) Plum (c) Lime (d) Mango

64. A, B, C, D, E, F, G and H are sitting around a square table facing the centre of the table. Some of them are sitting at the corners while some are sitting at the

exact centre of the sides. F sits second to the right of G. F sits at one of the corners. Only three people sit between G and E when counted from the left of G. H sits third to the left of E. Only three people sit between H and B when counted from the left of H. C sits second to the right of B. D is not an immediate neighbour of E. How many people sit between E and D, when counted from the left of D?

- (a) Two (b) None
(c) More than two (d) One

65. Christian starts from Point A and drives 12 km towards east. He then takes a left turn, drives 7 km, turns left and drives 13 km. He then takes a left turn and drives 10 km. He takes a final left turn, drives 1 km and stops at Point P. How far (shortest distance) and towards which direction should he drive in order to reach Point A again? (All turns are 90 degrees turns only unless specified)

- (a) 4 km to the north (b) 3 km to the north
(c) 2 km to the north (d) 1 km to the north

66. According to the time in Vaishali's watch, it is quarter to 6. If the hour hand points towards the south, then in which direction does the minute hand point?

- (a) East (b) West (c) South (d) North

67. What should come in place of the question mark (?) in the given series?

56, 69.2, 72.2, 76.4, 88.4, 92.6, ?

- (a) 96.8 (b) 102.6 (c) 104.6 (d) 110.2

68. Study the given diagram carefully and answer the question. The numbers in different sections indicate the number of persons.

Which of the following numbers represents married trained teachers who are public school teachers?

- (a) 8 (b) 6 (c) 7 (d) 4

69. Seven people, A, B, C, D, E, F and G, are sitting in a row, facing north. Only two people sit to the left of A. Only three people sit between A and G. Only one person sits between G and B. E sits to the immediate left of C. D is not an immediate neighbour of G. How many people sit to the left of D?

- (a) 3 (b) 2 (c) 1 (d) 4

70. How many squares are there in the figure shown below?

- (a) 11 (b) 13 (c) 9 (d) 10
71. What will come in the place of the question mark (?) in the following equation, if '+' and '×' are interchanged and '-' and '÷' are interchanged?
 $42 \div 6 + 9 \times 84 - 4 = ?$
- (a) 15 (b) 11 (c) 9 (d) 20
72. Which of the following words cannot be formed from the letters of the word TELEGRAM?
- (a) GREAT (b) GEAR
(c) LATE (d) METALLIC
73. Which of the following option figures are combined to form the question figures?

A B C D

- (a) C and D (b) A and D
(c) B, C and D (d) C, D and A
74. A paper is folded and cut as shown below. How will it appear when unfolded.
-
- (a) (b)
(c) (d)
75. Select the letter-cluster from among the given options that can replace the question mark (?) in the following series.
- BEJOT, YBGLQ, VYDIN, ?
- (a) SVBGJ (b) SVBFJ (c) SUBDG (d) SVAFK

SECTION-D | GENERAL KNOWLEDGE

76. With reference to Lieutenant General Dhiraj Seth, consider the following statements:
1. Lieutenant General Dhiraj Seth was appointed as the next Chief of the Army Staff (COAS), succeeding General Upendra Dwivedi upon his retirement on June 30, 2026.
 2. Before this appointment, Lt Gen Dhiraj Seth served as the Vice Chief of the Army Staff and had a distinguished military career spanning several decades.
- Which of the above statements is/are correct?
- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2
77. The Madia Gond tribe's vibrant Bison Horn Maria dance, performed wearing traditional headgears to mimic the movements of a wild bison and the Muria tribe's festive Mandri dance, performed during weddings and expeditions, are mainly associated with which Indian state?
- (a) Jharkhand (b) Odisha
(c) Chhattisgarh (d) Madhya Pradesh
78. With reference to the Saras MkII aircraft project, which recently crossed a significant design phase milestone, consider the following statements:
1. It is India's first indigenously designed multi-purpose light transport aircraft in the 19-seater category.
 2. The aircraft has been designed and engineered by the Defence Research and Development Organisation (DRDO) specifically for strategic high-altitude military deployment.
3. It is uniquely engineered to operate from semi-prepared, short runways, making it highly compatible with the Centre's UDAN scheme.
- Which of the statements given above are correct?
- (a) 1 and 2 only (b) 2 and 3 only
(c) 1 and 3 only (d) 1, 2 and 3
79. Consider the following statements regarding the institutional framework and organising agencies behind Aero India 2027:
1. The airshow is organised under the comprehensive administrative framework of the Union Ministry of Civil Aviation.
 2. Hindustan Aeronautics Limited (HAL) serves as the nodal organising agency, with Bharat Electronics Limited (BEL) acting as a supporting organisation.
- Which of the statements given above is/are correct?
- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2
80. The terms 'Deuce', 'Smash', 'Let' and 'Love' are terms common to both Lawn Tennis and which of the following sports?
- (a) Table Tennis (b) Badminton
(c) Squash (d) Volleyball
81. Gogabeel Lake, an ecologically vital oxbow lake that has been designated as India's 94th Ramsar site of international importance, is located in which State?
- (a) West Bengal (b) Assam
(c) Bihar (d) Odisha

82. The Battle of El Alamein was famously associated with which of the following events?
 (a) World War I (b) World War II
 (c) Franco-Prussian War (d) Crimean War
83. Which of the following statements accurately describes the location and cellular origin of hormones within the hypothalamus?
 (a) It forms the dorsal part of the diencephalon in the forebrain and contains endocrine gland cells.
 (b) It forms the basal part of the diencephalon in the midbrain and contains neurosecretory cells called nuclei.
 (c) It forms the basal part of the diencephalon in the forebrain and contains neurosecretory cells called nuclei.
 (d) It forms the apical part of the telencephalon in the hindbrain and contains neuronal axons.
84. The BRICS Heads of Anti-Drug Agencies Meeting was held as part of India's BRICS Chairmanship 2026. What is the official theme designated for India's chairmanship cycle?
 (a) Foster BRICS Partnership for Global Stability and Shared Security
 (b) Building for Resilience, Innovation, Cooperation and Sustainability
 (c) Intra-BRICS Cooperation for Continuity, Consolidation and Consensus
 (d) BRICS and Africa: Partnership for Mutually Accelerated Growth
85. Which statutory financial institution, established in 1988 under an Act of Parliament, acts as the principal apex body to regulate, promote and refinance housing finance institutions at both local and regional levels?
 (a) Housing and Urban Development Corporation (HUDCO)
 (b) National Housing Bank (NHB)
 (c) Life Insurance Corporation of India (LIC)
 (d) State Bank of India (SBI)
86. Consider the following statements regarding the physical and geographical characteristics of the Atlantic Ocean:
 1. It is the second largest ocean in the world and is uniquely 'S' shaped.
 2. It is flanked by Europe and Africa on its western side and the Americas on its eastern side.
 3. Its highly irregular and indented coastline acts as a natural setting for harbours, making it the busiest ocean from a commercial standpoint.
 Which of the statements given above are correct?
 (a) 1 and 2 only (b) 2 and 3 only
 (c) 1 and 3 only (d) 1, 2 and 3
87. Which of the following descriptions accurately characterises an Atoll?
 (a) A steep underwater trench formed by the subduction of tectonic plates in tropical zones.
 (b) A low island found in tropical oceans consisting of coral reefs surrounding a central depression or lagoon.
 (c) A flat-topped volcanic plateau stretching across the abyssal plains of the Atlantic Ocean.
 (d) An underwater glacial deposit found exclusively in high-latitude polar oceans.
88. With reference to the International Court of Justice (ICJ), consider the following statements:
 1. The ICJ consists of 15 judges who are elected to nine-year terms by concurrent voting in the UNGA and the UNSC.
 2. In electing judges to the ICJ seat, the permanent members of the Security Council hold absolute veto powers over candidates.
 3. No two judges sitting on the ICJ bench may be nationals of the same state at any given time.
 Which of the statements given above are correct?
 (a) 1 and 2 only (b) 1 and 3 only
 (c) 2 and 3 only (d) 1, 2 and 3
89. The Indian contingent is set to wear sustainable jute-viscose blended apparel at the Commonwealth Games 2026, which will be hosted in which of the following cities?
 (a) Glasgow (b) Birmingham
 (c) Edinburgh (d) Cardiff
90. On 20th May 2026, the multilateral military exercise PRAGATI 2026 commenced at Umroi Military Station in?
 (a) Meghalaya (b) Jorhat
 (c) Dehradun (d) Pune
91. Consider the following statements regarding the execution and aftermath of the Rowlatt Satyagraha:
 1. The Indian National Congress structured the Rowlatt Satyagraha exclusively around closed-door legislative boycotts and official resignations.
 2. The escalating tensions and mobilisation under this mass movement directly culminated in the tragic Jallianwala Bagh massacre.
 Which of the statements given above is/are correct?
 (a) 1 only (b) 2 only
 (c) Both 1 and 2 (d) Neither 1 nor 2
92. The newly discovered exoplanet GJ 3378b, located about 25 light-years away from Earth, belongs to which of the following planetary classifications?
 (a) Hot Jupiter (b) Super-Earth
 (c) Mini-Neptune (d) Gas Giant
93. Which indigenous stealth frigate of the Indian Navy, built by Mazagon Dock Shipbuilders Limited (MDL) and designed by the Warship Design Bureau, was officially commissioned into service at the Naval Dockyard in Visakhapatnam?
 (a) INS Vindhyagiri (b) INS Taragiri
 (c) INS Mahendragiri (d) INS Himgiri
94. On 23rd March 2026, World Meteorological Day is observed globally. The theme for 2026 is?
 (a) Observing today, protecting tomorrow
 (b) Weather, Climate and Water
 (c) The Future of Weather Forecasting
 (d) Climate Change and Sustainable Development

95. With reference to bilateral defence cooperation between India and South Korea, consider the following statements:
1. The K9 Vajra-T is an indigenous Indian variant modelled on the South Korean K9 Thunder artillery platform.
 2. The K9 Vajra-T system is classified as a \$155\text{mm}\$ self-propelled tracked artillery gun.
- Which of the statements given above is/are correct?
- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2
96. Theoretical physicist Jainendra K. Jain, who received the prestigious Wolf Prize in Physics in June 2026, was born in which Indian state?
- (a) Haryana (b) Gujarat
(c) Uttar Pradesh (d) Rajasthan
97. In June 2026, which nation officially became the 10th member of the New Development Bank (NDB), making it the first Central Asian country to join?
- (a) Kazakhstan (b) Uzbekistan
(c) Kyrgyzstan (d) Tajikistan
98. Which country recently announced its decision to join the Global Biofuels Alliance (GBA) to strengthen international collaboration on clean energy?
- (a) New Zealand (b) Australia
(c) Canada (d) South Africa
99. **Assertion (A):** The 86th Constitutional Amendment Act, 2002, introduced Article 21A, making free and compulsory education a Fundamental Right for children aged 6 to 14 years.
Reason (R): The state recognised that achieving universal elementary education is vital for human resource development and the meaningful exercise of citizenship.
- (a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.
100. Which Indian educational institution emerged as the nation's top-ranked entity in the recently released QS World University Rankings 2027?
- (a) IISc Bangalore (b) IIT Bombay
(c) IIT Delhi (d) IIT Madras

Sample Question Paper-4

(Solution)

SECTION-A | VERBAL ABILITY

1. Option (c) is correct.

Explanation: 'Obdurate' means stubborn, unyielding, or refusing to change one's mind, so its opposite should describe someone who is agreeable or easily persuaded. 'Amenable' means agreeable and easily persuaded, making it the correct antonym. 'Adamant,' 'Obstinate,' and 'Inflexible' all share the same stubborn, unyielding meaning as obdurate rather than opposing it, so none of them qualify as the answer.

2. Option (b) is correct.

Explanation: The sentence contrasts the blank with 'reinforce' using 'rather than,' meaning the discoveries were dismissed because they seemed to undermine or subvert prevailing assumptions rather than support them. 'Subvert' fits this contrast exactly. 'Corroborate' and 'Consolidate' both mean to support or strengthen, matching 'reinforce' rather than opposing it, while 'Perpetuate' means to continue something indefinitely, which does not fit the oppositional structure at all.

3. Option (c) is correct.

Explanation: The sentence describes breakthroughs that 'redefine existing paradigms,' requiring a word that conveys major, significant change. 'Transformative' captures this sense of sweeping impact precisely. 'Perfunctory' suggests minimal effort, 'Inconsequential' suggests unimportance and 'Incidental' suggests something minor or coincidental — all of which contradict the weight the sentence gives to these breakthroughs.

4. Option (b) is correct.

Explanation: The sentence explains that hypotheses must be revised whenever fresh evidence challenges old conclusions, which is the basic principle of scientific revision. 'Undermines' fits this meaning of evidence weakening prior conclusions. 'Vindicates' means to prove something right, which would mean no revision is needed — the opposite of the intended logic — while 'Embellishes' and 'Obscures' do not logically trigger a revision of conclusions at all.

5. Option (c) is correct.

Explanation: The sentence describes a culture of rigorous, respectful debate in a positive light, so the blank should mean to encourage or promote innovation. 'Foster' fits this supportive meaning directly. 'Stifle,' 'Impede,' and 'Discourage' all carry negative, obstructive meanings that contradict the positive framing of the sentence.

6. Option (c) is correct.

Explanation: The passage emphasises intellectual humility and openness to revising one's own beliefs, calling for a word meaning to examine closely. 'Scrutinise' fits this idea of questioning one's own convictions. 'Ossify' means to become rigid or fixed in one's ways, the opposite of intellectual openness; 'Relinquish' means to give up entirely, which is too extreme compared to the disciplined questioning described; and 'Glorify' means to praise highly, contradicting the passage's emphasis on scrutiny rather than blind praise.

7. Option (c) is correct.

Explanation: A 'paradox' is defined exactly as a statement that appears self-contradictory but contains a deeper truth (for example, 'less is more'), making it the correct substitute for the given phrase. 'Hyperbole' refers to deliberate exaggeration for effect, 'Euphemism' refers to a mild expression replacing a harsher one and 'Satire' refers to using humor or irony to criticise something — none of which describe a self-contradictory truth.

8. Option (b) is correct.

Explanation: 'Burn one's bridges' means to eliminate any option of returning to a previous situation or position, matching option B exactly. Option A refers to permanent reputation damage in general rather than specifically cutting off retreat, option C describes betraying a close companion and option D describes abandoning a task midway — all of which are unrelated to the idiom's specific meaning.

9. Option (c) is correct.

Explanation: To issue a bold challenge

'Throw down the gauntlet' originates from the historical practice of throwing down a glove to challenge someone to a duel and now means to issue a bold challenge, matching option C. Option A describes surrendering, which is the opposite meaning, while options B and D describe accepting a compromise and concealing intentions, both unrelated to issuing a challenge.

10. Option (c) is correct.

Explanation: With 'neither...nor,' the verb should agree with the subject nearer to it, which here is 'board members' (plural), making 'have expressed' grammatically consistent with this rule. Parts (a) and (b) do not contain any grammatical fault on their own, so the sentence as

constructed follows the 'nearer subject' agreement rule correctly for neither...nor constructions.

11. Option (b) is correct.

Explanation: 'No sooner...than' requires the past perfect tense ('had resumed') to be followed by simple past tense in the second clause, so the sentence should read 'than the delegates began to raise objections.' Parts (a) and (c) are grammatically correct as written, so the error is isolated to the incorrect present-tense verb 'begins' in part (b).

12. Option (b) is correct.

Explanation: 'Mendacious' means untruthful or given to lying, which matches 'Deceitful' closely. 'Candid' means honest and straightforward, the opposite meaning, while 'Benign' means harmless or kind and 'Taciturn' means quiet or reserved, both unrelated to dishonesty.

13. Option (c) is correct.

Explanation: A 'Pyrrhic victory' is named after King Pyrrhus, whose military win came at such heavy losses that it was barely worth achieving, matching option C precisely. Option A describes a victory through diplomacy, option B describes a victory without opposition and option D describes a victory celebrated nationally — none of which relate to the idea of a costly, near-defeat win.

14. Option (a) is correct.

Explanation: 'To move the goalposts' means changing the criteria for success after a process has already started, often unfairly, matching option A. Option B describes completing a task early, option C describes postponing a decision and option D describes negotiating from weakness, all of which are unrelated to unfairly altering rules mid-process.

15. Option (b) is correct.

Explanation: An 'iconoclast' is someone who challenges or attacks established beliefs, traditions, or institutions, matching option B directly. Option A describes a person who blindly follows tradition, the opposite meaning, while options C and D describe a collector of artefacts and a scholar of ancient languages, both unrelated to challenging established beliefs.

16. Option (b) is correct.

Explanation: The word 'although' sets up a contrast: the theory was dismissed as speculative, but subsequent discoveries should have confirmed it. 'Corroborate' means to confirm, fitting this contrast correctly. 'Invalidate' means to prove wrong, which would not fit the contrast set up by 'although,' while 'Diminish' and 'Obscure' suggest weakening or hiding the claims, neither of which fits a positive sense of 'served to ___ his claims.'

17. Option (a) is correct.

Explanation: Abstain (verb) = to deliberately avoid or refrain from doing something.

Abstinence (noun) = the practice or state of abstaining.

Example:

He decided to abstain from alcohol.

His abstinence from alcohol improved his health.

18. Option (b) is correct.

Explanation: A cartographer creates a map and in the same way a lexicographer creates a dictionary, preserving the same creator-to-creation relationship. A botanist studies plants rather than fossils, an archaeologist does not create a telescope and an astronomer does not create a compass, so none of these pairs match the relationship as precisely.

19. Option (a) is correct.

Explanation: A panacea is claimed to cure everything but is often illusory or exaggerated and in the same way a mirage is an illusion of something that isn't real, matching the relationship of an overstated or illusory remedy. 'Catalyst : Reaction' represents a direct cause-and-effect relationship, while 'Fortress : Defence' and 'Epidemic : Medicine' are only loosely associated pairs that do not match the illusory-remedy relationship.

20. Option (b) is correct.

Explanation: 'Equanimity' means calmness and composure, especially under stress, matching option B directly. 'Impulsiveness' describes acting without thinking, 'Resentment' describes bitterness and 'Hesitation' describes indecision — none of which relate to calmness under pressure.

21. Option (b) is correct.

Explanation: Sentence 2 introduces the problem of extreme weather and climate change concern, making it the logical opener. Sentence 4 follows with scientists' warnings about the risks of delay, building urgency. Sentence 1 then shows the consequence of governments investing in renewables, since 'Consequently' links directly to the warning in sentence 4 and sentence 3 concludes with the effect of those investments. This creates a clear problem, warning, action and result sequence that the other orderings disrupt, for example by placing the 'Consequently' sentence before the warning it responds to.

22. Option (b) is correct.

Explanation: 'Ubiquitous' means present everywhere, so its direct opposite is 'Rare.' 'Omnipresent,' 'Universal,' and 'Pervasive' all mean widespread or existing everywhere, making them synonyms of ubiquitous rather than antonyms.

23. Option (c) is correct.

Explanation: The passage presents both the benefits and risks of AI, concluding that the real challenge lies in designing systems with proper human oversight, matching option C. Suggesting AI should completely replace human decision-making is an extreme position the passage never takes, claiming AI has failed to improve efficiency contradicts the passage's acknowledgment of its benefits and suggesting ethical concerns are exaggerated is not a claim the passage makes.

24. Option (c) is correct.

Explanation: The passage explicitly states that algorithmic decisions often reflect biases embedded within the data

on which they are trained, matching option C directly. Excessive government regulation, the inability of computers to process information and a shortage of skilled engineers are not mentioned anywhere in the passage.

25. Option (b) is correct.

Explanation: The passage explicitly calls for transparency, accountability and continuous human oversight, directly supporting this inference. Suggesting human judgement will soon become unnecessary contradicts the passage's emphasis on preserving it, suggesting AI cannot analyse information accurately contradicts its acknowledgment of AI's speed and accuracy and suggesting ethical reasoning can be fully automated also contradicts the passage.

26. Option (c) is correct.

Explanation: The passage argues that growth alone does not guarantee social well-being, since inequality and environmental issues can persist despite strong growth statistics, matching option C. Suggesting growth eliminates poverty permanently is an overstatement not supported by the passage, suggesting growth alone is sufficient to measure development directly contradicts the passage's argument and suggesting growth always improves environmental conditions is also unsupported.

27. Option (d) is correct.

Explanation: The passage mentions human capital, institutional quality, environmental sustainability and quality of life as broader indicators of development, but never mentions military expenditure at all, making it the

correct choice of what is NOT mentioned. Each of the other three indicators is directly referenced in the passage.

28. Option (b) is correct.

Explanation: The passage presents balanced facts and arguments without emotional language, sarcasm, or cynicism, matching an informative tone. A satirical tone would require mockery or irony, an emotional tone does not fit the passage's measured, analytical style and a cynical tone would require distrust or negativity — none of which are present.

29. Option (c) is correct.

Explanation: Statements ii, iii and iv are all directly supported by the passage, covering the balance of efficiency and equity, the importance of long-term resilience and the consideration of quality of life. Statement i claims that economic growth automatically ensures social equality, but the passage explicitly states this is not guaranteed, so any option including statement i is incorrect.

30. Option (c) is correct.

Explanation: The passage argues for a broader view of development beyond GDP growth alone, considering human capital, sustainability, equity and quality of life, matching option C. Criticising globalisation is never discussed in the passage, suggesting economic growth is the only measure of prosperity is the opposite of the passage's argument and comparing developing and developed economies is also never discussed.

SECTION-B | NUMERAL ABILITY

31. Option (b) is correct.

Explanation:

Step 1: Remove the common remainder.

Required number – 5 should be exactly divisible by 18, 24 and 30.

To Find the LCM.

$$18 = 2 \times 3^2$$

$$24 = 2^3 \times 3$$

$$30 = 2 \times 3 \times 5$$

$$\text{LCM} = 2^3 \times 3^2 \times 5 = 8 \times 9 \times 5 = 360$$

Step 2: Add the remainder.

Required number

$$= 360 + 5$$

$$= 365$$

32. Option (b) is correct.

Explanation: A number divisible by both 9 and 12 must be divisible by their LCM.

So, LCM of 9 and 12 = 36

First multiple of 36 greater than 100 = 108

Last multiple of 36 less than 500 = 468

Number of terms

$$\begin{aligned} &= \left(\frac{468 - 108}{36} \right) + 1 \\ &= \left(\frac{360}{36} \right) + 1 \\ &= 10 + 1 \\ &= 11 \end{aligned}$$

33. Option (a) is correct.

Explanation: Assume the original price is ₹100.

After a 20% increase,

New price

$$= 100 \times \left(\frac{120}{100} \right) = ₹120$$

Now a 15% discount is given.

$$\text{Discount} = 15\% \text{ of } ₹120 = ₹18$$

$$\text{Selling price} = ₹120 - ₹18 = ₹102$$

Thus,

$$\text{Net increase} = ₹102 - ₹100 = ₹2$$

Percentage increase

$$= \left(\frac{120}{100} \right) \times 100 = 2\%$$

34. Option (b) is correct.

Explanation: Let the population two years ago be P.

After the first year,

$$\text{Population} = 1.20P$$

After the second year,

$$\text{Population} = 1.20P \times 0.90 = 1.08P$$

Given,

$$1.08P = 10,800$$

$$P = 10,800 \div 1.08$$

$$= 10,000$$

35. Option (c) is correct.

Explanation: Cost Price (CP) = ₹2,500

$$\text{Marked Price (MP)} = 2,500 \times \left(\frac{140}{100} \right) = ₹3,500$$

$$\text{Selling Price (SP)} = 3,500 \times \left(\frac{90}{100} \right) = ₹3,150$$

$$\text{Profit} = 3,150 - 2,500 = ₹650$$

$$\text{Profit \%} = (650 \div 2,500) \times 100 = 26\%$$

36. Option (c) is correct.

Explanation: Selling Price (SP) = ₹4,320

A 10% discount means the selling price is 90% of the marked price.

Let the marked price be M.

$$90\% \text{ of } M = 4,320$$

$$M = 4,320 \times \frac{100}{90}$$

$$M = ₹4,800$$

37. Option (b) is correct.

Explanation:

Step 1: Make the middle term (B) common.

$$A : B = 7 : 9$$

$$B : C = 3 : 5$$

$$\text{LCM of 9 and 3} = 9$$

Multiply the second ratio by 3.

$$B : C = 9 : 15$$

Therefore,

$$A : B : C = 7 : 9 : 15$$

Step 2: Calculate the total ratio.

$$\text{Total ratio} = 7 + 9 + 15$$

$$= 31$$

$$\text{Value of one part} = 1,86,000 \div 31$$

$$= ₹6,000$$

$$\text{Income of B} = 9 \times 6,000$$

$$= ₹54,000$$

38. Option (a) is correct.

Explanation:

Step 1: Find the original shares.

$$\text{Total ratio} = 2 + 5 + 8 = 15$$

$$\text{Value of one part} = 18,000 \div 15$$

$$= ₹1,200$$

Therefore,

$$A = 2 \times 1,200 = ₹2,400$$

$$B = 5 \times 1,200 = ₹6,000$$

$$C = 8 \times 1,200 = ₹9,600$$

Step 2: Transfer the money.

A gives ₹600 to B.

$$A = 2,400 - 600 = ₹1,800$$

$$B = 6,000 + 600 = ₹6,600$$

Now B gives ₹900 to C.

$$B = 6,600 - 900 = ₹5,700$$

$$C = 9,600 + 900 = ₹10,500$$

Step 3: Find the ratio.

$$1,800 : 5,700 : 10,500$$

Divide by 300.

$$= 6 : 19 : 35$$

Therefore, The ratio is: 6 : 19 : 35

39. Option (b) is correct.

Explanation: Total age of 18 students

$$= 18 \times 21$$

$$= 378 \text{ years}$$

After the teacher joins,

Number of persons = 19

$$\text{Total age} = 19 \times 22$$

$$= 418 \text{ years}$$

Teacher's age

$$= 418 - 378$$

$$= 40 \text{ years}$$

40. Option (c) is correct.

Explanation: Total marks of 12 students

$$= 12 \times 68$$

$$= 816$$

Marks removed

$$= 92 + 44$$

$$= 136$$

Remaining total

$$= 816 - 136$$

$$= 680$$

Remaining students

$$= 10$$

New average

$$= 680 \div 10$$

$$= 68$$

41. Option (b) is correct.

Explanation:

Step 1: Assume the total work.

Take the LCM of 12, 18 and 36, which is 36 units.

Therefore,

$$A's \text{ one day's work} = 36 \div 12 = 3 \text{ units}$$

$$B's \text{ one day's work} = 36 \div 18 = 2 \text{ units}$$

$$C's \text{ one day's work} = 36 \div 36 = 1 \text{ unit}$$

Step 2: Find the combined work done in one day.

Combined work per day

$$= 3 + 2 + 1$$

$$= 6 \text{ units}$$

Step 3: Calculate the total time required.

Time required

$$= \text{Total Work} \div \text{Work Done Per Day}$$

$$= 36 \div 6$$

$$= 6 \text{ days}$$

42. Option (b) is correct.

Explanation: Given,

$$\text{Amount} = ₹19,360$$

$$\text{Rate} = 10\%$$

$$\text{Time} = 2 \text{ years}$$

$$\text{Now, we have } A = P \times (1.10)^2$$

$$19,360 = P \times 1.21$$

$$P = 19,360 \div 1.21$$

$$P = ₹16,000$$

43. Option (b) is correct.

Explanation: Given that: $A = ₹13,310$

$$\text{Rate} = 10\%$$

$$\text{Time} = 3 \text{ years}$$

Now,

$$(1.10)^3 = 1.331$$

Therefore,

$$P = 13,310 \div 1.331 = ₹10,000$$

44. Option (a) is correct.

Explanation: Volume of material

$$= \pi h(R^2 - r^2)$$

$$= \left(\frac{22}{7}\right) \times 35 \times (100 - 64)$$

$$= \left(\frac{22}{7}\right) \times 35 \times 36$$

$$= 22 \times 5 \times 36$$

$$= 3,960 \text{ cm}^3$$

45. Option (c) is correct.

Explanation: Volume of cuboid

$$= 18 \times 15 \times 12$$

$$= 3,240 \text{ cm}^3$$

Volume of one cube

$$= 3^3 = 27 \text{ cm}^3$$

Number of cubes

$$= 3,240 \div 27$$

$$= 120$$

46. Option (b) is correct.

Explanation:

Step 1: Find the total marks of all 24 students.

$$\text{Total Marks} = \text{Average} \times \text{Number of Students}$$

$$= 68 \times 24 = 1632$$

Step 2: Find the total marks of the first 15 students.

$$= 72 \times 15 = 1080$$

Step 3: Find the marks of the remaining 9 students.

$$= 1632 - 1080 = 552$$

Step 4: Find their average.

$$\text{Average} = 552 \div 9 = 61.33$$

47. Option (c) is correct.

Explanation:

Step 1: Find the incorrect total.

$$\text{Total} = 20 \times 48 = 960$$

Step 2: Correct the total.

$$\text{Wrong value} = 36$$

$$\text{Correct value} = 63$$

$$\text{Increase} = 63 - 36 = 27$$

Now, Correct Total

$$= 960 + 27 = 987$$

Step 3: Find the correct average.

Correct Average

$$= 987 \div 20 = 49.35$$

48. Option (c) is correct.

Explanation: Observe the pattern:

$$8 \times 2 + 1 = 17$$

$$17 \times 2 + 2 = 36$$

$$36 \times 2 + 3 = 75$$

$$75 \times 2 + 4 = 154$$

Next,

$$154 \times 2 + 5 = 308 + 5 = 313$$

49. Option (a) is correct.

Explanation: Find the successive differences:

$$6 - 2 = 4$$

$$15 - 6 = 9$$

$$31 - 15 = 16$$

$$56 - 31 = 25$$

These are:

$$2^2, 3^2, 4^2, 5^2$$

Next difference

$$= 6^2 = 36$$

Therefore,

$$56 + 36 = 92$$

50. Option (a) is correct.

Explanation: Total balls

$$= 5 + 4 + 3 = 12$$

Total ways of selecting two balls

$$= {}^5C_2 = 66$$

Favourable cases:

$$\text{Both red} = {}^5C_2 = 10$$

$$\text{Both blue} = {}^4C_2 = 6$$

$$\text{Both green} = {}^3C_2 = 3$$

Total favourable ways

$$= 10 + 6 + 3 = 19$$

$$\text{Probability} = \frac{19}{66}$$

SECTION-C | REASONING & MILITARY APTITUDE

51. Option (c) is correct.

Explanation: Given:

A _ T _ N _ M T U _ A M _ _ N _ M T U _
A M T U N / A M T U N / A M T U N / A M T U N

So, the following pattern: A M T U N

52. Option (a) is correct.

Explanation: Logic: 2nd figure is water image of 1st figure.

53. Option (d) is correct.

Explanation:

The order: Victorious (2), Viewership (3), Vindictive (5), Visible (1), Visitor (4)

→ 2, 3, 5, 1, 4

54. Option (a) is correct.

Explanation:

Conclusions:

I. Some vans are trucks. (False, there is no direct or indirect relation between vans and trucks).

II. Some utilities are trucks. (True, all trucks are utilities, so that means some utilities are trucks).

So, Only conclusion II follows.

55. Option (c) is correct.

Explanation: Logic: Letters are alternately increased by +9 and +8 in alphabetically.

DEAR → MMJZ

D + 9 → M, E + 8 → M, A + 9 → J, R + 8 → Z

NOYX → WWHF

N + 9 → W, O + 8 → W, Y + 9 → H, X + 8 → F

Similarly,

NMZU → ?

N + 9 → W, M + 8 → U, Z + 9 → I, U + 8 → C

Therefore, OMZV → WUIC

56. Option (a) is correct.

Explanation: According to the question, possible family tree:

Jayant is a husband of Gita.

57. Option (b) is correct.

Explanation: The mirror image of

MODEL
WODEF

58. Option (d) is correct.

Explanation: The movement of first and third are similar. The movement of second and fourth are similar as shown below.

L	I	C	Δ	Δ	C	I	A	A	I
Δ			I		A		C		Δ
K	C	A	L	L	I	Δ	Δ	Δ	C

59. Option (a) is correct.

Explanation: Number series:

$$21 - 6 = 15$$

$$15 - 6 = 9$$

$$9 - 6 = 3$$

$$3 - 6 = -3$$

So, the missing number is 9.

First letter pattern:

S - 2 → Q, Q - 2 → O, O - 2 → M, M - 2 → K

So, the missing first letter is P.

Second letter pattern:

U + 1 → V, V + 1 → W, W + 1 → X, X + 1 → Y

So, the missing second letter is W.

Third letter pattern:

M + 3 → P, P + 3 → S, S + 3 → V, V + 3 → Y

So, the missing third letter is S.

So, ? = QWS9

60. Option (a) is correct.

Explanation: Logic: In three pairs, first letter +3, second letter unchanged.

(a) KO → ON: K + 4 = O, O → N (Not follow)

(b) EG → HG: E + 3 = H, G = G

(c) CE → FE: C + 3 = F, E = E

(d) UW → XW: S + 3 = V, W = W

61. Option (c) is correct.

Explanation: According to the given information, family tree diagram will be:

As per the diagram, C is the Wife's brother of M.

62. Option (d) is correct.

Explanation: For, PROOF - BKKNL

Similarly,

QUEEN - ?

So, QUEEN is written as JAAQM.

63. Option (d) is correct.

Explanation: Given: Opposite faces of the given open dice is following.

Therefore, opposite face of the Kiwi is Mango.

64. Option (d) is correct.

Explanation: From the given information seating arrangement will be.

One people sit between E and D, when counted from the left of D.

65. Option (b) is correct.

Explanation: From the given information path diagram will be.

$$\text{Distance} = 10 - 7 = 3\text{km}$$

He is 3km far and towards North direction.

66. Option (b) is correct.

Explanation: The hour hand at 6 is South (Given).

The clock directions:

12 → North

3 → East

6 → South

9 → West

Since the hour hand at 6 is South, the minute hand at 9 must be West.

67. Option (c) is correct.

Explanation: Given pattern:

$$56 + 4.2 = 69.2$$

$$69.2 + 12 = 72.2$$

$$72.2 + 4.2 = 76.4$$

$$76.4 + 12 = 88.4$$

$$88.4 + 4.2 = 92.6$$

$$92.6 + 12 = 104.6$$

$$\text{So, } ? = 104.6$$

68. Option (b) is correct.

Explanation: Given that:

6 numbers represents married trained teachers who are public school teachers.

69. Option (a) is correct.

Explanation: From the given information seating arrangement will be;

3 people sit to the left of D.

70. Option (a) is correct.

Explanation: There are 11 squares in this given figure.

71. Option (c) is correct.

Explanation: Given:

$$42 \div 6 + 9 \times 84 - 4 = ?$$

New equation:

$$42 - 6 \times 9 + 84 \div 4 = ?$$

$$42 - 6 \times 9 + 21 = ?$$

$$42 - 54 + 21 = ?$$

$$63 - 54 = ?$$

$$? = 9$$

72. Option (d) is correct.

Explanation: 'METALIC' requires the letter I and C, which are not present in the word 'TELEGRAM'. Hence, it cannot be formed.

73. Option (d) is correct.

Explanation:

We combine option A, C and D to form the question figure.

74. Option (a) is correct.

Explanation: When the paper unfolded following cuts will be shown:

75. Option (d) is correct.

Explanation:

$B - 3 \rightarrow Y, Y - 3 \rightarrow V, V - 3 \rightarrow S$

$E - 3 \rightarrow B, B - 3 \rightarrow Y, Y - 3 \rightarrow V$

$J - 3 \rightarrow G, G - 3 \rightarrow D, D - 3 \rightarrow A$

$O - 3 \rightarrow L, L - 3 \rightarrow I, I - 3 \rightarrow F$

$T - 3 \rightarrow Q, Q - 3 \rightarrow N, N - 3 \rightarrow K$

So, ? = SVAFK

SECTION-D | GENERAL KNOWLEDGE

76. Option (c) is correct.

Explanation: Lieutenant General Dhiraj Seth assumed command as the Chief of the Army Staff (COAS) on June 30, 2026, succeeding General Upendra Dwivedi. Before this apex appointment, Lt Gen Seth served as the Vice Chief of the Army Staff. Commissioned into the Armoured Corps, his distinguished military career spans nearly four decades, featuring command of the South Western Army Command and key operational postings, making both statements correct.

77. Option (c) is correct.

Explanation: The Bison Horn Maria and Mandri dances are central cultural expressions of the Madia and Muria sub-tribes of the Gond community, primarily residing in the Bastar region of Chhattisgarh. In the Bison Horn Maria dance, performers wear distinctive headgear fabricated from wild bison horns to replicate the animal's powerful, rhythmic movements. Meanwhile, the Mandri dance is a traditional, high-energy performance featuring personal drums, typically organised during festive expeditions and weddings.

78. Option (c) is correct.

Explanation: The Saras MkII is India's first indigenously designed 19-seater multi-purpose light transport aircraft, being developed by the Council of Scientific and Industrial Research–National Aerospace Laboratories (CSIR-NAL), not DRDO. It is designed for civil and regional connectivity, cargo transport, air ambulance, surveillance and other utility roles. Its ability to operate from short and semi-prepared runways makes it suitable for remote areas and aligns well with the objectives of the UDAN (Ude Desh ka Aam Nagrik) regional connectivity scheme. Therefore, Statements 1 and 3 are correct, while Statement 2 is incorrect.

79. Option (b) is correct.

Explanation: Aero India 2027 is organised under the Department of Defence Production, Ministry of Defence,

not the Ministry of Civil Aviation, making Statement 1 incorrect. Hindustan Aeronautics Limited (HAL) serves as the nodal organising agency for the event on behalf of the Ministry of Defence, with Bharat Electronics Limited (BEL) acting as a supporting organisation in conducting the exhibition. Therefore, Statement 2 is correct and the correct answer is Option (2) – 2 only.

80. Option (b) is correct.

Explanation: Deuce, Smash, Let and Love are terms used in both Lawn Tennis and Badminton. Deuce refers to a tied score requiring a two-point lead, Smash is a powerful attacking shot, Let means a rally is replayed due to interruption or valid reasons and Love denotes a score of zero. Although the rules differ, these terms reflect similarities between the two popular racket sports.

81. Option (c) is correct.

Explanation: Gogabeel Lake is an ecologically important oxbow lake located in Bihar. It was designated as India's 94th Ramsar Site under the Ramsar Convention due to its rich biodiversity and importance as a habitat for migratory birds, fish and aquatic species. The wetland also supports local livelihoods and plays a crucial role in flood regulation, groundwater recharge and maintaining ecological balance.

82. Option (b) is correct.

Explanation: The Battle of El Alamein, fought in 1942 in Egypt, was one of the decisive battles of World War II. Allied forces under General Bernard Montgomery defeated the Axis forces led by Field Marshal Erwin Rommel, halting their advance toward the Suez Canal. The victory marked a major turning point in the North African Campaign and significantly weakened Axis influence in the region.

83. Option (c) is correct.

Explanation: The hypothalamus forms the basal part of the diencephalon in the forebrain and contains specialised neurosecretory cells grouped into nuclei. These cells produce hormones such as vasopressin (ADH) and

oxytocin, along with releasing and inhibiting hormones that regulate the pituitary gland. The hypothalamus plays a vital role in maintaining homeostasis, controlling body temperature, hunger, thirst and endocrine functions.

84. Option (b) is correct.

Explanation: The BRICS Heads of Anti-Drug Agencies Meeting convened under India's 2026 BRICS Chairmanship cycle, which coordinates joint operational strategies against transnational narcotics trafficking. The officially designated theme for India's 2026 chairmanship is 'Building for Resilience, Innovation, Cooperation and Sustainability'. This guiding framework prioritises reinforcing multilateral institution-building, economic resilience, technological innovation and sustainable security architectures among member states.

85. Option (b) is correct.

Explanation: The National Housing Bank (NHB) was established in 1988 under the National Housing Bank Act, 1987, as the apex institution for housing finance in India. It regulates, promotes and refinances housing finance companies (HFCs) and supports the development of the housing finance sector. NHB plays an important role in expanding affordable housing and strengthening the country's housing credit system.

86. Option (c) is correct.

Explanation: The Atlantic Ocean is the second-largest ocean in the world and is characteristically S-shaped, making Statement 1 correct. It is bordered by the Americas to the west and Europe and Africa to the east, so Statement 2 is incorrect. Its highly indented coastline provides numerous natural harbours, making it the world's busiest ocean for international trade and shipping, thus Statement 3 is correct.

87. Option (b) is correct.

Explanation: An atoll is a ring-shaped coral reef or low coral island enclosing a central lagoon, usually formed around a submerged volcanic island in tropical oceans. Atolls develop over long geological periods as coral reefs continue to grow while the volcanic island gradually sinks. They are important marine ecosystems supporting rich biodiversity and are commonly found in the Pacific and Indian Oceans.

88. Option (b) is correct.

Explanation: The International Court of Justice (ICJ) consists of 15 judges elected for nine-year terms by separate but concurrent voting in both the UN General Assembly and the UN Security Council, making Statement 1 correct. Permanent members of the Security Council do not possess veto power in the election of ICJ judges, making Statement 2 incorrect. No two judges may be nationals of the same country, so Statement 3 is correct.

89. Option (a) is correct.

Explanation: The 2026 Commonwealth Games are scheduled to be hosted in Glasgow, Scotland. The Indian contingent will wear sustainable jute-viscose blended apparel, highlighting India's commitment to eco-friendly textiles and sustainability. The Games will bring together

athletes from Commonwealth nations across multiple sporting disciplines while promoting sportsmanship, inclusivity and international cooperation.

90. Option (a) is correct.

Explanation: Exercise PRAGATI 2026 commenced at Umroi Military Station in Meghalaya on 20 May 2026. The military exercise aimed to improve operational preparedness, interoperability and joint tactical capabilities among participating forces. It also focused on strengthening coordination for counter-insurgency, disaster response and other operational scenarios in the strategically important northeastern region of India.

91. Option (b) is correct.

Explanation: The Rowlatt Satyagraha (1919), led by Mahatma Gandhi, was a nationwide movement against the Rowlatt Act, involving hartals, peaceful protests and civil disobedience, not merely legislative boycotts. Therefore, Statement 1 is incorrect. The widespread unrest and escalating tensions eventually culminated in the Jallianwala Bagh Massacre on 13 April 1919, making Statement 2 correct.

92. Option (b) is correct.

Explanation: GJ 3378b is classified as a Super-Earth, a category of exoplanets with masses greater than Earth's but significantly lower than those of ice giants like Neptune. Located about 25 light-years away, the discovery contributes to the understanding of planetary formation and the diversity of planetary systems. Super-Earths are considered important candidates in the search for potentially habitable worlds.

93. Option (c) is correct.

Explanation: INS Mahendragiri is an indigenous stealth-guided missile frigate built by Mazagon Dock Shipbuilders Limited (MDL) under Project 17A and designed by the Warship Design Bureau of the Indian Navy. Commissioned at Visakhapatnam, the vessel incorporates advanced stealth technology, modern sensors and powerful weapon systems, significantly enhancing India's maritime defence capabilities and supporting the vision of Aatmanirbhar Bharat.

94. Option (a) is correct.

Explanation: World Meteorological Day is observed annually on 23 March to commemorate the establishment of the World Meteorological Organisation (WMO). The 2026 theme, 'Observing today, protecting tomorrow,' highlights the importance of accurate weather observations, climate monitoring and early warning systems in reducing disaster risks, addressing climate change and protecting lives, livelihood and ecosystems.

95. Option (c) is correct.

Explanation: The K9 Vajra-T is an Indian variant of South Korea's K9 Thunder self-propelled artillery system, manufactured in India under the Make in India initiative. It is a 155 mm/52 calibre self-propelled tracked artillery gun capable of delivering accurate long-range fire support in varied terrains. Therefore, both statements are correct.

96. Option (d) is correct.

Explanation: Professor Jainendra K. Jain, an internationally renowned theoretical physicist, was born in Rajasthan. He received the Wolf Prize in Physics 2025 for his pioneering work on the Fractional Quantum Hall Effect, particularly the development of the Composite Fermion Theory. His research has significantly advanced the understanding of strongly interacting quantum systems and condensed matter physics.

97. Option (b) is correct.

Explanation: Uzbekistan became the 10th member of the New Development Bank (NDB) in June 2026, becoming the first Central Asian country to join the institution established by the BRICS nations. Membership is expected to strengthen regional infrastructure financing, sustainable development and economic cooperation while expanding the NDB's global outreach beyond its founding members.

98. Option (a) is correct.

Explanation: New Zealand announced its decision to join the Global Biofuels Alliance (GBA) to strengthen international cooperation in promoting sustainable biofuels and clean energy. Launched during the G20 Summit in New Delhi (2023), the alliance seeks to

encourage biofuel adoption, reduce greenhouse gas emissions, enhance energy security and support the transition toward low-carbon economies.

99. Option (a) is correct.

Explanation: The 86th Constitutional Amendment Act, 2002 inserted Article 21A, making free and compulsory education a Fundamental Right for children aged 6–14 years. It also amended Article 45 and introduced Article 51A(k). The amendment recognised that universal elementary education is essential for human resource development, social justice and effective democratic citizenship, making the reason the correct explanation of the assertion.

100. Option (c) is correct.

Explanation: According to the QS World University Rankings 2027, Indian Institute of Technology (IIT) Delhi emerged as the highest-ranked Indian institution. The rankings assess universities on parameters such as academic reputation, employer reputation, faculty-student ratio, research citations, international faculty and international student diversity. IIT Delhi's achievement reflects its excellence in teaching, research, innovation and global academic standing.

Sample Question Paper-5

Total Question: 100

Maximum Marks: 300

Instructions

1. Total Number of Questions – 100. This Paper is divided in four sections.
 - SECTION-A | VERBAL ABILITY — 30 Questions
 - SECTION-B | NUMERAL ABILITY — 20 Questions
 - SECTION-C | REASONING & MILITARY APTITUDE — 25 Questions
 - SECTION-D | GENERAL KNOWLEDGE — 25 Questions
2. Each Question carries of three marks. One mark is deducted for every wrong answer.
3. No mark is awarded/deducted for un-attempted questions.

SECTION-A | VERBAL ABILITY

1. Choose the word which is nearly opposite in meaning to the given word:
Pragmatic
(a) Practical (b) Realistic
(c) Idealistic (d) Sensible
Directions (Q. Nos. 2–6): Read the passage carefully and fill in each blank with the most appropriate option.
Behavioural economists have long argued that human beings do not always act in accordance with the tenets of rational choice theory. Traditional models assumed that individuals possess complete information and consistently pursue their own self-interest; empirical evidence, however, has repeatedly shown this assumption to be(2)..... Cognitive biases such as loss aversion and anchoring frequently(3)..... decision-making processes that economists once considered impervious to psychological influence. Proponents of behavioural economics contend that policies designed without accounting for these biases are likely to(4)....., since they rest upon a portrait of human rationality that does not correspond to observed behaviour. Critics, however, caution against overcorrecting; they argue that an excessive emphasis on irrationality risks(5)..... the genuine capacity of individuals to learn from experience and adjust their choices accordingly. The debate, therefore, is less about whether biases exist than about how much explanatory weight should be(6)..... to them.
2. (a) corroborated (b) untenable
(c) self-evident (d) exhaustive
3. (a) clarify (b) validate
(c) simplify (d) distort
4. (a) succeed (b) falter
(c) flourish (d) persist
5. (a) underestimating (b) overestimating
(c) acknowledging (d) emphasising
6. (a) denied (b) withheld
(c) accorded (d) reversed
7. In the following question, out of the four alternatives, select the alternative which is the best substitute of the phrase.
'A word that imitates the natural sound of the thing it refers to.'
(a) Onomatopoeia (b) Alliteration
(c) Analogy (d) Metaphor
8. Choose the option which best expresses the meaning of the idiom given below.
'To read between the lines.'
(a) To skip over unnecessary details
(b) To interpret a hidden or implied meaning
(c) To read a text carefully, word by word
(d) To ignore the obvious meaning of a text
9. Choose the option which best expresses the meaning of the idiom given below.
'A storm in a teacup.'
(a) A minor issue exaggerated into a major controversy
(b) A natural disaster affecting a small area
(c) A sudden and unexpected change in weather
(d) A trivial argument between close friends
10. In the following question, one part of the sentence may contain an error. Identify that part. If there is no error, choose 'No Error'.
Despite of his repeated warnings, the workers continued to ignore the safety protocols established by the management.
(a) the safety protocols established by the management
(b) the workers continued to ignore
(c) Despite of his repeated warnings
(d) No error
11. In the following question, one part of the sentence may have an error. Find out which part of the sentence has an error. If there is no error, choose 'No Error'.
Each of the candidates were asked to submit his portfolio before the final round of interviews commenced.

- (a) Each of the candidates were asked
(b) to submit their portfolios
(c) before the final round of interviews commenced
(d) No error
12. What is the synonym of the word 'TACITURN'?
- (a) Loquacious (b) Reticent
(c) Garrulous (d) Verbose
13. Choose the option that best defines the given phrase.
'A blessing in disguise'
- (a) An expected piece of good fortune
(b) A gift given secretly to avoid embarrassment
(c) A hidden threat disguised as an act of kindness
(d) An unfortunate event that eventually turns out to be beneficial
14. Choose the option that best defines the given phrase.
'To cut corners'
- (a) To complete a task by compromising on quality or standards
(b) To reduce unnecessary expenses without compromising quality
(c) To finish a piece of work exactly on schedule
(d) To argue persistently over minor and trivial details
15. Choose the option which best expresses the meaning of the given word.
'Ephemeral'
- (a) Everlasting (b) Momentary
(c) Repetitive (d) Substantial
16. Choose the most appropriate option to complete the sentence.
The committee's decision, though controversial, was ultimately deemed _____ given the unprecedented circumstances the organisation faced.
- (a) reckless (b) defensible
(c) arbitrary (d) unjustifiable
17. Choose the correct noun form of the word 'Pursue'.
- (a) Pursuing (b) Pursuer
(c) Pursuit (d) Pursuable
18. In the following question, there is a related pair of words given. Choose the pair that best expresses the same relationship.
Sculptor : Statue
- (a) Composer : Symphony (b) Conductor : Orchestra
(c) Musician : Instrument (d) Singer : Audience
19. In the following question, there is a related pair of words given. Choose the pair that best expresses the same relationship.
Miser : Money
- (a) Connoisseur : Wine
(b) Glutton : Food
(c) Collector : Antique
(d) Philanthropist : Wealth
20. Choose the word which best expresses the meaning of the given word.
'Insolent'
- (a) Deferential (b) Impudent
(c) Timid (d) Courteous
21. Rearrange the following sentences to form a coherent paragraph.

1. This shift, they contend, would ultimately produce a labour market less vulnerable to sudden technological disruption.
2. Automation has long been feared as a primary threat to employment across manufacturing and service industries alike.
3. Recent studies, however, suggest that the elimination of routine tasks may be accompanied by the creation of entirely new categories of work.
4. Economists therefore argue that policy should focus on reskilling the workforce rather than resisting automation outright.
- (a) 2 - 3 - 4 - 1 (b) 3 - 2 - 1 - 4
(c) 2 - 4 - 3 - 1 (d) 4 - 2 - 3 - 1
22. Choose the word which is nearly opposite in meaning to the given word.
Tranquil
- (a) Calm (b) Peaceful
(c) Turbulent (d) Serene
- Directions (Q. Nos. 23–25):** Read the passage carefully and answer the questions that follow.
- The distinction between correlation and causation, though elementary in principle, remains one of the most persistently misapplied concepts in public discourse. It is not merely that observers frequently mistake one for the other; rather, the very language in which statistical findings are communicated often obscures the qualifications upon which those findings depend. A study reporting that a particular intervention is 'associated with' improved outcomes is frequently summarised, in subsequent reporting, as demonstrating that the intervention 'causes' those outcomes — an inferential leap the original data may not support. This slippage is compounded by confirmation bias: audiences predisposed to believe in a causal relationship are unlikely to scrutinise the caveats buried within a study's methodology section. Statisticians have proposed various remedies, from mandating clearer language in abstracts to requiring that confounding variables be explicitly addressed before causal claims are entertained. Yet such remedies address only the proximate cause of the confusion. The deeper difficulty is that causal explanations are cognitively more satisfying than probabilistic ones; human reasoning appears to possess an innate preference for narratives with identifiable agents and mechanisms over diffuse statistical associations. Until this underlying cognitive tendency is addressed, technical fixes to scientific communication are unlikely to fully resolve the problem.
23. According to the passage, the persistence of causal misinterpretation is primarily attributed to
- (a) the incompetence of researchers conducting statistical studies
(b) an inherent cognitive preference for causal narratives over probabilistic explanations
(c) the deliberate exaggeration of findings by journalists
(d) the absence of statistical regulations governing scientific publishing
24. The author's attitude toward proposed remedies such as clearer language in abstracts can best be described as

- (a) dismissive, since such measures address only superficial aspects of the problem
- (b) enthusiastic, believing they will resolve the issue entirely
- (c) indifferent, as the author does not consider communication relevant
- (d) hostile, viewing such proposals as counterproductive
25. Which of the following, if true, would most weaken the author's central argument?
- (a) Studies show that even experts who understand cognitive biases still frequently confuse correlation with causation.
- (b) Evidence indicates that simplified statistical language completely eliminates causal misinterpretation among lay audiences.
- (c) Surveys reveal that most people distrust scientific studies reported in the media.
- (d) Researchers agree that confounding variables are difficult to identify in complex studies.
- Directions (Q. Nos. 26–30):** Read the passage carefully and answer the questions that follow.
- The concept of 'creative destruction,' first popularised in the mid-twentieth century, describes the process by which innovation continuously dismantles established economic structures even as it generates new ones. Proponents of this view regard such disruption as an unavoidable, indeed desirable, feature of dynamic economies: industries that fail to adapt are supplanted by more efficient competitors and resources are consequently reallocated toward more productive uses. Detractors, however, note that the benefits of creative destruction are rarely distributed evenly. Those employed in declining industries frequently bear disproportionate costs — including unemployment, diminished wages and the erosion of community structures built around a particular trade — while the gains accrue largely to consumers and to workers in emerging sectors, who may be geographically and demographically distinct from those displaced. This asymmetry has prompted renewed scholarly attention to the role of institutions in mediating economic transition. Advocates of robust social safety nets argue that such mechanisms can preserve the aggregate efficiency gains of creative destruction while cushioning its most severe individual costs, thereby sustaining public support for continued economic openness. Sceptics counter that overly generous transitional support may itself dull the incentive to adapt, effectively subsidising obsolescence rather than facilitating renewal. Reconciling these competing concerns, most economists concede, requires calibrating policy to the specific character of the disruption in question rather than applying uniform prescriptions across dissimilar circumstances.
26. The central concern raised by detractors of creative destruction, as described in the passage, is
- (a) that innovation should be actively discouraged to protect existing industries
- (b) that the costs and benefits of economic disruption are unequally distributed among different groups
- (c) that consumers rarely benefit from technological innovation
- (d) that emerging sectors fail to create sufficient employment opportunities
27. According to the passage, sceptics of generous transitional support argue that such support
- (a) is prohibitively expensive for most governments to sustain
- (b) disproportionately benefits workers in declining industries
- (c) may reduce the incentive for workers and industries to adapt
- (d) has no measurable effect on economic efficiency
28. The author's overall approach to the debate over creative destruction can best be described as
- (a) strongly advocating for unregulated market disruption
- (b) presenting a balanced account of competing perspectives without endorsing one exclusively
- (c) dismissing the relevance of institutional mediation entirely
- (d) arguing that economic disruption should be eliminated through regulation
29. Which of the following can be inferred from the passage regarding policy calibration?
- (a) A single policy approach is sufficient for managing all forms of economic disruption.
- (b) Effective policy must account for the specific nature of the disruption rather than rely on generalised rules.
- (c) Social safety nets are universally rejected by economists as ineffective.
- (d) Institutional mediation has no bearing on the pace of economic transition.
30. The phrase 'subsidising obsolescence rather than facilitating renewal' most likely refers to the concern that
- (a) government support might sustain declining industries and discourage necessary change
- (b) subsidies are financially unsustainable in the long run
- (c) renewal of industries occurs too rapidly without proper planning
- (d) obsolescence is an unavoidable outcome regardless of policy intervention

SECTION-B | NUMERAL ABILITY

31. Two fair dice are thrown simultaneously. What is the probability that the sum of the numbers obtained is a prime number?
- (a) $\frac{5}{12}$ (b) $\frac{7}{18}$ (c) $\frac{13}{36}$ (d) $\frac{1}{2}$
32. The average marks of 30 students in a class are 62. Five new students join the class and the average marks become 64. If the average marks of the five new students are equal, find the marks obtained by each new student.

- (a) 74 (b) 76 (c) 7 (d) 80
33. The average of 16 observations is 42. If one observation of 35 is replaced by 67, what is the new average?
(a) 43 (b) 43.5 (c) 44 (d) 44.5
34. Find the next term in the series:
7, 15, 32, 67, 138, ?
(a) 277 (b) 279 (c) 281 (d) 283
35. Find the missing term.
5, 10, 20, 37, 63, ?
(a) 98 (b) 99 (c) 100 (d) 101
36. The HCF and LCM of two numbers are 18 and 756, respectively. If one of the numbers is 108, find the other number.
(a) 112 (b) 118 (c) 126 (d) 132
37. Three bells ring at intervals of 18 minutes, 24 minutes and 30 minutes, respectively. If they ring together at 8:00 AM, at what time will they ring together again?
(a) 10:00 AM (b) 11:00 AM
(c) 12:00 Noon (d) 2:00 PM
38. The least number which when divided by 24, 36 and 54 leaves a remainder of 7 in each case is:
(a) 211 (b) 223 (c) 331 (d) 439
39. The salary of an employee is increased by 25% and then decreased by 20%. What is the overall percentage change in the salary?
(a) 2% increase (b) No change
(c) 5% decrease (d) 4% increase
40. The population of a city increases by 15% in the first year and 20% in the second year. If the population at the end of the second year is 1,38,000, what was the population at the beginning of the first year?
(a) 95,000 (b) 1,00,000
(c) 1,05,000 (d) 1,10,000
41. A trader marks an article 50% above its cost price. He allows a 20% discount on the marked price. What is his profit percentage?
(a) 18 % (b) 20 % (c) 22 % (d) 25 %
42. A shopkeeper marks an article 60% above the cost price. He allows two successive discounts of 10% and 20%. If the cost price is ₹2,500, what is the selling price?
- (a) ₹2,800 (b) ₹2,880 (c) ₹2,900 (d) ₹3,000
43. A man rows 72 km downstream in 6 hours and returns 48 km upstream in 6 hours. Find the speed of the boat in still water.
(a) 9 km/h (b) 10 km/h
(c) 11 km/h (d) 12 km/h
44. A sum of ₹8,000 is invested at 12.5% simple interest per annum for 4 years. Find the total amount at the end of the period.
(a) ₹11,500 (b) ₹12,000 (c) ₹12,500 (d) ₹13,000
45. A solid cylinder has a radius of 7 cm and a height of 20 cm. Find its total surface area.
(Take $\pi = \frac{22}{7}$)
(a) 1,188 cm² (b) 1,194 cm²
(c) 1,200 cm² (d) 1,210 cm²
46. The average marks of 40 students in a class are 68. If the average marks of the first 25 students are 72, find the average marks of the remaining 15 students.
(a) 60.34 (b) 61.33 (c) 62.35 (d) 64.39
47. The average weight of 30 employees is 64 kg. If 6 employees, each weighing 70 kg, leave the group, what is the average weight of the remaining employees?
(a) 62.5 kg (b) 62.0 kg
(c) 61.5 kg (d) 60.5 kg
48. A right circular cylinder has a radius of 14 cm and a height of 10 cm. Find its total surface area.
(Take $\pi = \frac{22}{7}$)
(a) 2112 cm² (b) 1936 cm²
(c) 2200 cm² (d) 2244 cm²
49. A solid sphere has a radius of 7 cm. Find its volume.
(Take $\pi = \frac{22}{7}$)
(a) 1437.33 cm³ (b) 1440 cm³
(c) 1452 cm³ (d) 1470 cm³
50. The average score of 25 players is 48. During the tournament, five new players, each scoring 60 points, join the team. Find the new average score.
(a) 49 (b) 50 (c) 51 (d) 52

SECTION-C | REASONING & MILITARY APTITUDE

51. Four letter-clusters have been given, out of which three are a like in some manner and one is different. Select the letter-cluster that is different
(a) FLO (b) LRU
(c) PVY (d) GMQ
52. Three of the following four figures are a like in a certain way and one is different. Select the odd one.

53. A clock, when seen from the mirror, shows time 8:40. What is the real time in the clock?
(a) 4 : 20 (b) 7 : 20
(c) 3 : 20 (d) 4 : 40
54. Suresh, Kamallesh, Mukesh, Amit and Rakesh are friends. Suresh is shorter than Kamlesh but taller than Rakesh, Mukesh is the tallest. Amit is a little shorter

than Kamalesh and little taller than Suresh. Who has two persons taller and two persons shorter than him?

- (a) Suresh (b) Kamalesh
(c) Amit (d) Rakesh

55. If in a coding system, RECTANGLE is coded as 1853201147125 and CUBE is coded as 32125, then how will PRISM be coded in the same coding system?

- (a) 151892214 (b) 161891913
(c) 12151756 (d) 5791112

56. If $P \times Q$ means P is the mother of Q, $P + Q$ means P is the Father of Q, $P \$ Q$ means P is the brother of Q and $P @ Q$ means P is the sister of Q then which of the following Y is the son of Z?

- (a) $Z + A @ Y @ B$ (b) $Z + A \$ Y @ B$
(c) $Z \times A \$ Y \$ B$ (d) $Z \times A \$ Y @ B$

57. In a certain code language, if GIANT is coded as HJBOU, then how is ROUTE coded in that language?

- (a) S P V U F (b) S K V U P
(c) P O Q R S (d) J R S T U

58. In a certain code language, If CARGO is coded as DZSFP, then how is TRAIN coded in that language?

- (a) P R I K T (b) U Q B H O
(c) U Q A H K (d) U Q A K H

59. Select the number from among the given options that can replace the question mark (?) in the following series: 170, 205, 240, 275, ?

- (a) 300 (b) 310 (c) 315 (d) 320

60. Amit scored 80, 60, 90 and x runs respectively in 4 continuous innings and his average run per inning were 65. Find the runs in the fourth inning.?

- (a) 40 (b) 30 (c) 50 (d) 75

61. In a certain code language, 'TRUCK' is coded as '79', 'TRAIN' is coded as '68', then what is the code for 'FUNGI' in same code language?

- (a) 63 (b) 70 (c) 85 (d) 68

62. The question below consists of two statements labelled I and II. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and give your answer.

What is the water image of the time in the clock?

Statement I : The hands of the clock are making an acute angle.

Statement II : After 20 minutes, the time will be 4 : 20 Pm.

- (a) Data in statement I alone is sufficient, while statement II is not sufficient to answer the question.
(b) Data in statement II alone is sufficient, while statement I is not sufficient to answer the question.
(c) Data in either statement I or II alone is sufficient to answer the question.
(d) Data in neither statement I nor II alone is sufficient to answer the question.

63. Some of the doctors are singers, some of the singers are dancers but no dancer is a doctor. Which the following figure represents the relationship stated above?

64. What will come in the place of the question mark (?) in the following equation, if '+' and '-' are interchanged and also 'x' and '÷' are interchanged?

$$160 \times 4 \div 2 + 8 - 10 = ?$$

- (a) 80 (b) 90 (c) 82 (d) 70

65. Rearrange the jumbled letters to make a meaningful word and then select the one which is different.

- PAACITRO
- REETM
- SSFIOTRR
- DFEWEJ

- (a) C (b) A (c) D (d) B

66. What should come in place of the question mark (?) to complete the following letter cluster series?

FHG, HJL, JLK, ?

- (a) Q O P (b) O Q P (c) L N M (d) P R Q

67. What should come in place of the question mark (?) to complete the following letter cluster series?

UPK, RSV, OVG, ?

- (a) LYK (b) LYR (c) RLY (d) LKY

68. How many triangles are there in the given figure?

- (a) 15 (b) 8 (c) 11 (d) 12

69. Four words have been given, out of which three are alike in some manner and one is different. Select the word that is different

- (a) Cooler (b) Refrigerator
(c) Air conditioner (d) Microphone

70. Arrange the given words in the order in which they will be arranged in a reverse dictionary. Find the word which will be come at THIRD position?

- Prescribe
- Prescient
- Precursor
- Precisely
- Prescreen

- (a) Prescribe (b) precursor
(c) prescient (d) Precisely

71. Mayank is now three times as old as her daughter Aditi. Ten years back, Mayank was five times as old as Aditi. The age of Aditi is ?

- (a) 15 yr (b) 20 yr (c) 25 yr (d) 35 yr

72. In the following question find out the alternative which will replace the question mark.

Virus: COVID:: Bacteria:?

- (a) Chickenpox (b) Typhoid
(c) Malaria (d) Sleeping sickness

73. Find the next number in the given series.

2, 6, 12, 22, 40, ?

- (a) 74 (b) 94 (c) 84 (d) 104

74. Rearrange the jumbled-up letters in their natural sequence and find the odd one out.

- (a) Mocwos (b) Menoubrrle
(c) Cabnarre (d) Syyend

75. A clock runs 13 min faster for every hour. If at 9 PM it shows the correct time (9 pm) and then what will defective clock show the time at 4 AM?

- (a) 04 : 31 AM (b) 04 : 31 PM
(c) 05 : 31 AM (d) 05 : 31 PM

SECTION-D | GENERAL KNOWLEDGE

76. With reference to Air Marshal Ashutosh Dixit, consider the following statements:

1. He assumed charge as the 51st Vice Chief of the Air Staff on 1 July 2026.
2. He succeeded Air Marshal Nagesh Kapoor, who superannuated on 30 June 2026 after nearly four decades of service in the Indian Air Force.

Which of the above statements is/are correct?

- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

77. The traditional folk dances Rikham Pada, Potung and Delong are native to which northeastern state of India?

- (a) Nagaland (b) Arunachal Pradesh
(c) Mizoram (d) Manipur

78. Which of the following statements is not correct regarding the institutional setup by the Indian Council of Medical Research (ICMR):

- (a) The ICMR is establishing India's first-ever dedicated centre for high-altitude medicine and public health research.
- (b) The newly announced research facility is scheduled to be set up at Keylong in the Lahaul and Spiti district.
- (c) The planned establishment will be located in the state of Uttarakhand
- (d) The project aims to structurally upgrade an existing ICMR field station into a fully functional, multidisciplinary research hub.

79. Consider the following statements regarding the technical design and launch capabilities of the Helina missile system:

1. Helina is a third-generation anti-tank guided missile specifically developed by the DRDO for helicopter-based launch platforms.
2. The missile is equipped with an Imaging Infrared (IIR) seeker and relies on continuous, real-time manual guidance from the operator throughout its flight path.

Which of the statements given above is/are correct?

- (a) 1 only (b) 2 only
(c) Both 1 and 2 (d) Neither 1 nor 2

80. The term 'offside trap' is associated with which of the following sports?

- (a) Football (b) Badminton
(c) Tennis (d) Table Tennis

81. Which university's Natural History Museum was officially designated as a specimen repository under the Biological Diversity Act?

- (a) Manipur University, Imphal
(b) Mizoram University, Aizawl
(c) Nagaland university, Lumami
(d) Gauhati University, Guwahati

82. The decisive Battle of Wandiwash (1760), which effectively shattered French colonial ambitions in India and established total British East India Company dominance, was part of which global conflict?

- (a) War of the Austrian Succession
(b) Seven Years' War
(c) Napoleonic Wars
(d) Hundred Years' War

83. What is the name of the bony depression in the skull that houses the pituitary gland?

- (a) Sella turcica (b) Foramen magnum
(c) Acetabulum (d) Glenoid cavity

84. India's first International Ophthalmology Research Conference (AIOS-AFOU 2026) was inaugurated in which of the following cities?

- (a) Chennai (b) Hyderabad
(c) Bengaluru (d) New Delhi

85. Which of the following statements is not correct related to the Food Safety and Standards Authority of India (FSSAI)

- (a) It was established under the Food Safety and Standards Act, 2006
- (b) It functions under the Ministry of Health and Family Welfare.
- (c) It is responsible for setting standards for food safety and quality in India
- (d) It is a constitutional body

86. Which type of rainfall is caused when warm, moisture-laden air encounters a mountain barrier, forcing it to rise, cool and condense on the windward side?

- (a) Convective rainfall (b) Cyclonic rainfall
(c) Orographic rainfall (d) Frontal rainfall

87. Which statement best describes the location of abyssal plains?

- (a) They lie directly beneath continental shelves near coastlines.
- (b) They are found mainly within narrow submarine canyons cutting into the continental slope.
- (c) They are situated between continental margins and mid-oceanic ridges in the deep ocean
- (d) They occur only along transform plate boundaries near islands.

88. With reference to the Sustainable Development Goals Report 2026 released by the United Nations, consider the following statements:

1. According to the report, more than half of the assessable global SDG targets are currently on track to be achieved by the 2030 deadline.
 2. For the first time in history, more than half of the world's population is now covered under at least one form of social protection.
 3. Over the past decade (since 2015), the percentage of the global population with internet access has successfully surpassed 70%.
- Which of the statements given above are correct?
- (a) 1 and 2 only (b) 2 and 3 only
 - (c) 1 and 3 only (d) 1, 2 and 3
89. Which Indian Army officer has been honoured with the prestigious 2025 United Nations Military Gender Advocate of the Year Award?
 - (a) Major Priya Jhingan
 - (b) Major Abhilasha Barak
 - (c) Captain Shiva Chouhan
 - (d) Wing Commander Deepika Misra
 90. Which of the following Air Force exercises is specifically aimed at boosting interoperability between the fighter pilots of India and the United Arab Emirates (UAE)?
 - (a) Desert Eagle (b) Garuda
 - (c) Cope India (d) Eastern Bridge
 91. Consider the following pairs of historical leaders and the newspapers they utilised during the Home Rule Movement:
 1. Bal Gangadhar Tilak – Kesari and Mahratta
 2. Annie Besant – New India and Commonweal

Which of the pairs given above is/are correctly matched?

 - (a) 1 only (b) 2 only
 - (c) Both 1 and 2 (d) Neither 1 nor 2
 92. Which major Middle Eastern oil producer officially announced its decision to leave both OPEC and the OPEC+ alliance effective May 1, 2026?
 - (a) Saudi Arabia (b) Qatar
 - (c) United Arab Emirates (d) Kuwait
 93. Prime Minister Narendra Modi commissioned INS Agray, INS Dunagiri and INS Sanshodhak into the Indian Navy on 21 June 2026 in which of the following cities?
 - (a) Mumbai (b) Kolkata
 - (c) Chennai (d) Visakhapatnam
 94. World Red Cross and Red Crescent Day is observed every year on which of the following dates?
 - (a) May 08 (b) May 01
 - (c) May 15 (d) May 20
 95. India's first AI-powered combat aircraft, 'Kaal Bhairava,' will be manufactured in which of the following European nations?
 - (a) France (b) Germany
 - (c) Spain (d) Portugal
 96. Which prominent Indian entrepreneur and fintech founder has been appointed as the new Global Head of WhatsApp by Meta Platforms?
 - (a) Vijay Shekhar Sharma
 - (b) Kunal Shah
 - (c) Sachin Bansal
 - (d) Ashneer Grovel
 97. What is the official theme designated for the 52nd G7 Summit?
 - (a) Investing in a Better Future
 - (b) Progress towards an Equitable World
 - (c) Working Together to Address Major International Challenges
 - (d) Building a Resilient and Sustainable Tomorrow
 98. Following its official declaration in July 2026, Uttarakhand became the _____ fully literate state in India under the ULLAS – New India Literacy Programme
 - (a) Third (3rd) (b) Fifth (5th)
 - (c) Eighth (8th) (d) Sixth (6th)
 99. The Constitution (Seventy-third Amendment) Act provides for
 - (a) an elaborate system of establishing municipal self-government
 - (b) an elaborate system of establishing panchayats as units of self-government
 - (c) establishing a Commission for Linguistic Minorities
 - (d) the creation of the Jharkhand State
 100. In July 2026, which Indian state made history by becoming the first in the country to commercially produce matcha tea?
 - (a) Kerala (b) West Bengal
 - (c) Tamil Nadu (d) Assam

Sample Question Paper-5

(Solution)

SECTION-A | VERBAL ABILITY

1. Option (c) is correct.

Explanation: 'Pragmatic' describes a practical, realistic approach to situations, guided by what works rather than fixed theories. Its opposite should describe someone driven by ideals rather than practicality. 'Idealistic' refers to holding high principles or standards, often without regard for practical limitations, making it the correct antonym. 'Practical,' 'realistic,' and 'sensible' all share the same meaning as 'pragmatic' rather than opposing it.

2. Option (b) is correct.

Explanation: The passage states that traditional models assumed individuals possess complete information and always act in self-interest, but empirical evidence has repeatedly shown this assumption to be untenable — meaning it cannot be reasonably defended or maintained. 'Corroborated,' 'self-evident,' and 'exhaustive' would each suggest the assumption held up well, contradicting the passage's larger argument that behavioural economics challenges traditional rational-choice models.

3. Option (d) is correct.

Explanation: The sentence explains that cognitive biases affect decision-making processes that economists once thought were free from psychological influence. 'Distort' captures the idea that such biases skew or warp otherwise rational decisions. 'Clarify,' 'simplify,' and 'validate' would each suggest biases improve decision-making, contradicting the passage's central claim that biases interfere with it.

4. Option (b) is correct.

Explanation: The sentence argues that policies built on flawed assumptions about human rationality are likely to fail once real behaviour departs from the model. 'Falter' means to lose strength or stumble, matching this expected failure. 'Succeed,' 'flourish,' and 'persist' would each suggest such policies work well, contradicting the passage's argument that ignoring behavioural biases undermines policy design.

5. Option (a) is correct.

Explanation: The sentence describes critics' concern that an excessive focus on human irrationality might go too far. Critics worry that overcorrecting toward irrationality risks underestimating people's real capacity to learn and adjust from experience. 'Acknowledging' and 'emphasising' one's capacity would not constitute a risk at all, so they do not fit the cautionary tone of the sentence and 'overestimating' reverses the intended meaning.

6. Option (c) is correct.

Explanation: The sentence concludes that the debate is really about how much explanatory weight biases should

be given. 'Accorded' means granted or assigned, fitting naturally with 'weight ... to them.' 'Denied,' 'withheld,' and 'reversed' all suggest biases should be given no weight at all, which does not match the passage's balanced, ongoing-debate tone.

7. Option (a) is correct.

Explanation: 'Onomatopoeia' refers to a word that phonetically imitates the sound it describes, such as 'buzz' or 'clang,' making it the correct substitute for the given phrase. 'Alliteration' refers to repeated initial consonant sounds, 'analogy' refers to a comparison between two things and 'metaphor' describes something as another thing entirely — none of these describe sound-imitating words.

8. Option (b) is correct.

Explanation: 'To read between the lines' means to understand an implied or hidden meaning that is not directly stated. Example: Although she said she was fine, I could read between the lines and tell she was upset. The other options describe skipping details, reading literally, or ignoring meaning altogether — none of which capture the idea of detecting an unstated message.

9. Option (a) is correct.

Explanation: 'A storm in a teacup' describes a situation where a minor issue is blown out of proportion into a major controversy. Example: The disagreement over seating arrangements turned into a storm in a teacup. The other options describe unrelated ideas — a natural disaster, a change in weather, or an argument between friends — none of which reflect the idiom's meaning.

10. Option (c) is correct.

Explanation: The correct preposition is simply 'despite,' not 'despite of' — 'despite' is never followed by 'of' in standard English. The error therefore lies in part (c), 'despite of his repeated warnings.' The remaining parts of the sentence are grammatically sound.

11. Option (a) is correct.

Explanation: 'Each' is a singular pronoun and always takes a singular verb, regardless of the plural noun that follows it ('each of the candidates'). The correct form should be 'each... was asked,' not 'were asked,' so the error lies in part (a). The remaining parts of the sentence are grammatically correct.

12. Option (b) is correct.

Explanation: 'Taciturn' describes someone who is reserved, quiet and reluctant to speak much. 'Reticent' carries the same meaning of being restrained in speech, making it the correct synonym. 'Loquacious,' 'garrulous,' and 'verbose' all describe someone who talks excessively, which is the opposite of taciturn.

13. Option (d) is correct.

Explanation: 'A blessing in disguise' describes something that initially seems unfortunate but eventually turns out to be beneficial. Example: Losing that job felt devastating at the time, but it turned out to be a blessing in disguise when she found a much better opportunity. The other options describe secretive gifts, hidden threats, or expected good fortune, none of which capture an apparent misfortune turning positive.

14. Option (a) is correct.

Explanation: 'To cut corners' means to complete a task in the easiest or cheapest way, often by sacrificing quality or proper procedure. Example: The contractor cut corners on safety measures to finish the project faster. The other options describe reducing costs without compromise, finishing on schedule, or arguing over details — none of which reflect the idiom's implication of compromised standards.

15. Option (b) is correct.

Explanation: 'Ephemeral' describes something that lasts for a very short time. 'Momentary' carries the same sense of brief duration, making it the correct match. 'Everlasting' and 'substantial' describe permanence or significance — essentially opposite meanings — while 'repetitive' describes recurrence rather than brevity.

16. Option (b) is correct.

Explanation: The sentence explains that the committee's decision was controversial but understandable given unusual circumstances. 'Defensible' means capable of being justified or supported by argument, fitting this balanced tone. 'Unjustifiable' and 'reckless' would suggest the decision was clearly wrong, while 'arbitrary' would suggest it was random — all contradicting the sentence's implication that the decision could still be reasonably defended.

17. Option (c) is correct.

Explanation: 'Pursuit' is the standard noun form referring to the act of pursuing something, as in 'the pursuit of happiness.' 'Pursuer' refers to the person doing the pursuing, not the act itself, while 'pursuing' is a gerund and 'pursuable' is an adjective, neither of which is the noun form being tested.

18. Option (a) is correct.

Explanation: A sculptor creates a statue, just as a composer creates a symphony — both describe an artist's relationship to their finished creative work. A conductor directs an orchestra rather than creating it, a musician plays an instrument rather than creating it and a singer performs for an audience rather than creating them, so none of these match the creator-to-creation relationship.

19. Option (b) is correct.

Explanation: A miser hoards money excessively and irrationally; similarly, a glutton overindulges in food excessively. Both pairs describe an excessive, compulsive relationship with something. A connoisseur appreciates wine with expertise rather than hoarding it, a collector gathers antiques out of interest rather than obsession and a philanthropist gives away wealth rather than hoarding it — none of which match the miserly excess implied by the original pair.

20. Option (b) is correct.

Explanation: 'Insolent' describes rude, disrespectful behaviour, especially toward someone in authority. 'Impudent' carries the same meaning of bold disrespect, making it the correct synonym. 'Deferential' and 'courteous' describe respectful behaviour, essentially the opposite, while 'timid' describes shyness rather than rudeness.

21. Option (a) is correct.

Explanation: Sentence 2 introduces the underlying problem — fear of automation displacing jobs — making it the logical opening. Sentence 3 follows by presenting a counterpoint: that automation also creates new categories of work. Sentence 4 then draws the policy conclusion that reskilling should be prioritised over resisting automation and sentence 1 completes the argument by describing the long-term benefit of a more resilient labour market. This sequence (2-3-4-1) creates a clear problem-response-conclusion-outcome structure.

22. Option (c) is correct.

Explanation: 'Tranquil' describes a state of calmness, peace and stillness. Its opposite should convey disturbance, disorder, or unrest. 'Turbulent' means characterised by conflict, confusion, or violent movement, making it the direct opposite of tranquil. 'Calm,' 'peaceful,' and 'serene' all denote quietness and composure, making them synonyms rather than antonyms.

23. Option (b) is correct.

Explanation: The passage argues that causal misinterpretation persists because human reasoning has an innate preference for narratives with identifiable agents and mechanisms over diffuse statistical associations — that is, a cognitive preference for causal explanations. The passage never attributes the problem to researcher incompetence, deliberate journalistic exaggeration, or a lack of regulation; it explicitly locates the deeper cause in how human minds process explanations.

24. Option (a) is correct.

Explanation: The author states that proposed remedies such as clearer language address only the proximate cause of the confusion, implying they are insufficient to solve the deeper, cognitive root of the problem. This reflects a dismissive attitude toward such measures as adequate solutions, rather than enthusiasm, indifference, or hostility, none of which match the author's measured but sceptical tone.

25. Option (b) is correct.

Explanation: The author's central argument is that technical fixes to scientific communication are unlikely to fully resolve the problem because the deeper issue is cognitive, not linguistic. If evidence showed that simplified language completely eliminated causal misinterpretation, it would directly contradict this claim, weakening the argument. The other options are consistent with, or irrelevant to, the author's position rather than contradicting it.

26. Option (b) is correct.

Explanation: The passage explains that the benefits of creative destruction are rarely distributed evenly,

with displaced workers bearing disproportionate costs while different groups of consumers and new-sector workers gain the benefits. This uneven distribution is the detractors' central concern, not a call to discourage innovation, a claim that consumers never benefit, or a claim that emerging sectors fail to create jobs — none of which the passage supports.

27. Option (c) is correct.

Explanation: The passage states that sceptics worry generous transitional support may itself dull the incentive to adapt, effectively subsidising obsolescence rather than facilitating renewal. This directly supports the idea that such support may reduce the incentive to adapt. The passage does not mention cost to governments, disproportionate benefit to declining-industry workers, or a claim of no effect on efficiency.

28. Option (b) is correct.

Explanation: The passage presents both the arguments of proponents and detractors of creative destruction, along with the views of advocates and sceptics of social safety nets, without endorsing one side conclusively — concluding instead that policy should be calibrated to specific circumstances. This balanced treatment rules out an approach that strongly advocates one side, dismisses

institutional mediation, or argues for eliminating disruption through regulation.

29. Option (b) is correct.

Explanation: The passage concludes that reconciling competing concerns requires calibrating policy to the specific character of the disruption in question rather than applying uniform prescriptions across dissimilar circumstances. This directly supports the inference that effective policy must be tailored to context rather than following a single generalised rule, ruling out the other options, which claim a single approach suffices, that safety nets are universally rejected, or that institutions have no bearing on transition.

30. Option (a) is correct.

Explanation: The phrase suggests that overly generous support may preserve declining industries rather than encouraging necessary change, since 'subsidising obsolescence' implies propping up something that should naturally be phased out, while 'facilitating renewal' would mean enabling adaptation instead. The other options describe unrelated concerns about financial sustainability, pace of renewal, or the inevitability of obsolescence, none of which capture this specific meaning.

SECTION-B | NUMERAL ABILITY

31. Option (a) is correct.

Explanation: Total possible outcomes

$$= 6 \times 6 = 36$$

Prime sums possible:

$$2 \rightarrow 1 \text{ outcome: } (1,1)$$

$$3 \rightarrow 2 \text{ outcomes: } (1,2), (2,1)$$

$$5 \rightarrow 4 \text{ outcomes: } (1,4), (2,3), (3,2), (4,1)$$

$$7 \rightarrow 6 \text{ outcomes: } (1,6), (2,5), (3,4), (4,3), (5,2), (6,1)$$

$$11 \rightarrow 2 \text{ outcomes: } (5,6), (6,5)$$

Total favourable outcomes

$$= 1 + 2 + 4 + 6 + 2 = 15$$

Probability

$$= \frac{15}{36} = \frac{5}{12}$$

32. Option (b) is correct.

Explanation: **Step 1:** Calculate the total marks of the original 30 students.

Total marks

$$= \text{Average} \times \text{Number of students}$$

$$= 62 \times 30 = 1860$$

Step 2: Calculate the total marks after five students join.

$$\text{Total students} = 35$$

$$\text{New total marks} = 64 \times 35 = 2240$$

Step 3: Find the total marks of the five new students.

Marks of five students

$$= 2240 - 1860$$

$$= 380$$

Step 4: Find the average marks of each new student.

Marks of each student

$$= 380 \div 5 = 76$$

33. Option (c) is correct.

Explanation: **Step 1:** Calculate the original total.

$$\text{Total} = 16 \times 42 = 672$$

Step 2: Replace the incorrect observation.

Increase in total

$$= 67 - 35 = 32$$

New total

$$= 672 + 32 = 704$$

Step 3: Find the new average.

New average

$$= 704 \div 16 = 44$$

34. Option (c) is correct.

Explanation: Observe the pattern:

$$7 \times 2 + 1 = 15$$

$$15 \times 2 + 2 = 32$$

$$32 \times 2 + 3 = 67$$

$$67 \times 2 + 4 = 138$$

Next,

$$138 \times 2 + 5 = 276 + 5 = 281$$

35. Option (c) is correct.

Explanation: Find the successive differences.

$$10 - 5 = 5$$

$$20 - 10 = 10$$

$$37 - 20 = 17$$

$$63 - 37 = 26$$

Differences: 5, 10, 17, 26

Second differences: 5, 7, 9

The second differences increase by 2.

Therefore, the next second difference is 11.

Next first difference

$$= 26 + 11 = 37$$

Next term

$$= 63 + 37 = 100$$

36. Option (c) is correct.

Explanation: Step 1: Use the relation.

Product of two numbers = HCF $\times$ LCM

$$= 18 \times 756 = 13,608$$

Step 2: Find the other number.

$$\text{Other number} = 13,608 \div 108 = 126$$

37. Option (d) is correct.

Explanation: Step 1: Find the LCM of 18, 24 and 30.

Prime factorisation:

$$18 = 2 \times 3^2$$

$$24 = 2^3 \times 3$$

$$30 = 2 \times 3 \times 5$$

$$\text{LCM} = 2^3 \times 3^2 \times 5$$

$$= 8 \times 9 \times 5$$

$$= 360 \text{ minutes}$$

Step 2: Convert minutes into hours.

$$360 \text{ minutes} = 6 \text{ hours}$$

Step 3: Find the required time.

$$\text{Starting time} = 8:00 \text{ AM}$$

$$\text{After 6 hours} = 2:00 \text{ PM}$$

38. Option (b) is correct.

Explanation: Step 1: Remove the common remainder.

Required number - 7, must be exactly divisible by 24, 36 and 54.

Therefore, find the LCM of 24, 36 and 54.

Prime factorisation:

$$24 = 2^3 \times 3$$

$$36 = 2^2 \times 3^2$$

$$54 = 2 \times 3^3$$

$$\text{LCM} = 2^3 \times 3^3$$

$$= 8 \times 27$$

$$= 216$$

Step 2: Add the common remainder.

$$\text{Required number} = 216 + 7 = 223$$

39. Option (b) is correct.

Explanation:

Assume the original salary = ₹100.

After a 25% increase,

$$\text{Salary} = ₹125$$

After a 20% decrease,

$$\text{Salary} = 125 \times 80/100 = ₹100$$

Thus, the final salary is equal to the original salary.

$$\text{Overall percentage change} = 0\%$$

40. Option (b) is correct.

Explanation: Let the initial population be P.

After the first year

$$= 1.15P$$

After the second year

$$= 1.15P \times 1.20$$

$$= 1.38P$$

Given, we have

$$1.38P = 1,38,000$$

$$P = 1,38,000 \div 1.38$$

$$= 1,00,000$$

41. Option (b) is correct.

Explanation: Assume the Cost Price (CP) = ₹100.

Marked Price

$$= ₹100 + 50\%$$

$$= ₹150$$

Discount

$$= 20\% \text{ of } ₹150$$

$$= ₹30$$

Selling Price

$$= ₹150 - ₹30$$

$$= ₹120$$

Profit

$$= ₹120 - ₹100$$

$$= ₹20$$

Profit %

$$= (20 \div 100) \times 100$$

$$= 20\%$$

42. Option (b) is correct.

Explanation: Step 1: Find the marked price.

$$\text{Cost Price} = ₹2,500$$

Marked Price

$$= 2,500 \times \frac{160}{100}$$

$$= ₹4,000$$

Step 2: Apply the first discount (that is 10%).

Price after first discount

$$= 4,000 \times \frac{90}{100}$$

$$= ₹3,600$$

Step 3: Apply the second discount (that is 20%).

Price after second discount

$$= 3,600 \times \frac{80}{100}$$

$$= ₹2,880$$

43. Option (b) is correct.

Explanation: Downstream Speed

$$= 72 \div 6$$

$$= 12 \text{ km/h}$$

Upstream Speed

$$= 48 \div 6$$

$$= 8 \text{ km/h}$$

Boat Speed

$$= (12 + 8) \div 2$$

$$= 10 \text{ km/h}$$

44. Option (b) is correct.

Explanation:

Simple Interest (SI)

$$= (P \times R \times T) \div 100$$

$$= (8000 \times 12.5 \times 4) \div 100$$

$$= ₹4,000$$

$$\begin{aligned}\text{Amount} &= \text{Principal} + \text{Interest} \\ &= 8,000 + 4,000 \\ &= ₹12,000\end{aligned}$$

45. Option (a) is correct.

Explanation: Formula for Total Surface Area of a Cylinder:

$$\text{TSA} = 2\pi r(r + h)$$

Substitute the given values:

$$\begin{aligned}&= 2 \times \left(\frac{22}{7}\right) \times 7 \times (7 + 20) \\ &= 44 \times 27 \\ &= 1,188 \text{ cm}^2\end{aligned}$$

46. Option (b) is correct.

Explanation: Step 1: Find the total marks of all students.

$$\text{Total Marks} = 40 \times 68 = 2720$$

Step 2: Find the total marks of the first 25 students.

$$= 25 \times 72 = 1800$$

Step 3: Find the total marks of the remaining 15 students.

$$= 2720 - 1800 = 920$$

Step 4: Calculate their average.

$$\text{Average} = 920 \div 15 = 61.33$$

47. Option (a) is correct.

Explanation: Step 1: Calculate the total weight.

Total Weight

$$= 30 \times 64$$

$$= 1920 \text{ kg}$$

Step 2: Weight of employees leaving.

$$= 6 \times 70$$

$$= 420 \text{ kg}$$

Step 3: Remaining weight.

$$= 1920 - 420$$

$$= 1500 \text{ kg}$$

Remaining employees

$$= 30 - 6 = 24$$

Step 4: Calculate the new average.

$$\begin{aligned}\text{Average} &= 1500 \div 24 \\ &= 62.5 \text{ k}\end{aligned}$$

48. Option (a) is correct.

Explanation: We know that Total Surface Area Formula

$$= 2\pi r(r + h)$$

Substitute the values:

$$\begin{aligned}&= 2 \times \left(\frac{22}{7}\right) \times 14 \times (14 + 10) \\ &= 2 \times 22 \times 2 \times 24 \\ &= 2112 \text{ cm}^2\end{aligned}$$

49. Option (a) is correct.

Explanation:

We know the Volume of a Sphere Formula

$$= \left(\frac{4}{3}\right) \pi r^3$$

Substitute the values:

$$\begin{aligned}&= \left(\frac{4}{3}\right) \times \left(\frac{22}{7}\right) \times 7^3 \\ &= \left(\frac{4}{3}\right) \times 22 \times 49 \\ &= 4312 \div 3 \\ &= 1437.33 \text{ cm}^3\end{aligned}$$

50. Option (b) is correct.

Explanation: Step 1: Calculate the total score of the original players.

$$\text{Total score} = 25 \times 48 = 1200$$

Step 2: Calculate the total score of the new players.

$$= 5 \times 60 = 300$$

Step 3: Find the new total score.

$$= 1200 + 300 = 1500$$

Total players = 30

Step 4: Calculate the new average.

$$\text{Average} = 1500 \div 30 = 50$$

SECTION-C | REASONING & MILITARY APTITUDE

51. Option (d) is correct.

Explanation: The logic Followed here is:

∴ Here, GMQ is different from other three alternatives.

52. Option (a) is correct.

Explanation: Here in each figure except option 1 the sum of lines on each side of the four sided figure is equal to 17, but in option 1 the sum of lines is equal to 18.

53. Option (c) is correct.

Explanation: If it is 12 hrs clock, then subtract the given timing from 11:60 hrs.

If it is 24 hrs clock, then subtract the given timing from 12:60 hrs.

$$\begin{array}{r} 11:60 \\ 8:40 \\ \hline 3:20 \end{array}$$

Hence, the real time will be 3:20.

54. Option (c) is correct.

Explanation: Suresh, Kamalesh, Mukesh, Amit and Rakesh are friends.

According to the question:

Kamalesh > suresh > Rakesh

Kamalesh > Amit > Suresh > Rakesh

As Mukesh is the tallest, so the order will Mukesh > Kamalesh > Amit > Suresh > Rakesh

Hence, Amit has two persons taller and two persons shorter than him.

55. Option (b) is correct.

Explanation: According to the question:

PRISM will be coded as:

56. Option (c) is correct.

Explanation: According to the question:

Therefore as shown in option (3) which shows Y is the sun of Z.

57. Option (a) is correct.

Explanation: According to the alphabetical positions of the letters,

Similarly,

Hence, 'SPVUF' is the correct answer.

58. Option (b) is correct.

Explanation: According to the alphabetical positions of the letter,

Similarly

Hence, 'UQBHO' is the correct answer.

59. Option (b) is correct.

Explanation: The pattern followed here is:

$$\therefore 275 + 35 = 310$$

Hence, '310' is the correct answer.

60. Option (b) is correct.

Explanation: Total innings = 4

$$\begin{aligned} \text{Total runs in 4 innings} &= 80 + 60 + 90 + X \\ &= 230 + X \end{aligned}$$

$$\text{Average run per inning} = \frac{\text{Total runs in 4 innings}}{\text{no. of innings}}$$

$$65 = \frac{(230 + x)}{4}$$

$$260 = 230 + X$$

$$X = 30$$

Hence, 30 is the correct answer.

61. Option (a) is correct.

Explanation: The pattern followed here is :

The sum of the positional value + 6

$$\text{Sum} = 20 + 18 + 21 + 3 + 11 = 73$$

$$= 73 + 6 = 79$$

similarly, 6 21 14 7 9

$$\text{sum} = 6 + 21 + 14 + 7 + 9 = 57 + 6 = 63$$

Hence, 63 is the correct answer.

62. Option (b) is correct.

Explanation:

Statement I : Not sufficient

The hands make an acute angle multiple times during the day so, the water image cannot be determined.

Statement II : sufficient

The time now is 4:00 and water image can be determined. Therefore, only statement II is sufficient.

63. Option (a) is correct.

Explanation:

As per the given information,

Clearly, the Venn diagram shows the relation that 'some of the doctors are singers', 'some of the singers are dancers' and 'No dancer is Teacher';

64. Option (c) is correct.

Explanation: When '+' and '-' are interchanged and also 'x' and '÷' are interchanged, the given equation becomes.

After interchanging symbols:

$$160 \div 4 \times 2 - 8 + 10$$

$$\Rightarrow 40 \times 2 - 8 + 10$$

$$\Rightarrow 80 + 2 = 82$$

Hence, the correct answer is 82.

65. Option (d) is correct.

Explanation: Option (d) that is the word with letters DFEWEJ cannot be rearranged to form a meaningful word. But from the remaining options we can make as

PAACT TRO → CAPACITOR

REETM → METER

SSEIOTRR → RESISTOR

66. Option (c) is correct.

Explanation: According to the question pattern followed here:

Hence, the correct answer is 'LNM'.

67. Option (b) is correct.

Explanation: Pattern followed here:

Hence, the correct answer is 'LYR'.

68. Option (d) is correct.

Explanation: The number of triangles in the given figure is shown below.

Hence, '12' is the correct answer.

69. Option (d) is correct.

Explanation: The logic followed here is:

Cooler, Refrigerator and Air conditioner are the electronic device and Microphone is input device.

Hence, 'Microphone' is different.

70. Option (c) is correct.

Explanation: According to the order of a reverse dictionary, words will be arranged as follows.

1. Prescribe
2. Prescreen
3. Precursor
4. Precisely

Hence, 'prescient' will be at third position.

71. Option (b) is correct.

Explanation: Let the present age of Aditi be x year then present age of Mayank will be $3x$ year.

Ten years back,

Age of Mayank = $3x - 10$

Age of Aditi = $x - 10$

According to the question,

$$(3x - 10) = 5(x - 10)$$

$$3x - 10 = 5x - 50$$

$$2x = 40$$

$$x = 20 \text{ yr}$$

Thus the age of Aditi is 20 years.

72. Option (b) is correct.

Explanation: The cause of COVID is virus similarly, The cause of Typhoid is Bacteria. Hence, Typhoid is the correct answer

73. Option (a) is correct.

Explanation: The pattern followed here is:

$$2^1 + 0 = 2$$

$$2^2 + 2 = 6$$

$$2^3 + 4 = 12$$

$$2^4 + 8 = 20$$

$$2^5 + 8 = 40$$

$$2^6 + 10 = 74$$

Hence, '74' is the correct answer.

74. Option (a) is correct.

Explanation: On arranging the jumble words we get,

Menoubrrle → Melbourne

Mocwas → Moscow

Cabnarre → Carberra

Syyend → Sydney

All are cities in Australia except Moscow. Moscow in Russia.

75. Option (c) is correct.

Explanation: we know that the clock runs 13 min faster for every hour.

Therefore, For 07 hours the clock will be ahead of time by $07 \times 13 \text{ min} = 91 \text{ min} = 1 \text{ hour } 31 \text{ min}$.

SECTION-D | GENERAL KNOWLEDGE

76. Option (c) is correct.

Explanation: Air Marshal Ashutosh Dixit assumed charge as the 51st Vice Chief of the Air Staff (VCAS) on 1 July 2026. He succeeded Air Marshal Nagesh Kapoor, who retired on 30 June 2026 after an illustrious career of nearly four decades in the Indian Air Force (IAF). A highly experienced fighter pilot and senior commander, Air Marshal Dixit has held several key operational and strategic appointments in the IAF.

77. Option (b) is correct.

Explanation: Rikham Pada, Potung and Delong are traditional folk dances of Arunachal Pradesh, reflecting the rich cultural heritage of its indigenous tribes. These dances are performed during festivals, harvest celebrations and social gatherings to honour nature, ancestors and community traditions. Accompanied by traditional music and colourful costumes, they play an important role in preserving the customs and identity of the tribal communities

78. Option (c) is correct.

Explanation: The Indian Council of Medical Research (ICMR) is establishing India's first dedicated Centre for High-Altitude Medicine and Public Health Research at Keylong in the Lahaul and Spiti district of Himachal Pradesh, not Uttarakhand. The project involves upgrading an existing ICMR field station into a multidisciplinary research centre to study high-altitude health, climate adaptation and public health challenges in mountainous regions.

79. Option (a) is correct.

Explanation: Helina is a third-generation, fire-and-forget anti-tank guided missile (ATGM) developed indigenously by the DRDO for airborne integration with the Advanced Light Helicopter (ALH). The statement regarding real-time manual guidance is incorrect because the missile features an advanced Imaging Infrared (IIR) seeker operating in a lock-on before launch (LOBL) capability. Once launched, it tracks targets autonomously without requiring continuous operator control.

80. Option (a) is correct.

Explanation: The offside trap is a defensive strategy used in football (soccer). Defenders deliberately move forward together to place attacking players in an offside position before a pass is made. When executed correctly, the attacking player is penalised for offside, preventing a scoring opportunity. Successful use of the offside trap requires excellent coordination, timing and communication among defenders.

81. Option (b) is correct.

Explanation: The Natural History Museum of Mizoram University, Aizawl, has been officially designated as a specimen repository under the Biological Diversity Act, 2002. The repository will preserve biological specimens for scientific research, biodiversity conservation, education and taxonomic studies. It will also support the documentation of the rich flora and fauna of Northeast India and strengthen biodiversity research in the region.

82. Option (b) is correct.

Explanation: The Battle of Wandiwash, fought in 1760 between the British East India Company and the French East India Company, formed part of the global Seven Years' War (1756–1763). The British victory effectively ended French military ambitions in India and established British political dominance, paving the way for the expansion of British colonial rule across the Indian subcontinent.

83. Option (a) is correct.

Explanation: The sella turcica is a saddle-shaped depression in the sphenoid bone of the skull that houses the pituitary gland, often called the master endocrine gland. This bony cavity protects the pituitary while allowing it to regulate growth, metabolism, reproduction and other hormonal functions through its close connection with the hypothalamus.

84. Option (d) is correct.

Explanation: India's first International Ophthalmology Research Conference (AIOS-AFOU 2026) was inaugurated in New Delhi. The conference brought together ophthalmologists, researchers and medical experts from

India and abroad to discuss the latest advances in eye care, vision research, innovative surgical techniques and emerging technologies, promoting international collaboration in ophthalmic science.

85. Option (d) is correct.

Explanation: The Food Safety and Standards Authority of India (FSSAI) is a statutory body, established under the Food Safety and Standards Act, 2006. It functions under the Ministry of Health and Family Welfare and is responsible for framing food safety standards, regulating food businesses and ensuring the availability of safe and wholesome food. It is not a constitutional body.

86. Option (c) is correct.

Explanation: Orographic rainfall occurs when warm, moisture-laden air is forced to ascend a mountain barrier. As the air rises, it expands, cools and condenses to form clouds, resulting in rainfall on the windward side of the mountain. The leeward side receives much less rainfall and often forms a rain-shadow region, as seen in parts of the Western Ghats and the Himalayas.

87. Option (c) is correct.

Explanation: Abyssal plains are vast, flat regions located on the deep ocean floor between the continental rise and the mid-oceanic ridges. Formed by the deposition of fine sediments over millions of years, they are among the flattest surfaces on Earth. These plains cover a significant portion of the ocean basins and play an important role in marine geology and oceanic ecosystems.

88. Option (b) is correct.

Explanation: According to the United Nations Sustainable Development Goals Report 2026, more than half of the world's population is now covered by at least one form of social protection and global internet access has exceeded 70% since the launch of the SDGs in 2015. However, more than half of the SDG targets are not on track to be achieved by 2030. Therefore, Statements 2 and 3 are correct.

89. Option (b) is correct.

Explanation: Major Abhilasha Barak was honoured with the 2025 United Nations Military Gender Advocate of the Year Award for promoting gender equality and women's participation in peacekeeping operations. The award recognises military personnel who integrate gender perspectives into UN peacekeeping missions and contribute to inclusive, effective and sustainable peacebuilding efforts.

90. Option (a) is correct.

Explanation: Exercise Desert Eagle is a bilateral air force exercise conducted between the Indian Air Force (IAF) and the United Arab Emirates Air Force (UAEAF). It focuses on improving interoperability, air combat tactics, operational coordination and mutual understanding between the two air forces. The exercise strengthens defence cooperation and reflects the growing strategic partnership between India and the UAE.

91. Option (c) is correct.

Explanation: During the Home Rule Movement (1916–1918), Bal Gangadhar Tilak promoted nationalist ideas through his newspapers Kesari (Marathi) and The Mahratta (English). Similarly, Annie Besant used New

India and Commonwealth to advocate self-government and mobilise public opinion. These publications played a crucial role in spreading nationalist consciousness and strengthening the demand for Home Rule in India.

92. Option (c) is correct.

Explanation: The United Arab Emirates (UAE) announced its decision to withdraw from both OPEC and the OPEC+ alliance, effective 1 May 2026. The move reflected the country's strategy to pursue greater flexibility in energy production and expand its oil and gas sector. Despite the withdrawal, the UAE continues to remain an important global energy producer and exporter.

93. Option (b) is correct.

Explanation: On 21 June 2026, Prime Minister Narendra Modi commissioned INS Agray, INS Dunagiri and INS Sanshodhak into the Indian Navy at Kolkata. The induction of these indigenously built vessels strengthens India's maritime capabilities and supports the vision of Aatmanirbhar Bharat. These platforms enhance coastal defence, maritime surveillance, hydrographic operations and overall naval preparedness.

94. Option (a) is correct.

Explanation: World Red Cross and Red Crescent Day is observed every year on 8 May, marking the birth anniversary of Henry Dunant, the founder of the International Committee of the Red Cross (ICRC) and the first recipient of the Nobel Peace Prize. The day recognises the humanitarian efforts of Red Cross and Red Crescent volunteers worldwide in providing relief during disasters, conflicts and public health emergencies.

95. Option (d) is correct.

Explanation: India's first AI-powered combat aircraft, 'Kaal Bhairava,' is planned to be manufactured in Portugal as part of an advanced defence collaboration. The aircraft is designed to incorporate artificial intelligence, autonomous combat capabilities and next-generation mission systems, representing a significant step towards modernising India's defence technology and strengthening indigenous military capabilities.

96. Option (b) is correct.

Explanation: Kunal Shah, a prominent Indian entrepreneur and founder of the fintech company CRED, has been appointed as the Global Head of WhatsApp by

Meta Platforms. Known for his contributions to India's digital payments and fintech ecosystem, his appointment reflects the growing global influence of Indian technology leaders in shaping the future of digital communication and financial innovation.

97. Option (c) is correct.

Explanation: The 52nd G7 Summit adopted the theme 'Working Together to Address Major International Challenges.' The summit focuses on strengthening cooperation among the world's leading advanced economies in addressing issues such as global security, climate change, economic resilience, energy transition, technological innovation and sustainable development through collective action and multilateral cooperation.

98. Option (d) is correct.

Explanation: Following its official declaration on July 8, 2026, Uttarakhand became the sixth (6th) fully literate state in India under the National Education Policy (NEP) 2020 and the ULLAS – New India Literacy Programme framework. The state achieved this distinction after crossing the 95% literacy threshold mandated by the Union Ministry of Education, joining Mizoram, Goa, Tripura, Himachal Pradesh and Sikkim.

99. Option (b) is correct.

Explanation: The 73rd Constitutional Amendment Act, 1992, granted constitutional status to Panchayati Raj Institutions (PRIs) by inserting Part IX (Articles 243–243O) and the Eleventh Schedule into the Constitution. It established a three-tier Panchayati Raj system, regular elections, reservation for women and weaker sections and State Finance and Election Commissions, thereby strengthening grassroots democracy and rural local self-government.

100. Option (d) is correct.

Explanation: In July 2026, Assam became the first Indian state to commercially produce matcha tea, a finely powdered green tea traditionally associated with Japan. Matcha is rich in antioxidants, catechins and amino acids, making it popular as a health beverage worldwide. The initiative diversifies Assam's tea industry, enhances value addition and opens new opportunities in premium international tea markets.
